A continuation of the original SOW.

Planning Phase:

The project efforts will initiate with a kickoff to align all project stakeholder expectations and roles and responsibilities. This phase will include a comprehensive workshop designed to establish the structure of the project team, discover the core business and technical requirements of the project, and distill a conceptual solution set and design that will provide the preliminary focus for the project. This phase of the project will ultimately transform the disconnected pieces of the project into a comprehensive, integrated execution plan.

Columbus DPU Responsibilities

Project Team and Sponsorship: Participate in the requirements gathering sessions; Define and validate business and technical requirements; Identification of Columbus DPU project team and sponsorship; Complete, return, review and approve ARCOS requirements documentation; Requirements review; Columbus DPU signoff

Deliverables

This phase will be complete when ARCOS has completed all objectives and documents listed below and they have been reviewed with the Columbus DPU Project Sponsor or Manager.

Developing Phase

The Developing phase primarily involves building and/or configuring the solutions and content required for user testing and go-live. During this phase, all key elements of the technical solution and deployment process must be carefully engineered, validated, and managed.

The primary purpose of the Developing phase is to optimize the conceptual design into fully engineered and automated solutions, where possible, in order to create the most efficient and effective deployment methods. Leveraging a comprehensive system walkthrough, validate current state alignment and at its conclusion conduct testing guided

by the ARCOS team as to perform any necessary reconfigurations ensuring that all solutions are operating to specification, and are ready to support the training and readiness activities within the Deploy phase.
