Thank you, Kristian. This looks great! We will get the check processed soon.

Best,

Corey

Subject: EcoSmart Choice Sustainability Grants for Solar + Storage

Hi Kristian,

I still haven't heard back from Matt Griffin with Sustainable Columbus who is running the current co-op to see if there are any objections but here is a quick blurb for AMP Ohio on how we might like to use the grant dollars.

The City of Columbus Municipal Division of Power proposes to use the EcoSmart Choice Sustainability Grant funding for 2023 to partner with Sustainable Columbus and Solar United Neighbors to fund residential customer solar PV and battery storage projects. This project will focus on lower/middle income residential DOP customers, with 100% of the installation cost being covered by the grant.

The 2024 Solar United Neighbors LMI co-op is currently working to refine a list of candidates with the help of IMPACT Community Action. IMPACT has an established list of potential candidates due to their established weatherization program, which has the means to support the necessary income verification, roof age and condition, and electrical system requirements.

At an estimated cost of \$10,000 - \$15,000 per customer average 4 kW PV installation, and \$15,000 for a battery, the \$167,302.25 could fully-fund 10 - 15 solar PV-only

projects, 6 – 7 solar PV + battery storage projects, or a combination thereof for Division of Power LMI customers.
