The goal of this project is to replace or rehabilitate water lines that have a high break frequency. Replacement or rehabilitation of these water lines will decrease burden on water maintenance operations. The existing mains rehabilitated and the new lines constructed under this project should eliminate the pattern of frequent water line breaks. By utilizing CIPP, the project has minimized the impact to the traveling public and has reduced the need for paving streets. This construction method greatly conserves the natural materials utilized on utility projects.

8. **An estimate of the full cost of the Contract including a separate estimate of any and all phases or proposed future contract modifications.**
