

SERVICE STATEMENT
AN18-008
369.2 +/- acres in Norwich and Brown Townships
Joseph A. Sugar, et al.

The following statements were included in the Council approved service ordinance for this annexation.

369.2+/- acres in Norwich and Brown Townships upon the annexation of said area to the city of Columbus:

Public Safety: The City of Columbus, Department of Public Safety will be able to provide the appropriate level of safety related services to the proposed annexation area. Such services will include police and fire protection as well as emergency medical service to the subject property.

While the petitioner for annexation may have proposed future development plans for the property in question, the Department of Public Safety requests that the City exercise its discretion in the coming development planning and review process to ensure any future development will be properly served by the Department of Public Safety. Discussions between the City and the present property owner or any future developers regarding post annexation changes in zoning or other changes to the property should include the Department of Public Safety and the Department of Development to ensure any proposed development of the annexation property may be adequately accommodated. Specific details for safety services are dependent upon the parameters of future development that is ultimately approved by the City.

Sanitation: Division of Refuse Collection personnel have made a site visit and the division has no objection to this request. If a multi-family building or complex is built, all requirements of Title 13 would need to be followed in order to qualify for city-provided multi-family refuse collection service.

Transportation: Maintenance will be available for any additional right-of-way that may be included in this annexation request. If this annexation contains existing signalized intersections, those intersections and signals are subject to Transportation Division Policy, which appeared in the December 6, 2003 Columbus City Bulletin, and any subsequent updates thereto.

Water: The proposed annexation site will receive water service from the Division of Water. There currently is not a water main contiguous to the site to provide water service. A water main must be extended from just east of the intersection of Renner Rd and Willowridge Rd, which is approximately 1100 feet from the site. The connection to water service will be made at the owner's expense.

Sewers: All sanitary and storm sewers required shall be constructed privately by the owners and developers at their own cost and expense with no cost to the City.

Sanitary: Sanitary sewer service for the proposed development is available via pump station/force main system. Connection point to the Columbus sewer to be determined by a study completed by the developer.

Storm: All storm sewers necessary for development/redevelopment of the area shall be designed in accordance with design policy and zoning codes in effect at the time of development.

All sanitary and storm sewers required shall be constructed privately by the owners/developers at their own expense with no cost to the city.
