

My family (my wife Julie Cronk and son Seth Crowell) and I have lived on East Torrence Road for 22 years – we love Clintonville!

I am a biology graduate of the College of Wooster, and I received a master's degree in botany from the Ohio State University<sup>136940</sup>. I am currently a senior environmental scientist and shareholder at Hull & Associates, LLC, an Ohio-based engineering and environmental consulting business. My work at Hull is in applied sciences, stream and wetland restoration, risk assessment, and federal and state surface water regulation.

I have dedicated my time to a variety of volunteer positions over the years, particularly since my partial retirement in 2017, including the American Red Cross, the Harmony Project, Meals on Wheels, and the Ohio DNR Division of Natural Areas and Preserves. In CAC District 4, I have been involved as a volunteer in the ongoing restoration, planning and management of the Whetstone Prairie which I monitor annually for the Columbus Recreation and Parks Department. On summer Sundays, we enjoy supporting the Summer Concerts at Whetstone Park of Roses with our fellow North Columbus Civitan club members.

My community interests are in environmental quality, particularly water quality and stormwater issues, green infrastructure, greenspace, the Whetstone Prairie, and the Olentangy Trail. I am new to the commission in 2021, and I look forward to working on behalf of my neighbors in District 4 with the overall goal of improving quality of life for Clintonville residents.
