5. **A full description of all work to be performed including a full description of work to be performed during any known phasing of the contract. The planning area should also be listed as well as any street or neighborhood names.**

These projects will provide general engineering services to the Division of Water, Water Distribution Engineering section, on an “as-needed” basis. Work items will consist of field investigations, surveying, professional design services necessary for the completion of a design report, plans and specifications, and engineering services during construction as it relates to various water distribution and facility projects. There is no planning area associated with these contracts.

6. **A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.**

The initial contract is for a period of one year. The contract is renewable for two additional years.

7. **A narrative discussing the economic impact or economic advantages of the project; community outreach or input in the development of the project; and any environmental factors or advantages of the project.**

The contract is for general engineering services. The economic impact is \$300,000.00 of surveying and engineering services from the capital budget. This will allow the Division to perform miscellaneous engineering tasks on an as-needed basis. Outreach and environmental impact is unknown since the exact type and location of work is unknown at this time.

8. **An estimate of the full cost of the Contract including a separate estimate of any and all phases or proposed future contract Renewals.**
