

SERVICE STATEMENT
AN12-008
14.7 ± acres in Washington Township
Timothy A. White

Public Safety: The City of Columbus, Department of Public Safety will be able to provide the appropriate level of safety related services to the proposed annexation area. Such services will include police and fire protection as well as emergency medical service to the subject property.

While the petitioner for annexation may have proposed future development plans for the property in question, the Department of Public Safety requests that the City exercise its discretion in the coming development planning and review process to ensure any future development will be properly served by the Department of Public Safety. Discussions between the City and the present property owner or any future developers regarding post annexation changes in zoning or other changes to the property should include the Department of Public Safety and the Department of Development to ensure any proposed development of the annexation property may be adequately accommodated. Specific details for safety services are dependent upon the parameters of future development that is ultimately approved by the City.

Sanitation: Single family homes would qualify for city provided 90-gallon front curb refuse collection service. Any other development would require compliance with Title 13 requirements; Commercial/business uses are required to provide their own refuse collection.

Transportation: Maintenance will be available for any additional right-of-way that may be included in this annexation request. If this annexation contains existing signalized intersections, those intersections and signals are subject to Transportation Division Policy, which appeared in the December 6, 2003 Columbus City Bulletin, and any subsequent updates thereto.

Water: This site will be served by the Division of Water. There currently is not a water main contiguous to the site to provide service and must be extended from the intersection of Wilcox Road and Riggins Road approximately 4200' away to the northeast.

Sewers: All sanitary and storm sewers required shall be constructed privately by the owners and developers at their own cost and expense with no cost to the City.

Sanitary: Records indicate the properties proposed to be annexed are tributary to a sanitary sub-trunk sewer (manhole 19 CC15568) situated approximately 3,000 feet to the northeast (straight line measurement) on the west side of Wilcox Rd (North of Hayden Run Road). A mainline extension would be required to serve the property and would be engineered and constructed at the private property owner's expense. In addition, our records indicate a defined stream aligned within said properties. Our Stormwater Drainage Manual's Stream Corridor Protection Zone Policy applies.

Storm: All storm sewers necessary for development/redevelopment of the area shall be designed in accordance with design policy and applicable codes in effect at the time of development.
