Product Name	Manufacturer	Vendor Part No	Description	Unit of Measure	State Price
Multi-User Server	Hyland Software, Inc.	OBIPW1	Provides utilities, OnBase Configuration, Basic Text Search and Print Servers, three-tier OnBase Broker and a License to use the copyrighted OnBase Database in conjunction with a supported SQL Database Management System (DBMS) in a single instance, multi-user environment.These licenses are not transferable to service bureau customers.	Each	$6,448.36
Single User Server	Hyland Software, Inc.	OBIPA1	Provides utilities, OnBase Configuration, Basic Text Search and Print Servers, three-tier OnBase Broker and a License to use the copyrighted OnBase Database in conjunction with a supported SQL Database Management System (DBMS) in a single instance environment.For Single User environments.Licenses are not transferable to service bureau customers.	Each	$806.05
Concurrent Client	Hyland Software, Inc.	CTIPC1	Provides retrieval, viewing, printing, and management of documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each, Qty 1-100	$1,128.46
Concurrent Client	Hyland Software, Inc.	CTIPC2	Provides retrieval, viewing, printing, and management of documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each, Qty 101-200	$967.25
Concurrent Client	Hyland Software, Inc.	CTIPC3	Provides retrieval, viewing, printing, and management of documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each, Qty 201+	$806.05
Workstation Client	Hyland Software, Inc.	CTIPW1	Provides retrieval, viewing, printing, and management of documents. The OnBase Web Client cannot use this license.	Each, Qty 1-100	$564.23
Workstation Client	Hyland Software, Inc.	CTIPW2	Provides retrieval, viewing, printing, and management of documents. The OnBase Web Client cannot use this license.	Each, Qty 101-200	$483.63
Workstation Client	Hyland Software, Inc.	CTIPW3	Provides retrieval, viewing, printing, and management of documents. The OnBase Web Client cannot use this license.	Each, Qty 201+	$403.02
Named User Client	Hyland Software, Inc.	CTIPN1	Provides retrieval, viewing, printing, and management of documents for a single named user.Both the OnBase Client or OnBase Web Client can use this license.	Each, Qty 1-100	$564.23
Named User Client	Hyland Software, Inc.	CTIPN2	Provides retrieval, viewing, printing, and management of documents for a single named user.Both the OnBase Client or OnBase Web Client can use this license.	Each, Qty101-200	$483.63
Named User Client	Hyland Software, Inc.	CTIPN3	Provides retrieval, viewing, printing, and management of documents for a single named user.Both the OnBase Client or OnBase Web Client can use this license.	Each, Qty 201+	$403.02
Unity Client Server	Hyland Software, Inc.	UNIPI1	Desktop client built on .NET and WPF that provides a customizable user experience to the desktop.	Each	$8,060.45
Unity Briefcase	Hyland Software, Inc.	UBIPW1	Provides offline access to documents and processes for disconnected, field workforces.	Each, Qty 1-100	$322.42
Unity Briefcase	Hyland Software, Inc.	UBIPW2	Provides offline access to documents and processes for disconnected, field workforces.	Each, Qty 101-200	$282.12
Unity Briefcase	Hyland Software, Inc.	UBIPW3	Provides offline access to documents and processes for disconnected, field workforces.	Each, Qty 201+	$241.81
Web Server	Hyland Software, Inc.	WTIPW1	Provides an ActiveX or HTML browser interface to access documents stored in an OnBase database via the Internet, Extranet or corporate Intranet.Each physical Web Server connecting to an OnBase database requires a separate Web Server license.StatusView will not be automatically included with the Web Server. If StatusView functionality is desired for a solution, please include a line item on any order with the code STIPI1 as a 'No Charge' item.	Each	$8,060.45

External Access Client	Hyland Software, Inc.	EACIPI1	Allows an organization to create an external-facing Web portal that provides access to OnBase content and processes to users outside the organization. External Access Client provides three different levels of functionality: Read Only, Contribute and Full Access. The configuration-based functionality level determines the StatusView portlets available: 1) Read Only: Custom Query, Folders, Envelopes, External Links, HTML; 2) Contribute: DKT, E-Forms, File Upload; 3) Full Access: Workflow, Workflow Dashboard, Workflow Process Statistics, Workflow Queue Activity, Workflow Queue Filer, WorkView Filter and WorkView Summary. Each successive level inherits the functionality of the prior level. In addition to this server license, External Access Client requires a monthly Active-User fee for all users accessing the portal within a given month, according to the following schedule: 1) Read Only: $2.00/Active-User/month; 2) Contribute: $4.00/Active-User/month; 3) Full Access: $8.00/Active-User/month. A built-in reporting mechanism will relay monthly usage data to Hyland for translation into a monthly billing amount according to the schedule provided here.	Per Portal	$1,612.09
Mobile Access for iPad	Hyland Software, Inc.	OMIPW1-IPAD	Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from an iPad	Per Platform, Per Server	$4,030.23
Mobile Access for iPhone	Hyland Software, Inc.	OMIPI1-IPHN	Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from an iPhone.	Per Platform, Per Server	$4,030.23
Mobile Access for Android	Hyland Software, Inc.	OMIPI1-ANDPH	Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from an Android device.	Per Platform, Per Server	$4,030.23
Mobile Access for Windows	Hyland Software, Inc.	OMIPI1-WINDO	Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from a Windows tablet.	Per Platform, Per Server	$4,030.23
Mobile Access for Windows Phone	Hyland Software, Inc.	OMIPI1-WINPH	Provides the ability to access pending work in Workflow Queues, view the document, view keywords, execute ad-hoc tasks and view, modify and create notes from an Windows phone.	Per Platform, Per Server	$4,030.23
Mobile Briefcase	Hyland Software, Inc.	MBIPN1	Allows users to synchronize documents from OnBase to a virtual briefcase accessible from Mobile Access for iPad and Mobile Access for Windows.	Per Named User	$403.02
Integration for Microsoft Outlook 2016	Hyland Software, Inc.	OLIPI1-16	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the OnBase folder. Users can also retrieve documents from the interface	Each	$4,030.23
Integration for Microsoft Outlook 2013	Hyland Software, Inc.	OLIPI1-13	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.	Each	$4,030.23
Integration for Microsoft Outlook 2010	Hyland Software, Inc.	OLIPI1-10	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.	Each	$4,030.23
Integration for Microsoft Outlook 2007	Hyland Software, Inc.	OLIPI1-07	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.	Each	$4,030.23
Integration for Novell GroupWise	Hyland Software, Inc.	GRIPI1	Allows a Novell GroupWise user to interact with an OnBase system through the familiar GroupWise client. Provides users the ability to save e-mails and/or any associated attachments directly into OnBase. Users can also retrieve documents from the interface.	Each	$4,030.23

Integration for IBM Lotus Notes	Hyland Software, Inc.	LNIPI1	Allows an IBM Notes user to interact with an OnBase system through the familiar Notes client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.	Each	$4,030.23
Gateway Caching Server	Hyland Software, Inc.	SGIPW1	Enables an organization with distributed locations to manage file caching geographically, providing increased retrieval times for documents such as PDF, OLE, and CAD drawings at the remote locations.	Each	$4,030.23
eCommerce Application	Hyland Software, Inc.	OSIPI1	Provides the ability to search for and purchase documents from a web interface.	Each	$12,090.68
Public Sector Constituency Web Access	Hyland Software, Inc.	GWIPI1	Provides constituents of a particular government agency web-based document viewing, and limited Workflow routing. Standard Client functionality will be restricted. This license is only for use by constituents in the public sector market. This license can NOT be used by any employee of any agency or anyone on that agency's internal network. Standard Client licenses must be purchased for agency employees. This license is required for each instance of an OnBase database within the agency.Constituent counts are determined by the most recent official Census results. Hyland reserves the right to increase license fees if the agency's constituent base increases.	Per 500 constituents, per system/database.	$4.03
Image-Only Multi-User Server	Hyland Software, Inc.	ELIPI2	Provides utilities, OnBase Configuration, Print Servers, and a License to use the copyrighted OnBase Database in a single instance, multi-user environment for only image documents.	Each	$1,612.09
Image-Only Concurrent Client	Hyland Software, Inc.	ELIPC2	Provides retrieval, viewing, printing, and management of image documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.	Each	$483.63
Image-Only Workstation Client	Hyland Software, Inc.	ELIPW2	Provides retrieval, viewing, printing, and management of image documents. The OnBase Web Client cannot use this license.	Each	$241.81
Image-Only Named User Client	Hyland Software, Inc.	ELIPN2	Provides retrieval, viewing, printing, and management of image documents for a single named user.Both the OnBase Client or OnBase Web Client can use this license.	Each	$241.81
Production Document Imaging (TWAIN)	Hyland Software, Inc.	TIIPW1	Scans (digitizes) paper documents using TWAIN compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For First	$4,030.23
Production Document Imaging (TWAIN)	Hyland Software, Inc.	TIIPW2	Scans (digitizes) paper documents using TWAIN compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For Second and Beyond	$2,418.14
Production Document Imaging (TWAIN) (Named Use)	Hyland Software, Inc.	TIIPN1	Intended for users within a Citrix or Terminal Services environment. Scans (digitizes) paper documents using TWAIN compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For First	$4,030.23
Production Document Imaging (TWAIN) (Named Use)	Hyland Software, Inc.	TIIPN2	Intended for users within a Citrix or Terminal Services environment. Scans (digitizes) paper documents using TWAIN compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For Second and Beyond	$2,418.14
Production Document Imaging (ISIS)	Hyland Software, Inc.	ASIPW1	Scans (digitizes) paper documents using ISIS compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For First	$4,030.23
Production Document Imaging (ISIS)	Hyland Software, Inc.	ASIPW2	Scans (digitizes) paper documents using ISIS compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For Second and Beyond	$2,418.14
Disconnected Scanning	Hyland Software, Inc.	DSIPW1	Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.	For First	$4,030.23
Disconnected Scanning	Hyland Software, Inc.	DSIPW2	Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.	For Second and Beyond	$2,418.14

Desktop Document Imaging	Hyland Software, Inc.	AIIPW1	Scans paper documents using only TWAIN compatible devices.	For < = 15 pages per minute	$403.02
Desktop Document Imaging	Hyland Software, Inc.	AIIPW2	Scans paper documents using only TWAIN compatible devices.	For < = 30 pages per minute	$806.05
Desktop Document Imaging	Hyland Software, Inc.	AIIPW3	Scans paper documents using only TWAIN compatible devices.	For > 30 pages per minute	$1,209.07
Desktop Document Imaging (Named User)	Hyland Software, Inc.	AIIPN1	Intended for users in a Citrix or Terminal Services environment. Scans paper documents using only TWAIN compatible devices.	Each	$1,209.07
Front Office Scanning Module	Hyland Software, Inc.	FOIPW1	Provides a simple and configurable scanning interface from within the OnBase Client or as a standalone scanning application. In a standalone installation, documents and index data are uploaded to OnBase via a connection to an OnBase Application Server or the OnBase Desktop.Indexing can be performed using Application Enabler (not included), HL7 datasets, or by manual entry.	Each	$806.05
Express Scanning	Hyland Software, Inc.	ESIPW1	Simplifies the task of document scanning for any department. All options, scanner settings, and default index values are pre-designated. Supports any TWAIN, ISIS or Kofax compatible scanner as well as sweep functionality. Documents are imported or sent to a scan queue for further processing.	Each	$806.05
Web Scanning Named User	Hyland Software, Inc.	WSIPN1	Provides low-volume, ad-hoc, TWAIN based document scanning capability to the Web Client.	Each	$403.02
Interactive Data Capture	Hyland Software, Inc.	IDCIPI1	Enhances standard indexing capabilities within the Unity Client Server. After OCR processing, manual indexing can be supplemented with Auto-Complete, Point and Click and Swiping capabilities.	Each	$8,060.45
Advanced Capture	Hyland Software, Inc.	IAIPW1	Enables the automatic classification and indexing of scanned documents. Supports multiple languages and the processing of bi-tonal, grayscale and color images. Enables batch processing and also ad-hoc Automated Indexing from a select list.	Per concurrent instance.	$20,151.13
Ad-hoc Advanced Capture	Hyland Software, Inc.	AZIPW1	Enables the automatic classification and indexing of scanned documents. Permits Automated Indexing of an individual document or group of documents from an OnBase select list.	Per workstation	$4,030.23
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI0	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 50,000 Invoices	$20,151.13
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI1	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 100,000 Invoices	$28,211.59
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI2	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 200,000 Invoices	$42,317.38
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI3	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 300,000 Invoices	$61,259.45
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI4	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 400,000 Invoices	$78,992.44
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI5	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 500,000 Invoices	$95,113.35

Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI6	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 600,000 Invoices	$110,025.19
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI7	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 700,000 Invoices	$123,324.94
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI8	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 800,000 Invoices	$135,415.62
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI9	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 900,000 Invoices	$145,894.21
Intelligent Capture for AP	Hyland Software, Inc.	ICAPIPI10	Templateless AP Invoice identification and indexing. Includes a pre-trained engine. Continues to learn and correct the capture process during user verification in the Unity Client. Includes Interactive Data Capture, Mailbox Importer, Fax Integration and Reporting Dashboards.	Up to 1,000,000 Invoices	$155,163.73
Automated Redaction	Hyland Software, Inc.	ARIPW1	Utilizes OCR character and pattern analysis or configured templates to evaluate document contents for information or areas on the document that need to be obscured and made unreadable. Documents are placed for review before being permanently redacted so that private or confidential information cannot be viewed on the image documents.	Each	$16,120.91
Bar Code Recognition Server	Hyland Software, Inc.	BSIPW1	Enables centralized bar code recognition, by allowing a single workstation to perform bar code processing on image batches that were scanned at many scanning workstations.	Each	$4,030.23
Bar Code Generator	Hyland Software, Inc.	BCIPI1	Generates 3-of-9 bar code sheets from manual keyword entry (in standalone mode) or from keyword and document type information scraped from the line-of-business application screen (when used with Application Enabler). In standalone mode, the Bar Code Generator connects to the OnBase database and allows the user to select a Document Type, at which point a keyword list is displayed for manual entry. At completion of manual entry, the user can trigger the printing of a 3-of-9 bar code sheet with the Document Type and Keywords encoded on it.	Each	$1,612.09
Merchant Capture	Hyland Software, Inc.	MTIPI1	Enables corporate and/or public sector organizations to benefit from The Check Clearing for the 21st Century Act (Check 21), in conjunction with their depository financial institution, by automating the paper-based, physical deposit process.	Each	$8,060.45
Image Segment Archiver	Hyland Software, Inc.	EBIPI1	Provides the ability to divide an image in a scan queue into multiple OnBase documents by allowing the user to select sections of the image and archive each selected section to a separate OnBase document.	Each	$3,224.18
Virtual Print Driver	Hyland Software, Inc.	PTIPC1	Provides a method to capture, index and store the print stream from any printable application and store the information as a TIFF image within the OnBase document repository. This is a single instance license.	Each	$4,030.23
COLD / ERM	Hyland Software, Inc.	CLIPW1	Processes, indexes, and stores host/legacy application generated text files. Supports ASCII, PCL, AFP, PDF and DJDE natively.	Each	$8,060.45
Advanced COLD / ERM	Hyland Software, Inc.	ACIPW1	Processes, indexes, and stores host/legacy application generated text files. Supports ASCII, PCL, AFP and DJDE natively. Uses multi-threaded technology with specific hardware requirements to maximize processing speeds.	Each	$28,211.59

Document Import Processor	Hyland Software, Inc.	DPIPW1	Imports documents (scanned or other) and their respective index information. This module is often used in conjunction with third party forms processing software as well as data conversion utilities.	Each	$4,030.23
Advanced Document Import Processor	Hyland Software, Inc.	ADIPW1	Imports documents (scanned or other) and their respective index information. This module is often used in conjunction with third party forms processing software as well as data conversions utilities. Uses multi-threaded technology with specific hardware requirements to maximize processing speeds.	Each	$16,120.91
Directory Import Processor	Hyland Software, Inc.	TYIPI1	Allows users to import documents residing in a network directory structure. The processor uses a configurable XML file to determine the document types and keyword values for the documents residing in the process directories. Could be utilized to archive documents that are scanned by a MFP device into network directories.	Each	$4,030.23
XML Index Document Import Processor	Hyland Software, Inc.	DXIPW1	Imports documents (scanned or other) and their respective index information via an XML Index file.	Each	$4,030.23
XML Tag Import Processor	Hyland Software, Inc.	XMIPW1	Processes, indexes, and stores XML format files.	Each	$5,642.32
Remittance Processor	Hyland Software, Inc.	RPIPW1	Provides the ability to identify remittance information (check images, remittance slips, and financial information) from a remittance text file and store the information within the OnBase document repository.	Each	$16,120.91
Advanced Remittance Processor	Hyland Software, Inc.	APIPW1	Provides the ability to identify remittance information (check images, remittance slips, and financial information) from a remittance text file and store the information within the OnBase document repository. Uses multi-threaded technology with specific hardware requirements to maximize processing speeds.	Each	$32,241.81
PCL Input Filter	Hyland Software, Inc.	PCIPW1	Works in conjunction with OnBase COLD / ERM to process and store PCL data streams, enabling stored documents to retain original formatting features.	Each	$2,418.14
AFP Input Filter	Hyland Software, Inc.	AFIPW1	Works in conjunction with OnBase COLD / ERM to process and store AFP data streams, enabling stored documents to retain original formatting features.	Each	$8,060.45
DJDE Input Filter	Hyland Software, Inc.	DJIPW1	Works in conjunction with OnBase COLD / ERM to process and store DJDE data streams, enabling stored documents to retain original formatting features.	Each	$4,030.23
PDF Input Filter	Hyland Software, Inc.	PIIPW1	Processes, indexes, and stores PDF documents. Allows for the extraction of index data from the PDF. Allows for the option of converting and storing the PDF as a TIFF (multi-page TIFF when applicable). Due to the variety of PDF formats, Hyland Software must verify that a PDF document can be processed prior to selling this module. Please make no assumptions.	Each	$6,045.34
Mialbox Importer	Hyland Software, Inc.	SSIPW1	Allows configuration of OnBase to automatically import new messages from an email server that supports the IMAP or POP3 protocol. Through the definition of conditions and rules, email messages become documents and each document is associated with a Document Type.	Each	$8,060.45
Archive Services for Microsoft SharePoint	Hyland Software, Inc.	MAIPI1	Allows users to archive documents from SharePoint document libraries to OnBase. Archival can be ad-hoc, event-driven, or scheduled based on pre-defined rules.	Each	$4,030.23
132 Column Font	Hyland Software, Inc.	FOIPI1	Provides the ability to view a complete 132-character wide COLD report in 800 x 600 screen resolution without having to scroll right and left to find the information.	For 1-100 Workstations	$1,612.09
132 Column Font	Hyland Software, Inc.	FOIPI2	Provides the ability to view a complete 132-character wide COLD report in 800 x 600 screen resolution without having to scroll right and left to find the information.	For 101+ Workstations	$4,030.23
Integration for Biscom FAXCOM	Hyland Software, Inc.	FSIPI1-BF	Provides the ability to specify how fax documents are configured for automatic import into OnBase upon receipt at the FAXCOM Server.	Each	$4,836.27
Integration for Esker Fax	Hyland Software, Inc.	FSIPI1-EF	Provides the ability to specify how fax documents are configured for automatic import into OnBase upon receipt at the Esker Fax Server.	Each	$4,836.27

Integration for OpenText Fax Server, RightFax Edition	Hyland Software, Inc.	RFIPW1	Provides the ability to specify how fax documents are configured for automatic import into OnBase upon receipt at the RightFax Server.	Per Server	$4,836.27
Integration for eCopy ShareScan OP	Hyland Software, Inc.	ECIPW1	Enables an organization to use a choice of supported eCopy networked scanners or digital copiers to capture document images from eCopy ShareScan OP and route them directly into the OnBase system. Contact eCopy for the most current list of supported devices.	Per device	$967.25
Enterprise Integration for eCopy ShareScan	Hyland Software, Inc.	EEIPI1	Integration for eCopy Site License	Each	$40,302.27
Integration for HP Connect	Hyland Software, Inc.	HPIPW1	Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.	Each, 1-10 Devices	$322.42
Integration for HP Connect	Hyland Software, Inc.	HPIPW2	Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.	Each, 11-50 Devices	$282.12
Integration for HP Connect	Hyland Software, Inc.	HPIPW3	Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.	Each, 51-100 Devices	$241.81
Integration for HP Connect	Hyland Software, Inc.	HPIPW4	Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.	Each, 100+ Devices	$201.51
Integration for HP Connect Enterprice License	Hyland Software, Inc.	HPIPWE	Enables an organization to use a choice of supported HP MFP devices to capture document images and route them directly into the OnBase system. Contact HP for the most current list of supported devices.	Each	$40,302.27
Integration for KYOCERA	Hyland Software, Inc.	KCIPW1	Enables an organization to use a choice of supported KYOCERA MFP devices to capture document images and route them directly into the OnBase system. Contact KYOCERA for the most current list of supported devices.	Per device, 1-10 devices	$322.42
Integration for KYOCERA	Hyland Software, Inc.	KCIPW2	Enables an organization to use a choice of supported KYOCERA MFP devices to capture document images and route them directly into the OnBase system. Contact KYOCERA for the most current list of supported devices.	Per device, 11-50 devices	$241.81
Integration for KYOCERA	Hyland Software, Inc.	KCIPWE	Enables an organization to use a choice of supported KYOCERA MFP devices to capture document images and route them directly into the OnBase system. Contact KYOCERA for the most current list of supported devices.	Unlimited	$20,151.13
Integration for Sharp MFP 1-10 Devices	Hyland Software, Inc.	OSIPW1	Enables an organization to use a choice of supported Sharp MFP devices to capture document images and route them directly into the OnBase system. Contact Sharp for the most current list of supported devices.	Per device	$322.42
Integration for Sharp MFP 11-50 Devices	Hyland Software, Inc.	OSIPW2	Enables an organization to use a choice of supported Sharp MFP devices to capture document images and route them directly into the OnBase system. Contact Sharp for the most current list of supported devices.	Per device	$241.81
Integration for Sharp MFP Unlimited	Hyland Software, Inc.	OSIPW3	Enables an organization to use a choice of supported Sharp MFP devices to capture document images and route them directly into the OnBase system. Contact Sharp for the most current list of supported devices.	Unlimited	$20,151.13
Integration for Canon uniFLOW	Hyland Software, Inc.	CUIPW1	Enables an organization to use a choice of supported Canon uniFLOW MFP devices to capture document images and route them directly into the OnBase system. Contact Canon for the most current list of supported devices.	Per device, 1-10 devices	$322.42
Integration for Canon uniFLOW	Hyland Software, Inc.	CUIPW2	Enables an organization to use a choice of supported Canon uniFLOW MFP devices to capture document images and route them directly into the OnBase system. Contact Canon for the most current list of supported devices.	Per device, 11-50 devices	$241.81
Integration for Canon uniFLOW	Hyland Software, Inc.	CUIPWE	Enables an organization to use a choice of supported Canon uniFLOW MFP devices to capture document images and route them directly into the OnBase system. Contact Canon for the most current list of supported devices.	Unlimited	$20,151.13
Integration for Xerox MFP	Hyland Software, Inc.	XRIPW1	Enables an organization to use a choice of supported Xerox MFP devices to capture document images and route them directly into the OnBase system. Contact your Xerox representative for the most current list of supported devices and additional components required for this solution.	Each	$161.21

