Hardship Statement

The applicant wants to do a mixed use development on two parcels which are separated by an alley which runs parallel to North High Street. The portion of the site to the west of the alley is a residential development which includes townhouses that front on West Norwich Avenue along with a small amount of commercial space that faces Lane Avenue. The portion of the site east of the alley is a mixed use building. The parking for this building will be on the parcel to the west which is being zoned to AR-3.

The applicant is requesting a variance to Section 3325.323 Building Height Standards to increase the height from 72 to 100 feet, to Section 3333.03 AR-3 Apartment District to allow parking for non-residential uses and to permit commercial uses on this parcel, Section 3333.24 Rear Yard to reduce the rear yard from 25% of the lot area to zero, and Section 3325.281 Parking and Circulation: to reduce the required parking ratio from 0.5 spaces per bed to 0.375 spaces per bed. This reduction only applies to the Lane Avenue building. The increase in height along Lane Avenue allows the building to step back from West Norwich Avenue to better relate to the buildings on the northside of West Norwich Avenue. The commercial uses in the building would be compatible with the mixture of housing and commercial uses along the north side of Lane Avenue. The reduction in parking is in line with other student housing developments and complies with the University Design Guidelines. This parking variance is only for the Lane Avenue building. The parking for the development on the east side of the alley is being provided on this parcel. Part of that parking would be for a non-residential use. The building covers most of the site which requires a reduction in the rear yard. This type of lot coverage is typical for student housing developments in the area.

The surrounding area along North High Street is developed with commercial uses; to the south across Lane Avenue University residential housing, to the west Newmen Center and to the north across West Norwich Street multi-family.

Given the development pattern in the area these variances will not adversely affect the adjoining properties or the general welfare. The granting of these variances will not impair an adequate supply of light and air to the adjacent property, nor unreasonably increase the congestion of public streets, nor increase the danger of fires, nor endanger the public safety, nor unreasonably diminish or impair established property values within the surrounding area, or in any other respect impair the public health, safety, comfort, morals or welfare of the inhabitants of the city.

