

Dear Customer:

Please accept this letter to document that Applied Biosystems is the sole manufacturer of the ABI models 310, 3100, 3130, 3130XL, 7000, 7500, and 9700 Genetic Analyzer, Real-Time PCR and Thermal Cycler instruments. These unique instrument systems are used for Human Identification applications. The ABI Prism Genetic Analyzers are the only single, four, or sixteen capillary systems manufactured in the world that have the ability, and are validated, to analyze Human DNA samples for the purpose of Human Identification, utilizing capillary electrophoresis technology. Applied Biosystems is the sole manufacturer and distributor of all AB kits, reagents, capillaries, and related consumables used in conjunction with these instruments. These products are sold direct, and are available exclusively from Applied Biosystems,

Further documentation describing the unique specifications of the Applied Biosystems ABI Prism Genetic Analyzers, and other ABI Instrument Systems, can be found in our user manuals, and are available upon request.

Applied Biosystems does not have authorized distributors in the United States.

This information should justify Applied Biosystems as your "Sole Source" supplier for the instruments, software, consumables and service that you need to perform your DNA Analysis, for the purpose of Human Identification.

If you need any further information please feel free to contact me at your convenience.

Regards,

Dawn Waltman