Integration for Konica Minolta bizhub Marketplace MFP	Hyland Software, Inc.	KMIPW1	Enables an organization to use a choice of supported Konica Minolta devices to capture document images and route them directly into the OnBase system. Contact Konica Minolta for the most current list of supported devices.	Each	$161.21
Integration for Konica Minolta Dispatcher Phoenix	Hyland Software, Inc.	KDIPW1	Provides the ability to archive documents into OnBase from any networked Dispatcher Phoenix enabled multifunction scan device. Enables a user to assign documents into OnBase Document Types, assign OnBase Keywords and route the documents to the OnBase system.	Each	$604.53
COLD / ERM - Only Multi-User Server	Hyland Software, Inc.	ELIPI1	Provides utilities, OnBase Configuration, Basic Text Search and Print Servers, and a License to use the copyrighted OnBase Database in a single instance, multi-user environment for only COLD (text) documents.	Each	$1,612.09
COLD / ERM - Only Concurrent Client	Hyland Software, Inc.	ELIPC1	Provides retrieval, viewing, printing, and management of COLD documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each	$483.63
COLD / ERM - Only Workstation Client	Hyland Software, Inc.	ELIPW1	Provides retrieval, viewing, printing, and management of documents. The OnBase Web Client cannot use this license.	Each	$241.81
COLD / ERM - Only Named User Client	Hyland Software, Inc.	ELIPN1	Provides retrieval, viewing, printing, and management of documents for a single named user.Both the OnBase Client or OnBase Web Client can use this license.	Each	$241.81
Production Document Imaging Kofax/TWAIN	Hyland Software, Inc.	DIIPW1	Scans (digitizes) paper documents using Kofax or TWAIN compatible devices. Advanced features include distributed capture and indexing, image enhancement, bar code recognition (Kofax), blank page separation and auto-enabled indexing.	For First	$4,030.23
Production Document Imaging Kofax/TWAIN	Hyland Software, Inc.	DIIPW2	Scans (digitizes) paper documents using Kofax or TWAIN compatible devices. Advanced features include distributed capture and indexing, image enhancement, bar code recognition (Kofax), blank page separation and auto-enabled indexing.	For Second and Beyond	$2,418.14
Workflow Concurrent Client SL	Hyland Software, Inc.	WLIPC1	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 1-20	$1,773.30
Workflow Concurrent Client SL	Hyland Software, Inc.	WLIPC2	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 21-50	$1,450.88
Workflow Concurrent Client SL	Hyland Software, Inc.	WLIPC3	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 51-100	$1,289.67
Workflow Concurrent Client SL	Hyland Software, Inc.	WLIPC4	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 101-300	$1,128.46
Workflow Concurrent Client SL	Hyland Software, Inc.	WLIPC5	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 301-1,000	$967.25

Workflow Concurrent Client SL	Hyland Software, Inc.	WLIPC6	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 1,001+	$886.65
Workflow Workstation Client SL	Hyland Software, Inc.	WLIPW1	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 1-20	$1,128.46
Workflow Workstation Client SL	Hyland Software, Inc.	WLIPW2	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 21-50	$886.65
Workflow Workstation Client SL	Hyland Software, Inc.	WLIPW3	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 51-100	$725.44
Workflow Workstation Client SL	Hyland Software, Inc.	WLIPW4	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 101-300	$644.84
Workflow Workstation Client SL	Hyland Software, Inc.	WLIPW5	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 301-1,000	$564.23
Workflow Workstation Client SL	Hyland Software, Inc.	WLIPW6	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 1,001+	$483.63
Workflow Named User Client SL	Hyland Software, Inc.	WLIPN1	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 1-20	$1,128.46
Workflow Named User Client SL	Hyland Software, Inc.	WLIPN2	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 21-50	$886.65
Workflow Named User Client SL	Hyland Software, Inc.	WLIPN3	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 51-100	$725.44

Workflow Named User Client SL	Hyland Software, Inc.	WLIPN4	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 101-300	$644.84
Workflow Named User Client SL	Hyland Software, Inc.	WLIPN5	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 301-1,000	$564.23
Workflow Named User Client SL	Hyland Software, Inc.	WLIPN6	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each, Qty 1,001+	$483.63
Workflow Approval Management	Hyland Software, Inc.	WAIPI1	Allows business users to configure required approvals, create business rules to evaluate documents and assign approvers in the Unity Client for any OnBase Workflow process. Approval hierarchies from existing business systems can also be leveraged to automatically manage approval assignments.	Each	$16,120.91
OnBase Interaction with ShareBase	Hyland Software, Inc.	OSHIPI1	Allows for automating the creation and sharing of documents and folders in ShareBase by leveraging OnBase Workflow. With the interaction license, users can execute configured Workflow tasks in OnBase to add OnBase documents to ShareBase, create or delete ShareBase folders, and create links to ShareBase folders that can be shared with non-ShareBase users.	Each	$4,030.23
WorkView Concurrent Client SL	Hyland Software, Inc.	VLIPC1	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 1-20	$1,209.07
WorkView Concurrent Client SL	Hyland Software, Inc.	VLIPC2	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 21-50	$1,047.86
WorkView Concurrent Client SL	Hyland Software, Inc.	VLIPC3	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 51-100	$967.25
WorkView Concurrent Client SL	Hyland Software, Inc.	VLIPC4	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 101-300	$886.65
WorkView Concurrent Client SL	Hyland Software, Inc.	VLIPC5	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 301-1,000	$806.05
WorkView Concurrent Client SL	Hyland Software, Inc.	VLIPC6	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 1,001+	$725.44
WorkView Workstation Client SL	Hyland Software, Inc.	VLIPW1	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 1-20	$725.44

WorkView Workstation Client SL	Hyland Software, Inc.	VLIPW2	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 21-50	$644.84
WorkView Workstation Client SL	Hyland Software, Inc.	VLIPW3	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 51-100	$564.23
WorkView Workstation Client SL	Hyland Software, Inc.	VLIPW4	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 101-300	$483.63
WorkView Workstation Client SL	Hyland Software, Inc.	VLIPW5	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 301-1,000	$403.02
WorkView Workstation Client SL	Hyland Software, Inc.	VLIPW6	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 1,001+	$322.42
WorkView Named User Client SL	Hyland Software, Inc.	VLIPN1	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 1-20	$725.44
WorkView Named User Client SL	Hyland Software, Inc.	VLIPN2	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 21-50	$644.84
WorkView Named User Client SL	Hyland Software, Inc.	VLIPN3	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 51-100	$564.23
WorkView Named User Client SL	Hyland Software, Inc.	VLIPN4	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 101-300	$483.63
WorkView Named User Client SL	Hyland Software, Inc.	VLIPN5	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 301-1,000	$403.02
WorkView Named User Client SL	Hyland Software, Inc.	VLIPN6	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each, Qty 1,001+	$322.42
Information Management Concurrent Client	Hyland Software, Inc.	IMIPC1	Provides access to OnBase, along with Workflow and WorkView capabilities, allowing users to perform functions related to case management. Includes E-Forms.	Each, Qty 1-20	$3,304.79
Information Management Concurrent Client	Hyland Software, Inc.	IMIPC2	Provides access to OnBase, along with Workflow and WorkView capabilities, allowing users to perform functions related to case management. Includes E-Forms.	Each, Qty 21-50	$2,901.76
Information Management Concurrent Client	Hyland Software, Inc.	IMIPC3	Provides access to OnBase, along with Workflow and WorkView capabilities, allowing users to perform functions related to case management. Includes E-Forms.	Each, Qty 51-100	$2,740.55

Information Management Concurrent Client	Hyland Software, Inc.	IMIPC4	Provides access to OnBase, along with Workflow and WorkView capabilities, allowing users to perform functions related to case management. Includes E-Forms.	Each, Qty 101-300	$2,418.14
Information Management Concurrent Client	Hyland Software, Inc.	IMIPC5	Provides access to OnBase, along with Workflow and WorkView capabilities, allowing users to perform functions related to case management. Includes E-Forms.	Each, Qty 3-1-1,000	$2,095.72
Information Management Concurrent Client	Hyland Software, Inc.	IMIPC6	Provides access to OnBase, along with Workflow and WorkView capabilities, allowing users to perform functions related to case management. Includes E-Forms.	Each, Qty 1,001+	$1,934.51
Workflow/WorkView Concurrent Client SL	Hyland Software, Inc.	WWIPC1	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 1-20	$2,337.53
Workflow/WorkView Concurrent Client SL	Hyland Software, Inc.	WWIPC2	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 21-50	$1,934.51
Workflow/WorkView Concurrent Client SL	Hyland Software, Inc.	WWIPC3	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 51-100	$1,773.30
Workflow/WorkView Concurrent Client SL	Hyland Software, Inc.	WWIPC4	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 101-300	$1,612.09
Workflow/WorkView Concurrent Client SL	Hyland Software, Inc.	WWIPC5	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 301-1,000	$1,450.88
Workflow/WorkView Concurrent Client SL	Hyland Software, Inc.	WWIPC6	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 1,001+	$1,289.67
Workflow/WorkView Workstation Client SL	Hyland Software, Inc.	WWIPW1	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 1-20	$1,450.88
Workflow/WorkView Workstation Client SL	Hyland Software, Inc.	WWIPW2	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 21-50	$1,128.46
Workflow/WorkView Workstation Client SL	Hyland Software, Inc.	WWIPW3	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 51-100	$967.25
Workflow/WorkView Workstation Client SL	Hyland Software, Inc.	WWIPW4	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 101-300	$886.65
Workflow/WorkView Workstation Client SL	Hyland Software, Inc.	WWIPW5	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 301-1,000	$806.05
Workflow/WorkView Workstation Client SL	Hyland Software, Inc.	WWIPW6	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 1,001+	$725.44
Workflow/WorkView Named User Client SL	Hyland Software, Inc.	WWIPN1	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 1-20	$1,450.88
Workflow/WorkView Named User Client SL	Hyland Software, Inc.	WWIPN2	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 21-50	$1,128.46
Workflow/WorkView Named User Client SL	Hyland Software, Inc.	WWIPN3	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 51-100	$967.25
Workflow/WorkView Named User Client SL	Hyland Software, Inc.	WWIPN4	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 101-300	$886.65
Workflow/WorkView Named User Client SL	Hyland Software, Inc.	WWIPN5	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 301-1,000	$806.05
Workflow/WorkView Named User Client SL	Hyland Software, Inc.	WWIPN6	Provides the combined functionality of Workflow and WorkView within a single license. Includes E-Forms.	Each, Qty 1,001+	$725.44
WorkView Integration for Microsoft Outlook 2016	Hyland Software, Inc.	WVIPI1-16	Enables users to view WorkView data related to a selected e-mail within Microsoft Outlook, execute WorkView filters, and full-text search WorkView objects/data (with the Context Search Framework license) in order to gather additional context and information related to a message.	Each	$8,060.45
WorkView Integration for Microsoft Outlook 2013	Hyland Software, Inc.	WVIPI1-13	Enables users to view WorkView data related to a selected e-mail within Microsoft Outlook, execute WorkView filters, and full-text search WorkView objects/data (with the Context Search Framework license) in order to gather additional context and information related to a message.	Each	$8,060.45

Product	Vendor	Code	Description	Unit	Price
WorkView Integration for Microsoft Outlook 2010	Hyland Software, Inc.	WVIPI1	Enables users to view WorkView data related to a selected e-mail within Microsoft Outlook, execute WorkView filters, and full-text search WorkView objects/data (with the Context Search Framework license) in order to gather additional context and information related to a message.	Each	$8,060.45
WorkView Integration for Microsoft Outlook 2007	Hyland Software, Inc.	WOIPI1	Enables users to view WorkView data related to a selected e-mail within Microsoft Outlook, execute WorkView filters, and full-text search WorkView objects/data (with the Context Search Framework license) in order to gather additional context and information related to a message.	Each	$8,060.45
Context Search Framework	Hyland Software, Inc.	CFIPI1	Context Search Framework provides a simple interface that makes it easy to full-text search across the data stored in one or more of your WorkView	Case Manager business applications. Administrators can define search scopes that can include one or more record types (classes) and assign them to specific OnBase user groups. End users can then perform simple to advanced searches on data values to quickly and easily locate relevant data records (objects).	Each	$8,060.45
OnBase Checklists for Process Control	Hyland Software, Inc.	CHIPI1	Provides automatic generation of electronic checklists and assignment of tasks to specific individuals. Allows users to share feedback and flag checklists for review. Provides visibility into checklist status to ensure consistent and timely process completion.	Each	$24,181.36
E-Forms	Hyland Software, Inc.	FMIPI1	Provides the ability to complete, index, and store HTML based documents (forms) from the OnBase Client interface using an HTML form template.	Each	$8,060.45
Integration for FormFast	Hyland Software, Inc.	FFIPI1	Captures and saves data from FormFast directly into OnBase, and allows pre-population of FormFast generated forms with data stored in OnBase.	Each	$8,060.45
Integration for FormFast Enterprise	Hyland Software, Inc.	FFIPI2	Captures and saves data from FormFast directly into OnBase, and allows pre-population of FormFast generated forms with data stored in OnBase.	Each	$28,211.59
Integration for Access Forms	Hyland Software, Inc.	AXIPI1	Captures and saves data from Access Forms directly into OnBase, and allows pre-population of Access Forms generated forms with data stored in OnBase.	Per Department	$8,060.45
Integration for Access Forms Enterprise	Hyland Software, Inc.	AXIPI2	Captures and saves data from Access Forms directly into OnBase, and allows pre-population of Access Forms generated forms with data stored in OnBase.	Each	$28,211.59
Business Rules Engine	Hyland Software, Inc.	BRIPI1	Allows organizations to react quickly to changing business conditions, adjusting their approach to markets or adding new lines of business. The Business Rules Engine is designed to allow managers to create business rules which can contain parameterized values. This allows shift supervisors to adjust threshold values as needed to account for dynamic business environments.	Each	$16,120.91
BPNM Modeler	Hyland Software, Inc.	BNIPI1	Allows technical and/or business analysts to model business processes, end to end, including all interactions with humans, systems and content. Utilizes the Business Process Model and Notation (BPMN) standard. Provides output of process documentation and generates XML according to the Business Process Execution Language (BPEL) stadard, which can be exported and executed by a BPEL Orchestration Engine.	Each	$4,030.23
Workflow Departmental Server	Hyland Software, Inc.	WFIPD1	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts.Allows one department within an organization to create Workflow solutions specific to that department (e.g. an AP department may implement a Requisition process and an AP Review process). If more than one department wishes to use Workflow, they must license additional department licenses or purchase the Workflow Enterprise Server. This license may be applied toward the purchase of Workflow Enterprise Server within one year of the purchase date.	Each	$8,060.45

