

Tim Skinner, Principal ASLA, PLA, LEED AP BD+C

A Partner at EDGE, Tim's exceptional design skills bring creativity and vision to projects of all scales. His collaborative approach of balancing the client's goals with thoughtful integration of architecture and site-specific factors ensures that each project exceeds expectations, from conception to completion. These include master plans and detailed site design for campus environments, corporate headquarters, residential communities, athletic facilities and civic institutions.

In addition to providing leadership as a Principal, Tim provides "hands on" project management through all phases of design and construction including site analysis, concept development, master planning, construction documentation and client communications.
