## Solution Summary

### Diagnosis Content on Demand (ICD-10 and DSM-5)

On October 1, 2015, the industry will be moving to ICD-10 codes for diagnosis and inpatient procedures. In addition, the American Psychiatric Association has recently released DSM-5 as a replacement to the current industry standard DSM-IV. The content included in this subscription will provide the necessary cross-mappings, updates and clinician friendly terms to manage the transition across the different diagnosis vocabularies.

The Diagnosis Content on Demand subscription service includes access to copyrighted DSM content for diagnosis entry. This quote assumes that a specified number of users (identified herein) from your total end user license count access DSM content for recording diagnosis. If more than the specified number of your total users will require access, an additional DSM surcharge will apply. A quote will be supplied under separate cover upon request.

One of the following Netsmart Enterprise Solution Software, System versions are required for the ICD-10 Upgrade: ·

- myAvatar
- TIER WFS Platform
- eVOLV version 8.6.1
- INSIGHT version 7.1.6

### myAvatar

myAvatar is Netsmart's complete ARRA-certified electronic health record and practice management solution. Created specifically for the behavioral health industry, myAvatar maximizes the efficiency of each and every user by allowing you to customize your desktop to your unique role in the organization. Whether you are coordinating consumer schedules, accessing charts, measuring key performance indicators, checking eligibility, tracking claims, monitoring system status or even doing all of these at the same time, you can customize myAvatar so that it best meets your needs.

#### Wiley Libraries Description

Treatment Planners are a series of software datasets published by John Wiley & Sons, Inc. which provide an array of treatment planning components (Behavioral definitions, long term goals, short term objectives, and therapeutic interventions) for behavioral health problems encountered in patients in behavioral health care. The treatment planners have been integrated into Netsmart software products as an add-on subscription service. All Wiley Treatment Planners made available by Netsmart are incorporated into this Subscription Agreement. Should implementation assistance be required, additional budget will be required and a separate quote will be supplied.

Upon Netsmart's request and with reasonable notice, Licensee agrees to provide Netsmart with verification as to the number of users accessing the Licensed Program and/or Subscription or allow Netsmart or its authorized agent to independently audit Licensee's database to verify the same. Should this verification identify usage of the Licensed Program and/or Subscription in excess of the number of licensed users, Licensee agrees to immediately pay Netsmart's invoice for the then-current prices for such Licensed Program and/or Subscription for each additional user license.

#### Plexus Cloud Hosting

Access to the Plexus Cloud Environment will be made through a Secure Socket Layer (SSL) connection. Certain solutions (e.g. Methadone Dispensing, ImageNow, HL-7 Interfaces, ODBC, LDAP authentication, etc.) when used in conjunction with Netsmart's Plexus Cloud Hosting Services, may require the use of a VPN Connection. Netsmart suggests a formal technical review of requirements prior to contract execution. If it is determined that a VPN connection is required, connectivity options with cost will be provided. In these cases, the Client may consider the use of VPN Client software (provided at no additional charge or a VPN Appliance. The VPN Appliance eliminates the need to install VPN Client software on each desktop. It establishes a permanent encrypted connection from your environment to the Netsmart environment, providing full, secure access to all Netsmart hosted options. The benefit of this solution is that, for security purposes, your environment's Web pages are not publically accessible. If the Client has multiple Internet access points, multiple devices may be purchased.