Workflow Enterprise Server	Hyland Software, Inc.	WFIPI1	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts.Allows any number of Workflow applications to be implemented by any number of departments within the enterprise.	Each	$40,302.27
Workflow Concurrent Client	Hyland Software, Inc.	WFIPC1	Provides access to Workflow functions in order to perform work and complete tasks on documents. License lease begins upon first Workflow activity, ends when user closes or minimizes Workflow.	Each	$967.25
Workflow Workstation Client	Hyland Software, Inc.	WFIPW1	Provides access to Workflow functions in order to perform work and complete tasks on documents.	Each	$483.63
Workflow Named User Client	Hyland Software, Inc.	WFIPN1	Provides access to Workflow functions in order to perform work and complete tasks on documents, for a single named user.	Each	$483.63
WorkView Server	Hyland Software, Inc.	RMIPI1	Provides the ability to create custom applications in OnBase to track issues from start through resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each	$8,060.45
WorkView Concurrent Client	Hyland Software, Inc.	RMIPC1	Provides the ability to create custom applications in OnBase to track issues to resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each	$806.05
WorkView Workstation Client	Hyland Software, Inc.	RMIPW1	Provides the ability to create custom applications in OnBase to track issues to resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each	$403.02
WorkView Named User Client	Hyland Software, Inc.	RMIPN1	Provides the ability to create custom applications in OnBase to track issues to resolution. Supports optional attachment of OnBase documents and user-defined events to issues. Configuration tool allows user to define custom database tables, screens and views.	Each	$403.02
Workflow / WorkView Concurrent Client	Hyland Software, Inc.	WCIPC1	Provides the combined functionality of Workflow and WorkView within a single license. For use with traditional Workflow and WorkView licensing models.	Each	$1,370.28
Workflow / WorkView Workstation Client	Hyland Software, Inc.	WCIPW1	Provides the combined functionality of Workflow and WorkView within a single license. For use with traditional Workflow and WorkView licensing models.	Each	$685.14
Workflow / WorkView Named User Client	Hyland Software, Inc.	WCIPN1	Provides the combined functionality of Workflow and WorkView within a single license. For use with traditional Workflow and WorkView licensing models.	Each	$685.14
PDF Framework	Hyland Software, Inc.	PDFIPI1	Enables PDF features for dependent products as referenced in the OnBase Requirements section for that product.	Each	$2,418.14
Conversion Framework for Aspose	Hyland Software, Inc.	WTIPI1-AS	Enables users who do not have Microsoft Office to view required documents and convert Word documents to non-editable Tiff images or PDF files.	Each	$2,418.14
Full-Page OCR	Hyland Software, Inc.	FPIPW1	Provides server-based conversion of images to text. OCR on the Data Capture Server allows for multi-threaded processing with the licensing of multiple cores. Supports multiple languages, processing of bi-tonal, grayscale and color images, and creation of multiple output formats (ASCII text, Adobe PDF, HTML or Microsoft Word). Enables batch processing and ad-hoc document OCR.	Per Core	$1,209.07
Batch OCR	Hyland Software, Inc.	OCIPW1	Converts images to text in order to facilitate text searching and/or full text indexing. Supports multiple languages, processing of bi-tonal, grayscale and color images, and creation of multiple output formats (ASCII text, Adobe PDF, HTML or Microsoft Word). Enables batch processing and also ad-hoc document OCR from a select list.	Each	$1,209.07
Asian Language OCR	Hyland Software, Inc.	ALOIPW1	Provides the ability to OCR Asian language material.	Per Workstation	$806.05

Ad-hoc Document OCR	Hyland Software, Inc.	AOIPW1	Converts images to text in order to facilitate text searching and/or full-text indexing. Permits OCR of an individual document or group of documents from an OnBase select list.	Each	$403.02
ICR Support for OCR and Advanced Capture	Hyland Software, Inc.	IRIPI1	Enables the recognition/extraction of handwritten numerals, text and punctuation characters in conjunction with the Batch OCR or Automated Indexing products.	Each	$4,030.23
ACH Generator	Hyland Software, Inc.	AHIPW1	Creates an Automated Clearing House (ACH) file that conforms to the NACHA format for Electronic Funds Transfer (EFT). Also, includes a pre-note test file feature and a check consolidation feature that combines multiple payments into a single transaction.	Each	$16,120.91
OMR Marks Generator	Hyland Software, Inc.	OMIPI1	Custom DLL to generate OMR marks for automatic mail stuffing machinery to be used with the OnBase Image Statements module.	Each	$2,418.14
Integration for DocuSign eSignature	Hyland Software, Inc.	DXIPI1	Allows OnBase users to upload documents directly to DocuSign, to be securely sent to recipients and signed electronically from any device. Email notifications alert recipients of documents requiring their signatures. Once completed, signed documents are imported back into OnBase to be stored.	Each	$12,090.68
Signature Pad Interface (TWAIN)	Hyland Software, Inc.	PWIPI1	Allows the real-time signing of TIFF images and OnBase E-Forms within the OnBase Client. The original image is altered with the signature that is scratched on a Topaz signature pad device.	Each	$4,836.27
Digital Signatures	Hyland Software, Inc.	DGIPN1	Allows users to digitally approve documents within the OnBase system via certificate-based signing. Also, allows signed documents to be routed in Workflow based on the presence or absence of signatures.	Each	$161.21
Digital Signing Server	Hyland Software, Inc.	DCIPW1	Allows server-based digital approval of documents within OnBase via a single certificate-based signature.	Each	$20,151.13
EDM Services	Hyland Software, Inc.	DMIPI1	Provides the ability to store and manage revisions of documents generated by Microsoft Office and other file formats. Includes multiple file import, revision control, version control, document commenting, checkin/checkout, automatic upload and synchronization of revisions, document templates, and the Briefcase.	Each	$4,030.23
Image Form Composition	Hyland Software, Inc.	IFIPI1	Provides the ability to transpose captured data from a Unity Form to an image rendition of a highly structured or regulated paper form, improving the process of filling out such forms by making them electronic, while preserving the original appearance of the paper form.	Each	$12,090.68
Document Composition	Hyland Software, Inc.	ADIPI1	Allows for Ad-hoc creation of form letters using Microsoft Word templates. The content of the created document is a combination of merged data form templates, E-Forms, Workflow properties, web services, database queries and nested sub-templates.	Each	$16,120.91
Enterprise Document Composition	Hyland Software, Inc.	BDIPI1	Allows for Batch and Ad-Hoc creation of form letters using Microsoft Word templates. The content of the created document is a combination of merged data form templates, E-Forms, Workflow properties, web services, database queries and nested sub-templates.	Each	$40,302.27
Statement Composition	Hyland Software, Inc.	SCIPW1	Provides customers the ability to create better looking, more functional and customer data-specific statements. Through a point-and-click, menu-driven configuration, the user defines what data to include, the data layout and formatting options, and graphical elements-logos, pictures, charts and messaging.	Each	$8,060.45
Image Statements	Hyland Software, Inc.	ISIPI1	Prints primary documents (usually statements) with supporting documents in a batch process or on an ad hoc basis. The number of statements processed in a month determines the required licensing. Sold in blocks of 1,000.Example: Customer purchases 15,000 statements. The first 10,000 statements are purchased from tier 1. The next 5,000 statements are purchased at tier 2. Future licenses purchased by Customer begin at the tier where their last purchase was made.	Per Block, 1-10,000 per month	$1,209.07

Image Statements	Hyland Software, Inc.	ISIPI2	Prints primary documents (usually statements) with supporting documents in a batch process or on an ad hoc basis. The number of statements processed in a month determines the required licensing. Sold in blocks of 1,000.Example: Customer purchases 15,000 statements. The first 10,000 statements are purchased from tier 1. The next 5,000 statements are purchased at tier 2. Future licenses purchased by Customer begin at the tier where their last purchase was made.	Per Block, 10,001-50,000 per month	$806.05
Image Statements	Hyland Software, Inc.	ISIPI3	Prints primary documents (usually statements) with supporting documents in a batch process or on an ad hoc basis. The number of statements processed in a month determines the required licensing. Sold in blocks of 1,000.Example: Customer purchases 15,000 statements. The first 10,000 statements are purchased from tier 1. The next 5,000 statements are purchased at tier 2. Future licenses purchased by Customer begin at the tier where their last purchase was made.	50,001 + statements per month.	$403.02
Print Distribution	Hyland Software, Inc.	PDIPW1	Provides scheduled print back services for remote locations.	Each	$2,418.14
Document Distribution	Hyland Software, Inc.	DDIPI1	Automatically delivers previously rendered Image Statements electronically to designated recipients via fax, e-mail, CD or web presentment.Sold in blocks of 250 with a minimum initial purchase of 4 blocks (1,000).To determine price:Recipients x Fee = Price Note: Price is not a monthly fee or annual fee. The formula determines the perpetual cost of the license.	Per recipient. Sold in blocks of 250. Minimum initial purchase of 4 blocks (1,000). Enter values of 1,000; 1,250; 1,500; etc.	$806.05
Collaboration	Hyland Software, Inc.	COIPI1	Provides a common workspace for users and teams to share documents and WorkView objects, and allows for threaded discussions around that information. Synchronous collaboration is provided through integration with Citrix GoTo Meeting.	Each	$8,060.45
Physical Records Management	Hyland Software, Inc.	PRIPI1	Enables organizations to manage the tracking, locating and access of physical records using OnBase as the single interface.	Each	$12,090.68
Document Knowledge Transfer & Compliance	Hyland Software, Inc.	DKTIPI1	Provides the ability for organizations to distribute required reading documents to the workforce and assess employee comprehension for compliance and regulatory purposes.	Each	$12,896.73
Enterprise Web Access for Document Knowledge Transfer & Compliance	Hyland Software, Inc.	DKTIPI2	Provides web-based viewing of required reading documents via the Document Knowledge Transfer & Compliance interface only. Standard Client functionality is restricted. This license does not consume additional Concurrent Clients.	Each	$16,120.91
Document Tracking	Hyland Software, Inc.	LDIPW1	Enables the storage and tracking of documentation to ensure compliance with Government requirements for Application Processing.	Per Workstation, 1-10	$1,612.09
Document Tracking	Hyland Software, Inc.	LDIPW2	Enables the storage and tracking of documentation to ensure compliance with Government requirements for Application Processing.	Per Workstation, 11-25	$1,289.67
Document Tracking	Hyland Software, Inc.	LDIPW3	Enables the storage and tracking of documentation to ensure compliance with Government requirements for Application Processing.	Per Workstation, 26-50	$1,128.46
Document Tracking	Hyland Software, Inc.	LDIPW4	Enables the storage and tracking of documentation to ensure compliance with Government requirements for Application Processing.	Per Workstation, 51-100	$967.25
Document Tracking	Hyland Software, Inc.	LDIPW5	Enables the storage and tracking of documentation to ensure compliance with Government requirements for Application Processing.	Per Workstation, 100+	$806.05
Full-Text Indexing Server for Autonomy IDOL	Hyland Software, Inc.	IDIPI1	Provides integration with Autonomy IDOL to provide advanced Full-Text searches for words or phrases that exist within documents stored in OnBase. These words or phrases can exist in COLD documents, text renditions of image documents (OCRed images), and many 3rd party application documents. Can perform fuzzy searches, wildcard searches, stemming searches, thesaurus searches, and searches combining full-text and keywords on document types.	Each	$8,060.45

