Ms. Sonia Krammes  
Department IT Coordinator  
Division of Sewerage and Drainage  
1111 East Broad Street  
Columbus, OH 43205

Subject: Sole-sourcing Justification for Selecting enfoTech to Upgrade City's iPACS 2.0  
Pretreatment System to iPACS 5.0

Dear Sonia:

City of Columbus has implemented the iPACS system and associated software modules, licensed from enfoTech, to manage pretreatment compliance information mandated under the Title 40 of Code of Federal Regulations and City's local rules. iPACS system will require system upgrades, technical support and maintenance services for effective and continuous operation of the system.

The iPACS System was developed by enfoTech. enfoTech owns the iPACS Title and is the only entity that is authorized to license the software systems and to provide technical services. We do not have any local distributor or service agent for the sale or support of the software.

Please contact me if you have any questions.

Sincerely,

Tony Jeng  
Executive Vice President
