Subject: Proposal for SUMS Upgrade

Dear Mike,

As discussed, I am submitting this proposal for professional services related to upgrading the SUMS application, specifically the Editing and Management toolbars, to your current version of ArcGIS for Desktop. That would involve making one 32-bit package for installation on a Windows-based machine that supports the SDE data sources and the Oracle ODBC connections already made available by the City. The steps involved will include the following:

1. Resource DLL assemblies
2. Update project settings
3. Update code as-needed
4. Installation and testing

The major change to the current version is the inclusion of an ERU Comparison Report that automatically compares SUMS ERU with CIS ERU and reports differences. We propose to provide the services outlined above for a lump sum fee of \$3,200. We proposed to complete the upgrade portion within one (1) month of notice to proceed. The project will be invoiced upon successful completion.

Please let me know if you need additional details or have questions.

Respectfully submitted,
EVANS, MECHWART, HAMBLETON & TILTON, INC.
