Subject: FW: Requesting Bid for One-Time Purchas

Good morning,

The Division of Infrastructure Management is requesting approval to purchase one (1) Diesel Powered Pothole Patching truck. The truck will have an add-on chute that attaches to the rear of the vehicle to allow precise placement of the patching material. This unit will be used for patching potholes on the city roadways and alleys.

They are requesting the vehicle be diesel powered since the addition of a CNG tank will increase the truck length and make the turning radius of the vehicle too large to maneuver in and out of city alleyways. This unit will be a one for one turn-in, and the brass tag will be determined at the time of delivery. They are requesting that this one-time purchase be bid out by Purchasing.

Estimated amount is around \$330,000.00 for both the mounted patch unit and the chassis.

Thank you,

Jessica Yu

Emily,

We'd be looking at around 330,000 for both the mounted patch unit and the chassis. If you are able, please send bid notification to Best Equipment and FYDA Freightliner.

Bob,

Thank you. Do you have an estimate of how much this will be? Do you have any vendors that have a city account that you want to be sure Purchasing sends a bid notification to?