Council Variance for 50 West Lane Avenue

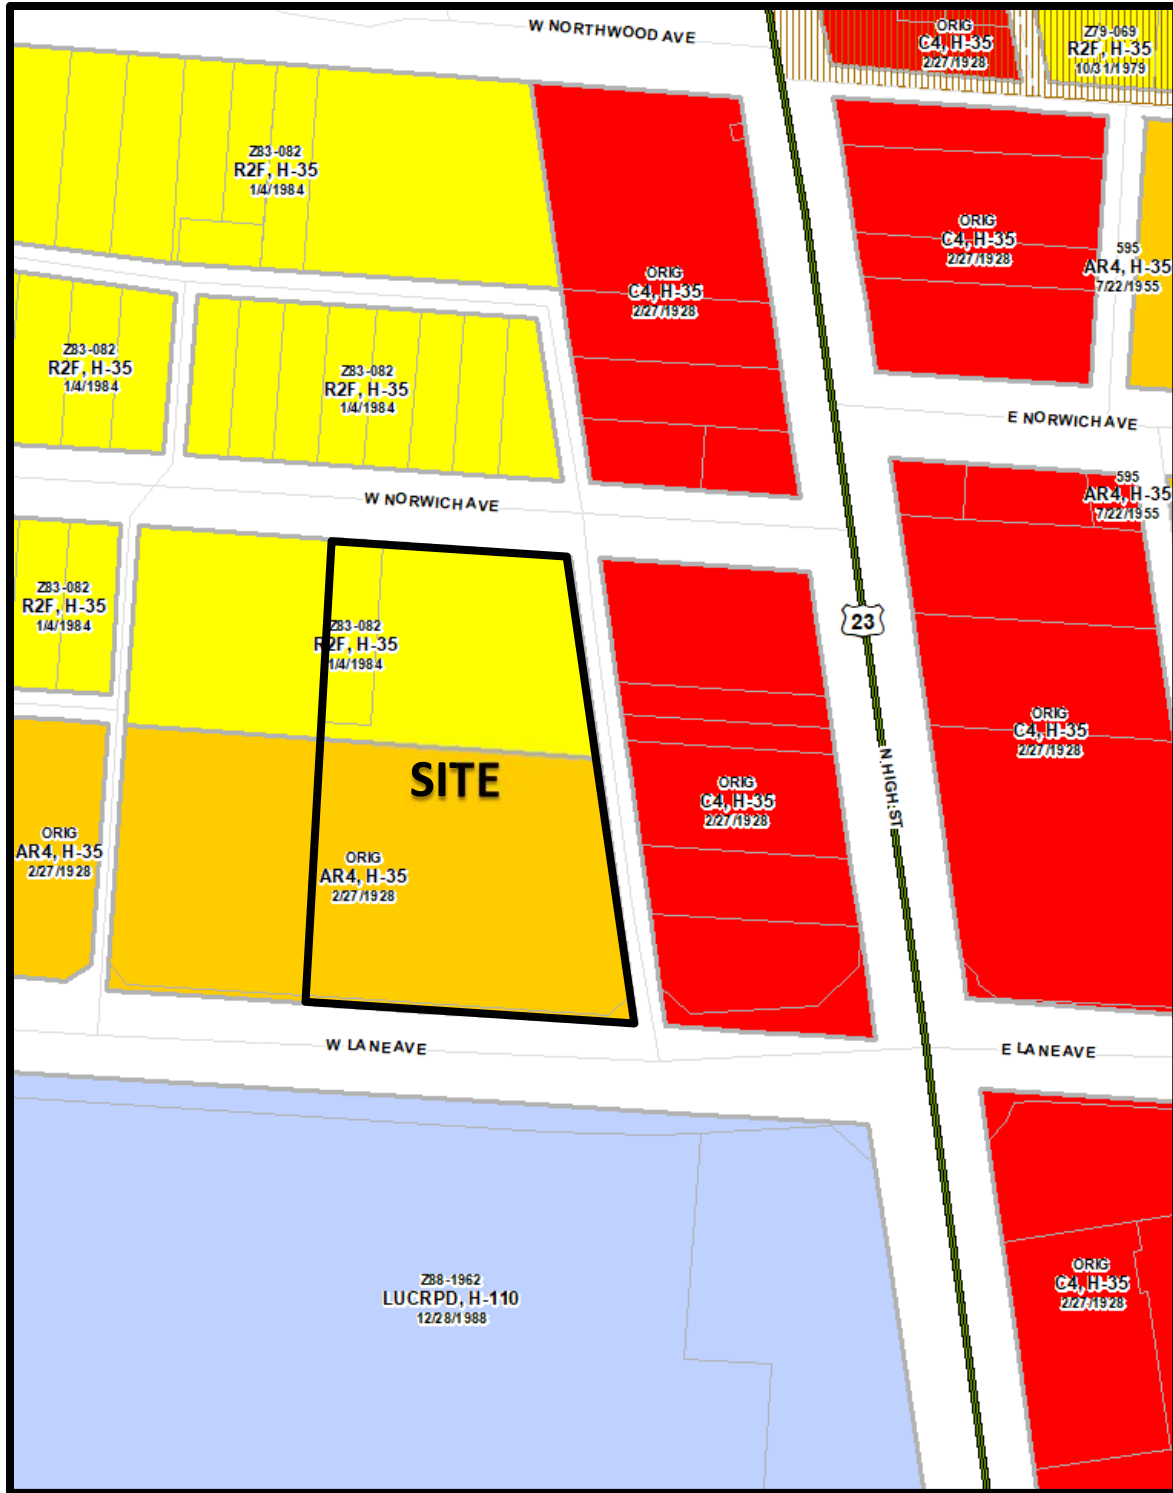

Section 3333.03 AR-3 Apartment District: to permit parking for non-residential uses and to permit commercial uses on this parcel.

Section 3333.24 Rear Yard: to reduce the rear yard from 25% of the lot area to zero.

Section 3325.281 Parking and Circulation: to reduce the required parking ratio from 0.5 spaces per bed to 0.375 spaces per bed. This reduction only applies to the Lane Avenue building.

Section 3325.323 Building Height Standards: to increase the building height from 72 to 100 feet.

 Disapproval

**LIST BASIS FOR RECOMMENDATION:**

The No Vote was due to ongoing concerns of density and parking. There was quite a bit of public comment against the project due to Blackstone is the parent company of the Applicant. Nobody from the public spoke in favor.

\* The Commission voted on the Aerial Easement to connect the 2 buildings with a pedestrian bridge over the Alley. 8-yes 7-No. Easement passed was approved.

Vote 3325, 281

14-NO 1-yes
