RE: Emergency service to repair sewer at 1589 and 1597 Greenway, Columbus, Ohio

The Distribution Maintenance section requests that the Division of Power and Water initiate legislation for the amount of \$25,301.03 to establish a purchase order with Young's Plumbing to cover an invoice related to the emergency repair of a sewer at 1589 and 1597 Greenway, Columbus, Ohio.

Young's Plumbing excavated and attempted to unclog and repair a sewer that had been flash filled. The sewer was jetted, cabled, and video taped. A concrete section of the floor in the affected basement was removed and replaced in order to replace a drain. The area was then backfilled outside the excavation area.

Your approval of this request would be greatly appreciated.