Full-Text Indexing Concurrent Client for Autonomy IDOL	Hyland Software, Inc.	IDIPC1	Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.	Each	$241.81
Full-Text Indexing Workstation Client for Autonomy IDOL	Hyland Software, Inc.	IDIPW1	Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.	Each	$120.91
Full-Text Indexing Named User Client for Autonomy IDOL	Hyland Software, Inc.	IDIPN1	Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others. Valid for a single named user logged into one workstation at a time.	Each	$120.91
Integration for Microsoft InfoPath	Hyland Software, Inc.	MIIPI1	Allows customers to create Microsoft InfoPath forms which automatically store themselves, fully indexed, into the repository for later retrieval and/or routing through Workflow, if applicable.	Each	$8,060.45
Integration for Microsoft Search	Hyland Software, Inc.	PHIPI1	Allows users to search and retrieve OnBase content, along with other enterprise sites and repositories, when using SharePoint or other Microsoft Search-enabled applications.	Each	$4,030.23
CAD Services	Hyland Software, Inc.	CSIPI1	Provides a central repository for compound documents. Enables CAD compound document activities and functions. Features include import, and enhanced foldering.Necessary for Autodesk AutoCAD or other 3rd party CAD integrations.	Each	$4,030.23
CAD Services Concurrent - View Only	Hyland Software, Inc.	CVIPC1	Provides the ability to utilize Spicer supported CAD file formats (excluding 3D) for viewing.	Each	$241.81
CAD Services Workstation -View Only	Hyland Software, Inc.	CVIPW1	Provides the ability to utilize Spicer supported CAD file formats (excluding 3D) for viewing.	Each	$120.91
CAD Document Viewer Concurrent Client	Hyland Software, Inc.	CADIPC1	Provides a central repository for compound documents. Enables CAD compound document activities and functions. Features include import, and enhanced foldering. Necessary for Autodesk AutoCAD or other 3rd party CAD integrations. The purchase of CAD Services will make available the CADDocumentViewer User Group on the Hyland Software Delivery site. The User Group contains the appropriate CAD Document Viewer supplemental file for download, necessary for the rendering of PDFs in the CAD Document Viewer Concurrent Client.	Each	$806.05
CAD Services Concurrent - View/Markup	Hyland Software, Inc.	CMIPC1	Provides the ability to utilize Spicer supported CAD file formats (excluding 3D) for viewing and markup.	Each	$483.63
CAD Services Workstation - View/Markup	Hyland Software, Inc.	CMIPW1	Provides the ability to utilize Spicer supported CAD file formats (excluding 3D) for viewing and markup.	Each	$241.81
Application Enabler	Hyland Software, Inc.	AEIPI1	Provides image enabling to third-party software applications that are GUI, browser, or text-based.Due to the variety of applications, Solution Providers must verify that an application can be enabled prior to selling this module. As part of the verification, Solution Providers are also required to complete a pre-qualification form located on www.teamonbase.com. Please make no assumptions. If verification is unsuccessful, Hyland can be contacted for assistance.	Per enabled application	$16,120.91

Enterprise Application Enabler	Hyland Software, Inc.	AEIPI2	Provides image enabling to third-party software applications that are GUI, browser, or text-based.Provides any number of applications to be image-enabled within the enterprise.Due to the variety of applications, Solution Providers must verify that an application can be enabled prior to selling this module. As part of the verification, Solution Providers are also required to complete a pre-qualification form located on www.teamonbase.com. Please make no assumptions. If verification is unsuccessful, Hyland can be contacted for assistance.	For all enabled applications	$40,302.27
Host Enabler Concurrent Client	Hyland Software, Inc.	HEIPC1	Provides image enabling for host applications.	Each	$241.81
Host Enabler Workstation Client	Hyland Software, Inc.	HEIPW1	Provides image enabling for host applications.	Each	$120.91
Office Business Application for 2016	Hyland Software, Inc.	OIIPW1-16	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$40.30
Office Business Application for 2016	Hyland Software, Inc.	OIIPW2-16	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$32.24
Office Business Application for 2016	Hyland Software, Inc.	OIIPW3-16	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$24.18
Office Business Application for 2016	Hyland Software, Inc.	OIIPW4-16	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 401+	$12,090.68
Office Business Application for 2016 (Concurrent)	Hyland Software, Inc.	OIIPC1-16	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$80.60
Office Business Application for 2016 (Concurrent)	Hyland Software, Inc.	OIIPC2-16	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$64.48
Office Business Application for 2016 (Concurrent)	Hyland Software, Inc.	OIIPC3-16	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$48.36
Office Business Application for 2013	Hyland Software, Inc.	OIIPW1-13	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$40.30
Office Business Application for 2013	Hyland Software, Inc.	OIIPW2-13	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$32.24
Office Business Application for 2013	Hyland Software, Inc.	OIIPW3-13	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$24.18

Office Business Application for 2013	Hyland Software, Inc.	OIIPW4-13	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 401+	$12,090.68
Office Business Application for 2013 (Concurrent)	Hyland Software, Inc.	OIIPC1-13	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$80.60
Office Business Application for 2013 (Concurrent)	Hyland Software, Inc.	OIIPC2-13	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$64.48
Office Business Application for 2013 (Concurrent)	Hyland Software, Inc.	OIIPC3-13	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$48.36
Office Business Application for 2010	Hyland Software, Inc.	OIIPW1-10	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$40.30
Office Business Application for 2010	Hyland Software, Inc.	OIIPW2-10	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$32.24
Office Business Application for 2010	Hyland Software, Inc.	OIIPW3-10	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$24.18
Office Business Application for 2010	Hyland Software, Inc.	OIIPW4-10	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 401+	$12,090.68
Office Business Application for 2010 (Concurrent)	Hyland Software, Inc.	OIIPC1-10	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$80.60
Office Business Application for 2010 (Concurrent)	Hyland Software, Inc.	OIIPC2-10	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$64.48
Office Business Application for 2010 (Concurrent)	Hyland Software, Inc.	OIIPC3-10	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$48.36

Office Business Application for 2007	Hyland Software, Inc.	OIIPW1-07	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$40.30
Office Business Application for 2007	Hyland Software, Inc.	OIIPW2-07	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$32.24
Office Business Application for 2007	Hyland Software, Inc.	OIIPW3-07	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$24.18
Office Business Application for 2007	Hyland Software, Inc.	OIIPW4-07	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 401+	$12,090.68
Office Business Application for 2007 (Concurrent)	Hyland Software, Inc.	OIIPC1-07	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 1-100	$80.60
Office Business Application for 2007 (Concurrent)	Hyland Software, Inc.	OIIPC2-07	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 101-200	$64.48
Office Business Application for 2007 (Concurrent)	Hyland Software, Inc.	OIIPC3-07	Intended for users in a Citrix or Terminal Services environment. Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each, Qty 201-400	$48.36
Web Services Publishing	Hyland Software, Inc.	WSPIPI1	Allows for point and click creation of standard web services tailored for an organization's OnBase solution, providing a Web API for use by external users or third party applications. In addition to this license, which allows users to publish web services, Web Services Publishing requires a $0.10 fee Per Executed Web Service Call. A built-in reporting mechanism will relay monthly usage data to Hyland for translation into a monthly billing amount.	Each	$4,030.23
Web Services Publishing Executed Web Services Call	Hyland Software, Inc.	WSPIPI1-C	Web Services Publishing requires a $0.10 fee Per Executed Web Service Call. A built-in reporting mechanism will relay monthly usage data to Hyland for translation into a monthly billing amount for the sum of all Executed Web Service Calls within the given month.	Per Executed Web Service Call	$0.08

Unity Integration Toolkit	Hyland Software, Inc.	UIIPI1	Provides an object-oriented API that exposes key OnBase functionality. Unity contains functionality to query, store, retrieve and modify documents and metadata as well as other document-centric features such as notes. The Unity Integration Toolkit is only for integration to OnBase from external applications or custom applications that exist outside of OnBase Automation. A separate OnBase Automation license is required for automation integrations.In addition to the Unity Integration Toolkit, a Unity Automation license is granted to any customer or partner that has at least one person with a current OnBase API Certification. The Unity Automation allows access to Unity through OnBase Automation configured through the OnBase Configuration module. OnBase Automation is any extension to OnBase configured through OnBase Configuration such as Workflow or WorkView scripting, but includes any automation code configured through the Configuration module.	Each	$8,060.45
Query API (Thick Client)	Hyland Software, Inc.	APIPQ1	Provides the ability to query for documents within the OnBase repository from third party applications.Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client Licensing.If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.	For initial 500 queries per hour.	$8,060.45
Query API (Thick Client)	Hyland Software, Inc.	APIPQ2	Provides the ability to query for documents within the OnBase repository from third party applications.Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client Licensing.If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.	For additional blocks of 500 queries per hour.	$6,448.36
Query API (Core)	Hyland Software, Inc.	APIPQ3	Provides the ability to query for documents within the OnBase repository from third party applications.Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client Licensing.If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.	For initial 500 queries per hour.	$8,060.45
Query API (Core)	Hyland Software, Inc.	APIPQ4	Provides the ability to query for documents within the OnBase repository from third party applications.Note: This is NOT Web Server Client licensing. Query API is only for External User Access. Access for Internal Users should be granted through the purchase of standard client Licensing.If you purchase the initial tier of either OnBase Client or OnBase Core you enjoy the second tier of either on any additional purchase.	For additional blocks of 500 queries per hour.	$6,448.36
Archival API	Hyland Software, Inc.	ARIPI1	Provides the ability to archive documents from third party systems into the OnBase system.	Each	$4,030.23
Integration for Trinisys	Hyland Software, Inc.	ITIPI1	Allows for the archiving of data and documents in to the OnBase system through the Trinisys platform.	Each	$4,030.23
Reverse API	Hyland Software, Inc.	RVIPI1	Provides the ability for OnBase to retrieve information or documents from third party applications.	Per Application	$8,060.45
Connector for Use with SAP ArchiveLink	Hyland Software, Inc.	SAIPI1	The HTTP Content Server interface allows an SAP system to perform content management functions against the OnBase system. Using this interface, SAP systems may use OnBase as its repository for storage and retrieval of archived documents.This base component is required in order to use: Bar Code Import for use with SAP ArchiveLink, Print List and Data Archive for use with SAP ArchiveLink, Business Indexing Connector for use with SAP ArchiveLink, Imaging iViews for use with SAP ArchiveLink.	Each	$24,181.36

