

To Whom It May Concern:

JusticeTrax Inc. currently provides forensic case management software systems meeting all of the following criteria:

- Designed specifically for forensic laboratories.
- Ironclad Z-Order chain of custody joined with unique barcode labeling system
- Customized workflows and user added data fields
- Tailorable on screen labels determined by users
- Role based security permissions allowing single sign in credentials per user
- Installed at State and Federal level forensic laboratories.
- Installed at forensic laboratories while passing ASCLD-LAB International and ANAB/FQS accreditations.
- Includes both distributed and centralized support for multi-site forensic laboratories.
- Includes the ability to capture the graphical output of laboratory instrumentation and store the images in an integrated document management system.
- Includes the ability to perform evidence reconciliations using Microsoft Windows based handheld computers.
- Audit trail logs preserved to identify all changes to case files.
- Ad hoc query tools and SAP Crystal Reports utilized for standard, periodic or unique reporting requirements.
- Includes tools to interface LIMS-plus to analytical instruments for two-way data transfer.
- Case and non-case activity tracking, such as training, subpoenas, and user defined activities
- Instrument maintenance tracking
- Track current and archived testing procedures
- Microsoft Partner offering a 100% Windows compatible solution.
- LIMS-plus is proprietary software of JusticeTrax, Inc.

JusticeTrax, Inc. is the sole supplier of its products and services. The company uses no outside vendors, representatives or agents to distribute any of its products or services including, but not limited to:

- LIMS-plus®
- LIMS-plus DNA
- LIMS-plus Portal
- iPrelog
- iResults
- EvidRECON (Hardware and software sold as system – not available separately)
- Chemical Inventory Management System
- JusticeTrax Imaging
- JusticeTrax Product Maintenance & Support
