5. **A full description of all work to be performed including a full description of work to be performed during any known phasing of the contract.**

The project consists of various improvements at several sites around Griggs, Hoover and O'Shaughnessy Reservoirs to provide water quality treatment of stormwater before discharging directly into the raw drinking water supply reservoirs.

The site at O'Shaughnessy Reservoir is located in Glick Park at the dam. Improvements to this site include an improved entrance and parking, bio-retention, demonstrations of pervious concrete and permeable pavers, associated educational signage, an overlook deck, fencing, park sign, lighting, picnic tables, and other associated items.

Ten sites are located along Griggs Reservoir. Improvements at these sites include pervious concrete and permeable paver parking lots, parking lot removal and reconfiguration, bio-retention, bio-swales, level spreaders, vegetated buffers, diversion structures, rain barrels, and other associated items.

Fourteen sites are located around Hoover Reservoir. Improvements at these sites include pervious concrete and permeable paver parking lots, parking lot removal and reconfiguration, bio-retention, bio-swales, infiltration trenches, vegetated buffers, shoreline stabilization structures and boat ramps, rain barrels, and other associated items.

All work will be in accordance with the plans (CC-15608) and specifications, including erosion and sediment control, maintenance of traffic, and other items as necessary to complete the contract.

6. A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.

Begin date = March 2010
