

larry r. browne, aia, ncarb

For forty years, Mr. Browne has been involved in a variety of architectural and planning work ranging from Federally funded housing programs, industrial, institutional, food service, commercial and recreational facilities.

Since founding Browne Group Architects in 1978, Mr. Browne has worked extensively with public funded projects. Being involved from the grant application stages through the programming, design and construction stages has given him a thorough understanding of the needs and constraints placed on clients developing projects with these types of funds. In addition, Mr. Browne has been extensively involved in building code research and implementation of the accessibility requirements of the American Disabilities Act and the Fair Housing Act.

The balance of his experience with the combination of building codes, federal requirements and guidelines and an extensive construction and inspection background has enhanced his appreciation of the complexity of the constraints that are placed on the budget, programming, design, and construction projects.