Bar Code Import for use with SAP ArchiveLink	Hyland Software, Inc.	SBIPI1	The Bar Code component of SAP ArchiveLink allows an OnBase scanning application to register scanned documents with SAP software for later storage linking of inbound documents via barcode.'	Each	$8,060.45
Print List and Data Archive for use with SAP ArchiveLink	Hyland Software, Inc.	SDIPI1	Uses SAP ArchiveLink to import SAP ArchiveLink print lists, data archive files and imaging documents. Archiving data contained in the SAP system will reduce the storage requirements of the SAP system, improve response times and reduce the time to backup, recover and upgrade the SAP system.	Each	$8,060.45
Business Indexing Connector for use with SAP ArchiveLink	Hyland Software, Inc.	SIIPI1	Used to automatically index OnBase documents in OnBase that have been related to business objects in a SAP system. This makes it possible to use OnBase to search for the documents related to any business object in a SAP system. This module also keeps the keywords on documents in OnBase synchronized with the SAP system.	Each	$12,090.68
Imaging iViews for use with SAP ArchiveLink	Hyland Software, Inc.	IVIPI1	Used to extend SAP ArchiveLink functionality to applications that are powered by SAP NetWeaver Portal. Functionality includes the ability to insert an iView into an SAP NetWeaver Portal application to attach or retrieve documents linked with the Connector for use with SAP ArchiveLink.	Each	$8,060.45
Integration for SAP Exchange Infrastructure XI	Hyland Software, Inc.	XIIPI1	Provides support for the Onbase Integration for SAP ArchiveLink and associated products through the SAP Exchange Infrastructure.	Each	$4,030.23
Web Parts for Microsoft SharePoint	Hyland Software, Inc.	SPIPI1	Enables Microsoft SharePoint users to configure, view, and interact with all available StatusView objects from within a SharePoint web page.	Each	$4,030.23
Content Connector for Microsoft SharePoint	Hyland Software, Inc.	SLIPI1	Enables the automatic linking of documents, batch processed into OnBase, to related items and records managed in SharePoint. Based upon rules defined by a SharePoint site owner, relevant OnBase content is made accessible as item list attachments and document library items.	Each	$2,418.14
Ad-Hoc Scanning User for Microsoft SharePoint	Hyland Software, Inc.	SSIPN1	Enables a user to utilize the Ad-Hoc Scanning Server for Microsoft SharePoint.	Each	$40.30
Site Provisioning for Microsoft SharePoint	Hyland Software, Inc.	PMIPI1	Allows users to submit a request to provision a new SharePoint site. Additionally allows the association of custom workflows with the new site requests, asking for approval prior to site creation and the use of custom site profiles to add pre-configured OnBase and SharePoint integration points.	Each	$4,030.23
Integration for ESRI ArcGIS Server	Hyland Software, Inc.	EGIPI1	Allows users of ArcGIS Server based web applications to link OnBase documents to features on web based maps. The integration provides a set of easy-to-use web links in the map application for query, point-and-click retrieval and archiving of OnBase documents related to map features. The integration is based on ESRI's ArcGIS Server task framework and allows GIS administrators to easily imbed the OnBase web links into new or existing .Net based ArcGIS Server applications.	Each	$8,060.45
Integration for ESRI ArcGIS Desktop	Hyland Software, Inc.	AGIPI1	Allows ESRI ArcInfo, ArcEditor and ArcView users the ability to link OnBase documents to features on maps. The integration provides an easy-to-use toolbar in the ArcGIS Desktop environment for query, point-and-click retrieval and archiving of OnBase documents related to map features.	Each	$5,642.32
Conversion Tool for IXOS	Hyland Software, Inc.	IXIPI1	Utilized to migrate data from the IXOS repository to OnBase. The tool reads the IXOS repository and creates the necessary Document Import Processor index files to process the data into OnBase.	No Maintenance	$8,060.45
Conversion Tool for Ricoh eCabinet	Hyland Software, Inc.	RCIPI1	Utilized to migrate data from the Ricoh eCabinet repository to OnBase. The tool reads the Ricoh eCabinet repository and creates the necessary Import Processor index files to process the data into OnBase.	No Maintenance	$4,030.23
Reporting Dashboards	Hyland Software, Inc.	RHIPI1	Graphically displays data returned from a configured data provider, allowing users to quickly identify relevant information and trends surrounding the data managed by the data provider. Available dashboard items include basic pie, chart and bar graphs, or more advanced displays such as gauges, pivot tables and maps.	Each	$8,060.45

Name	Vendor	Code	Description	Unit	Price
Report Services	Hyland Software, Inc.	RPIPI1	Provides the ability to closely monitor critical performance aspects of an OnBase implementation. Designed to be customizable to allow nearly any element within the OnBase system to be audited for business and IT statistics.	Each	$4,030.23
Exception Reports	Hyland Software, Inc.	ERIPI1	Creates reports that can identify missing or aged documents.	Each	$3,224.18
Report Mining	Hyland Software, Inc.	RXIPI1	Provides the ability to extract historic trend data already in OnBase as well as current trend data for analysis and reporting.	Each	$12,090.68
Report Mining Integration for Datawatch Modeler	Hyland Software, Inc.	MNIPI1	Allows for the easy extraction and analysis of data that is contained within COLD/ERM and PDF reports stored in OnBase. Business intelligence contained within existing reports can be tapped without IT involvement or re-keying data. Report extract formats include Microsoft Excel, among others.	Each	$4,030.23
Report Mining Integration for Datawatch Server	Hyland Software, Inc.	MNIPI2	Allows for the easy extraction and analysis of data that is contained within COLD / ERM (text) reports stored in OnBase. Integrated with Datawatch software, the business intelligence contained within existing reports can be tapped without IT involvement or re-keying of the data. Report extract formats include Excel, PDF, and text.	Each	$4,030.23
Business Activity Monitoring	Hyland Software, Inc.	BAIPI1	Provide real-time snapshots of Workflow processes. Available through the StatusView interface of the OnBase Web Server or a SharePoint Web site, these portlets are configurable by business users who have the appropriate rights.	Each	$8,060.45
Document Retention	Hyland Software, Inc.	DRIPI1	Manages the retention and disposition of stored documents according to pre-defined business rules, involving the passage of time, allowing for automatic destruction and/or removal from the OnBase document repository.	Each	$8,060.45
Records Management	Hyland Software, Inc.	RIIPI1	Manages the retention, disposition, and destruction of managed record folders according to an organization's business rules, based on the occurrence of an event in accordance with external regulations or compliance laws.This includes Document Retention (DRIPI1).	Each	$16,120.91
Document Transfer	Hyland Software, Inc.	DTIPI1	Facilitates the movement of documents between multiple OnBase systems, allowing users to interact with information across distributed organizational structures and geographies.	Per Site	$5,642.32
Distributed Disk Services	Hyland Software, Inc.	DSIPI1	Regulates public access to a server through middleware software that acts as a proxy for accessing Disk Groups. Because communications with the OnBase Client are handled through TCP/IP, administrators are not required to use Windows Shares or UNC paths for Disk Group access.	Each	$4,030.23
Storage Integration for EMC Centera	Hyland Software, Inc.	CTIPI1	Provides the ability to configure secondary OnBase Disk Group copies to store files to the Centera platform as an alternative to standard UNC paths.	Each	$16,120.91
Storage Integration for IBM Tivoli	Hyland Software, Inc.	TVIPI1	Provides the ability to configure secondary OnBase Disk Group copies to store files to the Tivoli platform (using standard file servers or the TotalStorage DR550 hardware) as an alternative to standard UNC paths.	Each	$16,120.91
Integration for KOMpliance	Hyland Software, Inc.	KOIPI1	Provides the ability to configure secondary OnBase Disk Group copies to store files to the KOMpliance platform as an alternative to standard UNC paths.	Each	$3,224.18
CD Authoring	Hyland Software, Inc.	CDIPW1	Provides the ability to utilize CD-R storage for data backups or document exporting/publishing.	Each	$806.05
DVD Authoring	Hyland Software, Inc.	DVIPW1	Provides the ability to utilize DVD storage for data backups or document exporting/publishing.	Each	$1,612.09
Blu-ray Authoring	Hyland Software, Inc.	BAIPW1	Provides the ability to utilize Blu-ray storage for data backups or document exporting/publishing.	Each	$3,224.18
Automated CD Authoring	Hyland Software, Inc.	AAIPW1	Provides the ability to automatically create backup CD-Rs from OnBase using the Rimage system.	Each	$4,030.23
Automated DVD Authoring	Hyland Software, Inc.	AVIPW1	Provides the ability to automatically create backup DVDs or from OnBase using the Rimage system.	Each	$6,448.36
Publishing	Hyland Software, Inc.	PBIAI1	Allows an end user to distribute OnBase runtime units in order to retrieve exported OnBase documents, creating a self-contained OnBase system for distribution. This is a renewable annual license.	Per year	$1,612.09

Aggregate Publishing	Hyland Software, Inc.	PBIPI1	Allows customers receiving published CDs/DVDs to have a database that contains index/pointer information for multiple published CDs/DVDs. When they receive a new published CD/DVD, they will update the aggregate database with the new index/pointer information.In order to properly license the above scenarios, the company that produces the published CD/DVD will have to acquire an Aggregate Publishing license for each customer that takes advantage of this functionality.	Per entity receiving CDs/DVDs	$806.05
Automated CD / DVD Publishing	Hyland Software, Inc.	ADIPC1	Extends Export/Publishing to a "lights-out" operation. Instead of having people dedicated to launching Export or Publishing jobs directly through the Client, they can now define the jobs in advance and have the OnBase system produce CD-R or DVD output for them at pre-determined intervals throughout the year.If you are publishing information for 500 institutions, you would buy 1 of the first tier and 4 of the second tier. The number of CD/DVDs created per year for an institution is not relevant. (For example, twelve monthly CDs or DVDs sent to an institution, each containing the same set of document types, would equate to a single license).	1-100 CD/DVD Publishing Orders. Enter 1 for first block.	$4,030.23
Automated CD / DVD Publishing	Hyland Software, Inc.	ADIPC2	Extends Export/Publishing to a "lights-out" operation. Instead of having people dedicated to launching Export or Publishing jobs directly through the Client, they can now define the jobs in advance and have the OnBase system produce CD-R or DVD output for them at pre-determined intervals throughout the year.If you are publishing information for 500 institutions, you would buy 1 of the first tier and 4 of the second tier. The number of CD/DVDs created per year for an institution is not relevant. (For example, twelve monthly CDs or DVDs sent to an institution, each containing the same set of document types, would equate to a single license).	Additional blocks of 100 Publishing Orders. Enter 1, 2, etc. for additional blocks.	$3,224.18
Encrypted CD / DVD Publishing	Hyland Software, Inc.	EPIPI1	Allows users to produce a CD/DVD with encrypted contents. This eliminates the ability for someone to casually browse the document files or database that comes on the media.	Each	$4,030.23
Export	Hyland Software, Inc.	EXIPC1	Exports documents and their respective indexes out of an OnBase system. These documents and indexes can be imported into another OnBase system or used in conjunction with the OnBase Publishing module.	Each	$4,030.23
Encrypted Alpha Keywords	Hyland Software, Inc.	AKIPI1	Enables storage of sensitive alpha-numeric keywords in an encrypted format.	Each	$8,060.45
Encrypted Disk Groups	Hyland Software, Inc.	EHIPI1	Enables organizations to encrypt documents as they are imported into OnBase and stored on a file server. If viewed outside of OnBase, documents will be unreadable.	Each	$8,060.45
Single SignOn for Microsoft Active Directory Service	Hyland Software, Inc.	SNIPI1	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$0.00
Single SignOn for CA eTrust SiteMinder	Hyland Software, Inc.	SNIPI2	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$16,120.91
Single SignOn for IBM Tivoli Access Mgr	Hyland Software, Inc.	SNIPI3	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$20,151.13
Single SignOn for PeopleSoft Enterprise	Hyland Software, Inc.	SNIPI8	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$4,030.23
Single SignOn for Onbase Entrust	Hyland Software, Inc.	SNIPI12	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$12,090.68
Single SignOn for RSA Access Manager	Hyland Software, Inc.	SNIPI13	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$24,181.36

Single SignOn for SAML	Hyland Software, Inc.	SNIPI14	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$8,060.45
Single SignOn for Microsoft Active Directroy Federation Services	Hyland Software, Inc.	SNIPI15	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Price is an annual maintenance payment.	$1,612.09
Single Sign-On for Central Authentication Services (CAS)	Hyland Software, Inc.	SNIPI16	Allows OnBase to be configured to use authentication credentials from selected single sign-on service vendors. Single sign-on services centralize authentication and authorization across multiple applications.	Each	$8,060.45
Ad-Hoc IRD Printing	Hyland Software, Inc.	PTIPI1	Allows a Client workstation to generate a true substitute check ("replacement in lieu of" IRD) with data captured by the Check Import and Image Cash Letter Import processes. Authorized users have the option to print either a standard substitute check or a return substitute check with additional fields for document the return and other information.	Each	$4,030.23
Image Cash Letter Generator (X9.37)	Hyland Software, Inc.	P9IPW1	Enables financial institutions to generate both forward and return electronic image cash letters in the DSTU X9.37-2003 file format from check image documents stored in OnBase. One file is created for each pocket of the transport where the items were captured, allowing synchronization with the sorter sort pattern.	Each	$8,060.45
Image Cash Letter Generator (X9.100)	Hyland Software, Inc.	P9IPW1-9100	Enables financial institutions to generate both forward and return electronic image cash letters in the DSTU X9.100-187 file format from check image documents stored in OnBase. One file is created for each pocket of the transport where the items were captured, allowing synchronization with the sorter sort pattern	Each	$8,060.45
Posting File Generator	Hyland Software, Inc.	PFIPW1	Enables financial institutions to import an electronic image cash letter in DSTU X9.37-2003 file format and create a posting file for the core banking application to post the transactions.	Each	$4,030.23
NSF File Processor	Hyland Software, Inc.	RGIPW1	Enables financial institutions to import a return file generated from a core business application. Items included in the file will be pulled from OnBase and will be available for the Image Cash Letter Generator to create a Return X9.37 file in the DSTU X9.37-2003 format consisting of check data and images that are to be returned to the Federal Reserve or a partner institution.	Each	$4,030.23
Branch Capture	Hyland Software, Inc.	BRIPW1	Allows financial institution branches to remotely capture and balance check images and upload them to the central OnBase system.	Per Branch, 1-5 Branches	$2,418.14
Branch Capture	Hyland Software, Inc.	BRIPW2	Allows financial institution branches to remotely capture and balance check images and upload them to the central OnBase system.	Per Branch, 6+ Branches	$1,209.07
eMortgage Delivery for Chase	Hyland Software, Inc.	EGIPW1	Provides lenders with the ability to send digitized loan documents and index information from OnBase to Chase in Chase's preferred image transfer format.	Each	$4,030.23
Signature / ID Client	Hyland Software, Inc.	FNIPW1	Offers a simple Visual Basic application limited to the retrieval and display of Signature Cards and Photo ID's for use by financial institution teller workstations.	Each	$161.21
Integration for A2IA CAR/LAR	Hyland Software, Inc.	CRIPW1	Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamling the balancing process prior to the images being imported into OnBase.Sold in Blocks of 100,000 checks processed annually.	1-10 Blocks	$1,289.67
Integration for A2IA CAR/LAR	Hyland Software, Inc.	CRIPW2	Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamling the balancing process prior to the images being imported into OnBase.Sold in Blocks of 100,000 checks processed annually.	11-25 Blocks	$1,128.46

