

Ord No.

Information to be included in all Legislation authorizing entering into a Contract:

1. **The names, contract compliance no. & expiration date, location by City/State and status of all companies (NPO, MAJ, MBE, FBE, HL1, AS1, or MBR) submitting a competitive bid or submitting an RFP or RFSO.**

Name	C.C. No./Exp. Date	City/State	Status
Ribway	311406579/ 5/31/2018	Columbus, OH	MBE
EMH&T	310685594/ 2/18/2018	Columbus, OH	MAJ
MS Consultants	346546916/ 2/18/2018	Columbus, OH	MAJ
American Structurepoint	351127317/ 8/25/2017	Columbus, OH	MAJ
JMT	520963531/ 4/21/2018	Columbus, OH	MAJ

2. **What type of bidding process was used (ITB, RFP, RFSO, Competitive Bid).**
Requests for Proposals (RFP's) were opened on November 18, 2016.

3. **List the ranking and order of all bidders.**

1. Ribway
2. EMH&T
3. Ms Consultants
4. American Structurepoint
5. JMT

4. **Complete address, contact name, phone number, and e-mail address for the successful bidder only.**

Mr. Robert Kuederle, Jr., P.E.
American Structurepoint
2550 Corporate Exchange Dr.
Suite 300
Columbus, OH 43231
Email: bkuederle@structurepoint.com

6. **A full description of all work to be performed including a full description of work to be performed during any known phasing of the contract. The planning area should also be listed as well as any street or neighborhood names.**

This project is needed in order to restore the hydraulic capacity of the existing storm infrastructure as well as to identify any necessary repairs so as to extend the useful life of the asset. The project will also reduce stormwater flooding issues in the neighborhood and create positive outlets for the new green infrastructure and downspouts that will be installed as part of the Blueprint projects.

This project will provide incremental funding to assess, clean and inspect all storm sewer infrastructure within the Tulane-Findley and Milford-Summit Blueprint areas so that the hydraulic capacity of the existing storm infrastructure is restored which will reduce neighborhood stormwater flooding issues and create opportunities for the installation of green infrastructure.

This work will occur in the Clintonville area, and the limits of the project are bounded by North Broadway on its northern and Olentangy Rd on the southern extents and by N. High Street on its eastern and by a railroad on the western extents.

6. A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.

***For engineering agreements:**

Specify the total term of the engineering agreement (ex. 4 year term). 2.5 years.

Specify the estimated ending month and year of the agreement based on the total term. June, 2019.

7. A narrative discussing the economic impact or economic advantages of the project; community outreach or input in the development of the project; and any environmental factors or advantages of the project.

The use of more sustainable, and environmentally friendly systems, commonly referred to as “green” infrastructure, has been recognized and implemented in many communities as a potential solution to many of the elements associated with EPA consent order requirements. Green infrastructure also provides additional stormwater treatment benefits, as well as potentially mitigating street flooding and impacts to receiving streams.

It is anticipated that the construction of green infrastructure will have an impact on the local economy by creating the need for personnel to construct and maintain the proposed facilities, as well as obtaining project related materials from local suppliers and vendors.

Prior to the design of the green infrastructure, the existing storm sewer system must be cleaned and televised to ensure that green infrastructure designs can be achieved.

8. An estimate of the full cost of the Contract including a separate estimate of any and all phases or proposed future contract modifications.

Cost summary:

Original Contract	\$ 956,187.88
CONTRACT TOTAL	\$ 956,187.88

9. Subconsultant information
