Mr. Dean C. Ringle, P.E., P.S.
Franklin County Engineer's Office
970 Dublin Road
Columbus, Ohio 43215

Re: Georgesville Road (DOPW #10-046)

Dear Mr. Ringle:

The City of Columbus, Division of Power and Water (DOPW) has reviewed the Stage 1 construction drawings for the Georgesville Roadway project and the associated impacts to the existing water main. It is recommended that the 20-inch water main be replaced due to the reduction in cover expected by the project. We have received the engineering proposal for the design of the replacement water main. The design will consist of replacing the 20-inch main with a new 24-inch main from Broad Street to the railroad, located approximately 3,800 linear feet south of Broad Street.

Based on this scope of work, the DOPW is in agreement with the scope of the design which includes a design fee of \$45,000. The City agrees to reimburse the Franklin County Engineer's Office for the design and construction of this water main contingent upon approval by the Columbus City Council. The City will move forward with legislation to reimburse Franklin County once the construction contract has been awarded and the bid amount for the water work has been determined. After Council approval, an agreement will need to be initiated between both parties. Once the project is complete and all quantities are finalized, we ask you to submit an invoice for this work along with a record plan of the as-constructed location. Upon receipt of these items, the City will reimburse Franklin County for the invoiced amount.

Should you have any questions, please feel free to contact Danella Pettenski, Water Distribution Engineering Section Manager, at 645-7677.

Sincerely,

Richard C. Westerfield, P.E., Ph.D.
Administrator, Division of Power and Water
