Defining the Field of Intraosseous Medicine

January 1, 2011

Re: Sole Source Letter

To: Current / Prospective Vidacare Customer

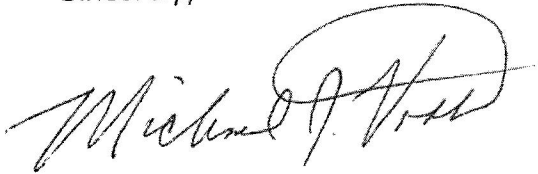

As of January 1, 2011, Vidacare's direct sales team is responsible for customer accounts for the EZ-IO<sup>®</sup> in the following states: California, Nevada, Arizona, Alaska, Washington, Oregon, Idaho, Texas, Oklahoma, Nebraska, Kansas, North Dakota, South Dakota, Wisconsin, Michigan, Minnesota, Illinois, Iowa, Missouri, Kentucky, Ohio, Indiana, Maine, Vermont, New Hampshire, New York, Rhode Island, Connecticut, Hawaii, and Massachusetts.

This means only Vidacare's direct sales team members are permitted to market, sell and/or service customers within these states who are using the EZ-IO infusion systems or who desire to purchase these systems. All other states will continue using established third party distributors.

Thank you for your interest in the EZ-IO intraosseous infusion system. Vidacare is the sole manufacturer of the EZ-IO intraosseous infusion system and no other battery powered IO product is currently available in the marketplace.

If you have any questions or concerns, please do not hesitate to call our office.

Sincerely,

Michael J. Voss  
Chief Operation Officer