Integration for A2IA CAR/LAR	Hyland Software, Inc.	CRIPW3	Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamling the balancing process prior to the images being imported into OnBase.Sold in Blocks of 100,000 checks processed annually.	26-50 Blocks	$967.25
Integration for A2IA CAR/LAR	Hyland Software, Inc.	CRIPW4	Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamling the balancing process prior to the images being imported into OnBase.Sold in Blocks of 100,000 checks processed annually.	51-75 Blocks	$806.05
Integration for A2IA CAR/LAR	Hyland Software, Inc.	CRIPW5	Enables the OnBase Check 21 solution to read the courtesy amount and legal amount from the check image, streamling the balancing process prior to the images being imported into OnBase.Sold in Blocks of 100,000 checks processed annually.	76+ Blocks	$644.84
Integration for Mitek Validify	Hyland Software, Inc.	VYIPI1	Provides integration to Mitek Validify for statistical analysis/heuristics on signature cards.	Each	$1,612.09
Integration for Goldleaf	Hyland Software, Inc.	GDIPW1	Archives and indexes items into OnBase that were captured by the merchant capture Goldleaf solution.	Each	$4,030.23
Integration with Q2 Software	Hyland Software, Inc.	Q2IPI2	Allows the Q2 home banking product to query for OnBase documents and retrieve them for display to credit union customers.	Each	$8,060.45
Integration for Teres Solutions SAIL	Hyland Software, Inc.	TEIPI1	Provides the ability to archive and retrieve documents to and from OnBase from within Teres' SAIL loan origination application.	Each	$8,060.45
Integration for Misys FusionBanking Credit Management Enterprise	Hyland Software, Inc.	CLIPI1	Allows a Misys FusionBanking Credit Management Enterprise user to interact with an OnBase system through the familiar FusionBanking Credit Management Enterprise client. Provides a user the ability to upload documents directly into OnBase and retrieve documents from the interface.	Each	$8,060.45
Local Government Licensing Bundle	Hyland Software, Inc.	GV-B-LOCAL	Provides limited ECM functionality to Local Government with populations of less than 250,000.Modules comprising the bundle include: Multi-User Server (1), Unity Client Server (1), EDM Services (1), Application Enabler (single application) (1), Full-Text Indexing Server for Autonomy IDOL (1) and Virtual Print Driver (1).	This licensing can only be used for Counties, Municipalities, Townships, School Districts, Public Housing Authorities or Special Districts with populations of less than 250,000, and cannot be used for any other institution.	$16,120.91
Local Government Concurrent Client	Hyland Software, Inc.	GV-B-MU2-CTIPC1	Provides retrieval, viewing, printing, and management of documents.Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each. See Local Government Bundle purchasing restrictions.	$654.91
Local Government Named User Client	Hyland Software, Inc.	GV-B-MU2-CTIPN1	Provides retrieval, viewing, printing, and management of documents for a single named user.	Each. See Local Government Bundle purchasing restrictions.	$403.02
Local Government Workflow Concurrent License SL	Hyland Software, Inc.	GV-B-MU2-WLIPC1	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each. See Local Government Bundle purchasing restrictions.	$1,007.56
Local Government Workflow Named Used Client SL	Hyland Software, Inc.	GV-B-MU2-WLIPN1	Provides electronic document routing through a configurable work process. Includes pre-configured rules, actions, transitions, and notifications and additional capabilities for Visual Basic scripts. Provides access to Workflow functions in order to perform work and complete tasks on documents. Includes E-Forms.	Each. See Local Government Bundle purchasing restrictions.	$705.29
Local Government Plan Review Concurrent Client	Hyland Software, Inc.	GV-B-MU2-	Provides Concurrent access to the OnBase Plan Review application.	Per Concurrent User	$3,022.67
Local Government Plan Review Named User Client	Hyland Software, Inc.	GV-B-MU2-	Provides Named User access to the OnBase Plan Review application	Per Named User	$1,763.22

Local Government Web Server	Hyland Software, Inc.	GV-B-MU2-WTIPW1	Provides an ActiveX or HTML browser interface to access documents stored in an OnBase database via the Internet, Extranet or corporate Intranet.	See Local Government Bundle purchasing restrictions.	$4,030.23
Local Government Application Enabler	Hyland Software, Inc.	GV-B-MU2-AEIPI1	Provides image enabling to third-party software applications that are GUI, browser, or text-based.Due to the variety of applications, Solution Providers must verify that an application can be enabled prior to selling this module. As part of the verification, Solution Providers are also required to complete a pre-qualification form located on www.teamonbase.com. Please make no assumptions. If verification is unsuccessful, Hyland can be contacted for assistance.	Per enabled application. See Local Government Bundle purchasing restrictions.	$6,045.34
Local Government Enterprise Application Enabler	Hyland Software, Inc.	GV-B-MU2-AEIPI2	Provides image enabling to third-party software applications that are GUI, browser, or text-based.Provides any number of applications to be image-enabled within the enterprise.Due to the variety of applications, Solution Providers must verify that an application can be enabled prior to selling this module. As part of the verification, Solution Providers are also required to complete a pre-qualification form located on www.teamonbase.com. Please make no assumptions. If verification is unsuccessful, Hyland can be contacted for assistance.	For all applications. See Local Government Bundle purchasing restrictions.	$20,151.13
Local Government Virtual Print Driver	Hyland Software, Inc.	GV-B-MU2-PTIPC1	Provides a method to capture, index and store the print stream from any printable application and store the information as a TIFF image within the OnBase document repository. This is a single instance license.	See Local Government Bundle purchasing restrictions.	$3,526.45
Local Government Production Document Imaging (Kofax/TWAIN)	Hyland Software, Inc.	GV-B-MU2-DIIPW1	Scans (digitizes) paper documents using Kofax or TWAIN compatible devices. Advanced features include distributed capture and indexing, image enhancement, bar code recognition (Kofax), blank page separation and auto-enabled indexing.	For First. See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Production Document Imaging (Kofax/TWAIN)	Hyland Software, Inc.	GV-B-MU2-DIIPW2	Scans (digitizes) paper documents using Kofax or TWAIN compatible devices. Advanced features include distributed capture and indexing, image enhancement, bar code recognition (Kofax), blank page separation and auto-enabled indexing.	For Second and Beyond. See Local Government Bundle purchasing restrictions.	$806.05
Local Government Production Document Imaging (TWAIN)	Hyland Software, Inc.	GV-B-MU2-TIIPW1	Scans (digitizes) paper documents using TWAIN compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For First. See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Production Document Imaging (TWAIN)	Hyland Software, Inc.	GV-B-MU2-TIIPW2	Scans (digitizes) paper documents using TWAIN compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For Second and Beyond. See Local Government Bundle purchasing restrictions.	$806.05
Local Government Production Document Imaging (ISIS)	Hyland Software, Inc.	GV-B-MU2-ASIPW1	Scans (digitizes) paper documents using ISIS compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For First. See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Production Document Imaging (ISIS)	Hyland Software, Inc.	GV-B-MU2-ASIPW2	Scans (digitizes) paper documents using ISIS compatible devices. Advanced features include bar code recognition, distributed capture and indexing, blank page separation and auto-enabled indexing.	For Second and Beyond. See Local Government Bundle purchasing restrictions.	$806.05
Local Government Disconnected Scanning	Hyland Software, Inc.	GV-B-MU2-DSIPW1	Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.	For First. See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Disconnected Scanning	Hyland Software, Inc.	GV-B-MU2-DSIPW2	Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.	For Second and Beyond. See Local Government Bundle purchasing restrictions.	$806.05
Local Government Integration for Microsoft Outlook 2016	Hyland Software, Inc.	GV-B-MU2-OLIPI1-16	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the OnBase folder. Users can also retrieve documents from the interface.	See Local Government Bundle purchasing restrictions.	$2,015.11

Local Government Integration for Microsoft Outlook 2013	Hyland Software, Inc.	GV-B-MU2-OLIPI1-13	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.	See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Integration for Microsoft Outlook 2010	Hyland Software, Inc.	GV-B-MU2-OLIPI1-10	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.	See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Integration for Microsoft Outlook 2007	Hyland Software, Inc.	GV-B-MU2-OLIPI1-07	Allows a Microsoft Outlook user to interact with an OnBase system through the familiar Outlook client. Provides users the ability to save e-mails and/or any associated attachments by simply dragging the e-mail to the "OnBase" folder. Users can also retrieve documents from the interface.	See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Business Application For 2016	Hyland Software, Inc.	GV-B-MU2-OIIPW1-16	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	See Local Government Bundle purchasing restrictions.	$40.30
Local Government Business Application For 2013	Hyland Software, Inc.	GV-B-MU2-OIIPW1-13	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each. See Local Government Bundle purchasing restrictions.	$40.30
Local Government Business Application For 2010	Hyland Software, Inc.	GV-B-MU2-OIIPW1-10	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each. See Local Government Bundle purchasing restrictions.	$40.30
Local Government Business Application For 2007	Hyland Software, Inc.	GV-B-MU2-OIIPW1-07	Allows users of Word, Excel, and PowerPoint to interact with OnBase content through their familiar Microsoft Office interface. This integration provides users with single-click menu access for storing, retrieving, and editing OnBase documents and related content.	Each. See Local Government Bundle purchasing restrictions.	$40.30
Local Government Full-Text Indexing Server for Autonomy IDOL	Hyland Software, Inc.	GV-B-MU2-IDIPI1	Provides integration with Autonomy IDOL to provide advanced Full-Text searches for words or phrases that exist within documents stored in OnBase. These words or phrases can exist in COLD documents, text renditions of image documents (OCRed images), and many 3rd party application documents. Can perform fuzzy searches, wildcard searches, stemming searches, thesaurus searches, and searches combining full-text and keywords on document types.	See Local Government Bundle purchasing restrictions.	$7,052.90
Local Government Full-Text Indexing Concurrent Client for Autonomy IDOL	Hyland Software, Inc.	GV-B-MU2-IDIPC1	Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.	Concurrent Client, Each. See Local Government Bundle purchasing restrictions.	$120.91
Local Government Full-Text Indexing Named User Client for Autonomy IDOL	Hyland Software, Inc.	GV-B-MU2-IDIPN1	Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others. Valid for a single named user logged into one workstation at a time.	Named User Client, Each. See Local Government Bundle purchasing restrictions.	$60.45
Local Government Full-Text Indexing Workstation Client for Autonomy IDOL	Hyland Software, Inc.	GV-B-MU2-IDIPW1	Provides the ability to retrieve full-text data stored in Autonomy IDOL Full-Text collections. Autonomy IDOL Full-Text can index OCR images, COLD text documents, Adobe PDF documents, Microsoft Office documents, WordPerfect documents, HTML documents and many others.	Workstation Client, Each. See Local Government Bundle purchasing restrictions.	$60.45
Local Government Records Management	Hyland Software, Inc.	GV-B-MU2-RIIPI1	Manages the retention, disposition, and destruction of managed record folders according to an organization's business rules, based on the occurrence of an event in accordance with external regulations or compliance laws.This includes Document Retention (DRIPI1).	See Local Government Bundle purchasing restrictions.	$8,060.45

