

Historic Resources Commission

Dear Mayor Coleman,

As a professional in the field architecture and a homeowner in the Old Oaks Historic District, I have a unique perspective to bring to the Historic Resouces Commission. My professional experience spans various project types including healthcare facilities, pre-k thru 12, higher education, retail, corporate, and residential. This variety is important in understanding the numerous historic districts. Each distric is unique to its neighborhood and timeperiod. I also have experience preparing and presenting documents to architectural review boards professionally and personally. The boards and commissions are an important part in protecting the fabric of our historic neighborhoods.

Personally, I have been renovating a 1905 home that I purchased from the City Landbank in 2011. I came across this property while working for the Neighborhood Design Center. At the NDC, I participated in many community focused projects in Franklinton, Near Southside, King-Lincoln and Weinland Park. Through this experience I was exposed to the various civic associations, neighborhood groups, and planning professionals. The passion and pride area residents have is inspiring and why I continue to be involved in neighborhood development. Revitalization and adaptive reuse is an important part in preserving our historic neighborhoods as they strive to be destinations within our city.

It would be a privilege to be part of Historic Resources Commission. I appreciate you time and consideration.

Sincerely, Abbie Faust
