The Ohio State University, Adjunct Faculty
 City & Regional Planning
 Instructor, CRP 745 - Site Planning
 Instructor, CRP 853 - Urban Plan Studio

Experience

As a Senior Associate with MSI Design, Jason has gained a unique perspective on the many facets of planning and urban design through extensive experience on a wide range of projects. Jason has led many projects in our planning and urban design studios from comprehensive plans and inter-jurisdictional strategies, to urban design collaboration on downtown districts, town centers and large-scale riverfront park redevelopments. His early years with MSI involved performing contracted continuing planning services for several Central Ohio municipalities. This role required responsibilities including development plan/zoning review, development negotiations, comprehensive plan implementation, and representation of the city's interests at a variety of public board and commission meetings. Jason's insider knowledge of the workings of municipal government is matched with a fundamental understanding of the tools that staff planners need to positively impact the growth and development of their city. He has taken that knowledge and coupled it with a passion for urban design, creative thinking and public outreach to create successful plans for communities of all sizes. Jason is constantly working to continue the MSI goal of delivering top quality design and planning in the context of practical, real-world solutions and strategies.
