Embankments and riprap at the John R. Doutt Upground Reservoir require periodic maintenance to repair erosion and slumping.

This project will repair the inboard portion of the crest of the Upground Reservoir. Repair work includes: geotextile repair, earthwork, clearing and grubbing; and riprap slope protection. Work also includes restoration of selected erosion rill formations on the southern outboard slope of the reservoir embankment utilizing vegetative filter socks, growing media, seeding and mulching, and other such work as may be necessary to complete the contract, in accordance with the plans and specifications set forth in the Invitation For Bid.

Planning Area: “99 – Citywide” since the Upground Reservoir serves several communities throughout Columbus and Delaware County.
- 6. A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.**
All work shall be substantially complete within 60 calendar days of the Notice to Proceed, with final completion to occur within 75 calendar days. The City anticipates issuing a Notice to Proceed on or about August 2019.

7. **A narrative discussing the economic impact or economic advantages of the project; community outreach or input in the development of the project; and any environmental factors or advantages of the project.**

As central Ohio continues to grow, additional water supply sources must be developed. To address the growing needs, three upground reservoirs located near the Scioto River in northwestern Delaware County were recommended in the Water Beyond 2000 study as a way to supplement the water supplies needed to support projected economic development in Franklin County. The John R Douth Upground Reservoir, the largest of the three recommended, was constructed and put in use in 2015. This project is to maintain this reservoir to allow for continued use of this important infrastructure.

During the initial design and construction of the reservoir public meetings were held and environmental reviews performed and permits issued by OEPA and ACOE.

8. **An estimate of the full cost of the Contract including a separate estimate of any and all phases or proposed future contract modifications.**

The bid amount and proposed award amount is \$394,460.00, including a 10% construction contingency amount that will be utilized to fund needed and approved changes in the work. No contract modifications are anticipated at this time; however, construction exigency might later compel modification of this contract, if unforeseen difficulties are encountered.

Cost summary:

Original Contract	\$394,460.00
