Activities
National Institute of Rehabilitation Research Grant: Fall 1993
Title: Research Assistant to Professor Don Stredney
Computer Software: Form Z-3d Form Synthesizer and the Advanced Center for Computing in the Arts and Design's (ACCAD) proprietary rendering software, DAVE
Responsibilities: The purpose of this grant was to connect a stationary child's wheelchair to a computer. Visualization equipment and the wheelchair's joystick were the interfaces for a disabled child to maneuver through three dimensional architectural computer models. Using a virtual environment to train a child to use a new wheelchair, diminished the danger and anxiety a child experiences when using the chair's electronic components for the first time. Responsibilities were to work with the system analysts to design the project's functionality and to organize and input the architectural computer models.
Elected Position: 1993-1994 school year
ACCAD's Student Organization, OSCAAR
Appointed Position: 1991- 1993
Teaching Assistant- 326: Wood Construction, 327: Masonry and Concrete Construction, 328: Steel, Curtain Wall, and Flat Roof Construction.
