

SERVICE STATEMENT
AN12-003
7.181 ± acres in Orange Township
Estate of Richard D. Baggs, Jr. & Estate of Ora Baggs

The following statements were included in the Council approved service ordinance for this annexation.

Public Safety: The City of Columbus, Department of Public Safety will be able to provide the appropriate level of safety related services to the proposed annexation area. Such services will include police and fire protection as well as emergency medical service to the subject property.

While the petitioner for annexation may have proposed future development plans for the property in question, the Department of Public Safety requests that the City exercise its discretion in the coming development planning and review process to ensure any future development will be properly served by the Department of Public Safety. Discussions between the City and the present property owner or any future developers regarding post annexation changes in zoning or other changes to the property should include the Department of Public Safety and the Department of Development to ensure any proposed development of the annexation property may be adequately accommodated. Specific details for safety services are dependent upon the parameters of future development that is ultimately approved by the City.

Sanitation: Single family homes would qualify for city provided 90-gallon front curb refuse collection service. Any other development would require compliance with Title 13 requirements; Commercial/business uses are required to provide their own refuse collection.

Transportation: Maintenance will be available for any additional right-of-way that may be included in this annexation request. If this annexation contains existing signalized intersections, those intersections and signals are subject to Transportation Division Policy, which appeared in the December 6, 2003 Columbus City Bulletin, and any subsequent updates thereto.

Water: The proposed annexation site will receive water service from the Division of Power and Water. It will be served by an existing 16" water main located in Olde Worthington Road, south of the intersection of Olde Worthington Road and Polaris Parkway. A water main extension of ± 2,800 feet would be needed to serve the site. The water main extension would be built at the owner's expense.

Sanitary Sewer: Sanitary sewer service in this area is provided under the terms of a contract between Delaware County and Columbus. Columbus Department of Public Utilities records indicate that this property is tributary to an existing 30-inch sewer (CC-7915) situated approximately 350 feet southwest of the intersection of Powell Road and Worthington Road. Mainline extension is required to provide sewer service to this property. Said extension is to be designed and constructed at the property owner's expense.

Storm Sewer: All storm sewers necessary for development/redevelopment of the area shall be designed in accordance with design policy and zoning codes in effect at the time of development. All sanitary and storm sewers required shall be constructed privately by the owners and developers at their own cost and expense with no cost to the City.