Local Government Document Retention	Hyland Software, Inc.	GV-B-MU2-DRIPI1	Manages the retention and disposition of stored documents according to pre-defined business rules, involving the passage of time, allowing for automatic destruction and/or removal from the OnBase document repository.	See Local Government Bundle purchasing restrictions.	$4,030.23
Local Government Distributed Disk Service	Hyland Software, Inc.	GV-B-MU2-DSIPI1	Regulates public access to a server through middleware software that acts as a proxy for accessing Disk Groups. Because communications with the OnBase Client are handled through TCP/IP, administrators are not required to use Windows Shares or UNC paths for Disk Group access.	See Local Government Bundle purchasing restrictions.	$2,015.11
Local Government Integration for Tempest Development Group	Hyland Software, Inc.	GV-B-MU2-ITDIPI1	Enables users of OnBase Plan Review to integrate with the Tempest Development Group products for permitting to include electronic plan review in the overall permitting process.	See Local Government Bundle purchasing restrictions.	$6,045.34
Local Government Plan Review Integration Toolkit	Hyland Software, Inc.	GV-B-MU2-PRTIPI1	Enables the OnBase Plan Review solution to be integrated with a third party line of business application, allowing for electronic plan review to be included in organizational processes. The toolkit offers an API for creating plan review projects with data from the line of business application, authenticating portal users and other key functions as well as the ability to use the OnBase Application Enabler for user interface-level integration.	See Local Government Bundle purchasing restrictions.	$6,045.34
Local Government Integration for Azteca Cityworks	Hyland Software, Inc.	GV-B-MU2-ACWIPI1	Offers a seamless integration with Azteca Cityworks, providing users ECM capabilities within the Cityworks product. Allows users to associate documents to a Cityworks Server object, view the associated documents and archive new Cityworks-related documents directly in to OnBase.	See Local Government Bundle purchasing restrictions.	$6,045.34
OnBase Agenda	Hyland Software, Inc.	AGEIPI1	Allows organizations to electronically create and manage meeting templates, meeting dates and times as well as agenda, agenda packet and minutes documents. Can be used in conjunction with pre-configured E-Forms and workflows to improve review processes, provide for collaboration and reduce the amount of time needed to produce timely and complete agendas, agenda packets and minutes. OnBase Agenda includes OnBase modular functionality for specific use with the Agenda application.	Core OnBase Agenda modules intended for use within the OnBase Agenda application in Government.	$4,030.23
OnBase Agenda Concurrent Client	Hyland Software, Inc.	AGEIPC1	Allows for concurrent access to the OnBase Agenda application and performance of Agenda-related activities and tasks.	Each	$403.02
Agenda To Go	Hyland Software, Inc.	ATGIPI1	Provides the ability to download a meeting created in OnBase Agenda to a user's iPad. From the Agenda To Go app, users can view meetings, download associated meeting documents, and markup meeting documents.	Each	$4,030.23
OnBase Plan Review	Hyland Software, Inc.	OPRIPI1	Enables government agencies and other organizations to perform plan review processes related to community development, such as commercial buildings, private residence work, roads, bridges and other infrastructure projects. A submittal web site allows electronic upload of plan sheets and related documents. Plan revisions can be re-submitted, and finalized plans can be approved, stamped and returned to submitters, with collected comments and markups. Plan Review supports 2D drawing formats only.	Core OnBase Plan Review modules intended for use within the OnBase Plan Review application in Government.	$6,045.34
Plan Review Named User Client	Hyland Software, Inc.	OPRIPN1	Provides Named User access to the OnBase Plan Review application.	Per Named User	$2,015.11
Plan Review Concurrent Client	Hyland Software, Inc.	OPRIPC1	Provides Concurrent access to the OnBase Plan Review application.	Per Concurrent User	$4,030.23
Plan Review Integration Toolkit	Hyland Software, Inc.	PRTIPI1	Enables the OnBase Plan Review solution to be integrated with a third party line of business application, allowing for electronic plan review to be included in organizational processes. The toolkit offers an API for creating plan review projects with data from the line of business application, authenticating portal users and other key functions as well as the ability to use the OnBase Application Enabler for user interface-level integration.	Each	$12,090.68
Integration for Tempest Development Group	Hyland Software, Inc.	ITDIPI1	Enables users of OnBase Plan Review to integrate with the Tempest Development Group products for permitting to include electronic plan review in the overall permitting process.	Each	$12,090.68

Integration for Azteca Cityworks	Hyland Software, Inc.	ACWIPI1	Offers a seamless integration with Azteca Cityworks, providing users ECM capabilities within the Cityworks product. Allows users to associate documents to a Cityworks Server object, view the associated documents and archive new Cityworks-related documents directly in to OnBase.	Each	$12,090.68
Integration for Accela	Hyland Software, Inc.	AAIPI1	Offers a seamless integration with Accela Automation through the standard Accela EDMS interface. Features include the ability to associate documents to an Accela CAP object, view and download associated documents, and archive new Accela related documents through the Accela product directly into OnBase.	Each	$8,060.45
Public Sector Constituency Web Access	Hyland Software, Inc.	PSIPI1	Provides constituents of a particular government agency web-based document viewing, and limited Workflow routing. Standard Client functionality will be restricted. This license is only for use by constituents in the public sector market. This license can NOT be used by any employee of any agency or anyone on that agency's internal network. Standard Client licenses must be purchased for agency employees. This license is required for each instance of an OnBase database within the agency.Constituent counts are determined by the most recent official Census results. Hyland reserves the right to increase license fees if the agency's constituent base increases.	Per 100 Constituents Per System/Database. Constituent counts are determined by the most recent official Census results. Hyland reserves the right to increase license fees if the agency's consituent base increases.	$4.03
Integration for CourtView	Hyland Software, Inc.	ICIPI1	Enables users to archive and retrieve images through the CourtView interface.	Each	$12,090.68
Integration for DTS TrakRecord	Hyland Software, Inc.	TKIPI1	Enables storage and retrieval of document images in connection with the DTS TrakRecord system.	Each	$8,060.45
Integration for Epic	Hyland Software, Inc.	EMIPI6	Designed to integrate with Epic's suite of products such as Cadence, Prelude, Resolute, and EpicCare Inpatient/Ambulatory, Media Manager, ROI, EpicWeb, EpicCareLink, etc. Integration capabilities consist of integrated document retrieval/viewing, integrated plug-in for ROI printing and integrated scanning directly from Epic applications.	Plus $100.00 Per Bed. For enterprise Epic integration.	$80,604.53
Epic Concurrent Client	Hyland Software, Inc.	ECIPC1	Provides retrieval, viewing, printing, and management of documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each, 1-100	$1,209.07
Epic Concurrent Client	Hyland Software, Inc.	ECIPC2	Provides retrieval, viewing, printing, and management of documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each, 101-200	$1,007.56
Epic Concurrent Client	Hyland Software, Inc.	ECIPC3	Provides retrieval, viewing, printing, and management of documents. Concurrent Clients have a minimum connection (lease) time of five (5) minutes.Both the OnBase Client or OnBase Web Client can use this license.	Each, 201+	$806.05
Integration for Epic Canto and Epic Haiku	Hyland Software, Inc.	ECHIPI1	Provides mobile access to the patient record without leaving the Epic interface, allowing mobile users to tap a button to retrieve information stored within OnBase, such as images, EKGs, test results and other relevant documents.	Per licensed bed, 0-499 Beds.	$80.60
Integration for Epic Canto and Epic Haiku	Hyland Software, Inc.	ECHIPI2	Provides mobile access to the patient record without leaving the Epic interface, allowing mobile users to tap a button to retrieve information stored within OnBase, such as images, EKGs, test results and other relevant documents.	Per licensed bed, 500-1,499 Beds	$60.45
Integration for Epic Canto and Epic Haiku	Hyland Software, Inc.	ECHIPI3	Provides mobile access to the patient record without leaving the Epic interface, allowing mobile users to tap a button to retrieve information stored within OnBase, such as images, EKGs, test results and other relevant documents.	Per licensed bed, 1,500+ Beds	$40.30
OnBase Mobile eCapture for Android	Hyland Software, Inc.	OMEIPI1-ANDR	Allows for the configuration and completion of patient forms on an Android tablet, enabling the patient registration process to become paperless.	Each	$8,060.45
OnBase Mobile eCapture for Android Point of Registration	Hyland Software, Inc.	OMEIPW1-ANDR	Enables the use of OnBase Mobile eCapture for Android at a specific point of registration.	Each, Qty 1-50	$967.25

OnBase Mobile eCapture for Android Point of Registration	Hyland Software, Inc.	OMEIPW2-ANDR	Enables the use of OnBase Mobile eCapture for Android at a specific point of registration.	Each, Qty 51-100	$806.05
OnBase Mobile eCapture for Android Point of Registration	Hyland Software, Inc.	OMEIPW3-ANDR	Enables the use of OnBase Mobile eCapture for Android at a specific point of registration.	Each, Qty 101+	$644.84
Universal Scope Capture	Hyland Software, Inc.	USCIPW1	Allows physicians and clinicians to electronically capture patient data and images during any type of medical procedure and store the data and images within OnBase, where they can be accessed, reviewed and annotated.	Per Scope	$1,612.09
Medical Records Management Solution	Hyland Software, Inc.	MRIPI1	Enables HIM departments to manage the deficiency process for their documents. Controls and monitors the distribution of charts and corresponding documents thought the coding, analysis and physician completion process. Provides easy, web-based access to the patient information and physician completion from any location based on security. The OnBase Report Services module can add robust reporting capabilities for stock HIM productivity metrics as well as the ability to build custom reports.Optional modules sold separately are: Document Imaging, COLD/ERM, Report Services.	Each	$20,151.13
Medical Records Coding Interface	Hyland Software, Inc.	MGIPI1	Provides the ability to configure and automate the assignment of work for Medical Coders to allow for an efficient completion of coding on a medical chart.	Each	$16,120.91
Medical Records Transcription Interface	Hyland Software, Inc.	MOIPI1	Provides the ability within the deficiency management process to create, edit and complete transcriptions within the OnBase Medical Records Completion solution.	Each	$8,060.45
MRMS Chart Completion Concurrent Client	Hyland Software, Inc.	MRIPC1	Provides Medical Records Management Solution access based on signer configuration. Grants access to all staff and clinical delivery via the Medical Records Management interface ONLY.	Each	$2,418.14
Appeals and Grievances	Hyland Software, Inc.	ANGIPI1	Allows healthcare payers to triage, investigate and report on member or provider complaints. A case is created from submitted correspondence and launched into a review process where relevant data is collected and considered for decision.	Each	$76,574.31
Release of Information	Hyland Software, Inc.	RUIPI1	Aggregates data and documents from different locations and electronically provides all necessary patient information and supporting documents in a single patient record.	Per Licensed Bed	$40.30
Integration for Optum CAC	Hyland Software, Inc.	OPIPI1	Provides access to transcribed and scanned documents that are necessary to support the coding process in Optum CAC.	Each	$24,181.36
Integration for 3M CAC	Hyland Software, Inc.	3MIPI1	Provides access to transcribed and scanned documents that are necessary to support the coding process in 3M CAC.	Each	$24,181.36
Integration for Nuance CAC	Hyland Software, Inc.	NUIPI1	Provides access to transcribed and scanned documents that are necessary to support the coding process in Nuance CAC.	Each	$24,181.36
EDI 810 EOB Processor	Hyland Software, Inc.	P1IPW1	Converts Invoices in versions 4010 of the 810 EDI format to XML. The processor also extracts a list of keywords from each Invoice to index the document as they are imported into OnBase.	Each	$8,060.45
EDI 835 EOB Processor (HIPAA 5010)	Hyland Software, Inc.	P5IPW1-5010	Converts EOB statements in versions 5010 of the 835 EDI format to XML or PCL format for import into OnBase. The processor also extracts a fixed list of keywords from each EOB to index the documents as they are imported into OnBase. The 835 file is separated into a single document for each claim.	Each	$12,090.68
EDI 837 Processor (HIPAA 5010)	Hyland Software, Inc.	P7IPW1-5010	Converts individual healthcare claims in version 5010 of the 837 Professional EDI format to HCFA-1500 forms and UB-92 in XML format. This processor does not process Dental 837 documents.	Each	$12,090.68
HL7 Module	Hyland Software, Inc.	HLIPW1	Sends and receives HL7 data streams. It can send OnBase information from COLD, the Document Import Processor, and scan processes to any application that has can accept HL7 formatted data. It can also receive HL7 messages via TCP/IP or batch files to create documents such as E-Forms and add Autofill Keyword Sets.	Each	$20,151.13

Document Imaging for PACS	Hyland Software, Inc.	PAIPW1	Provides the ability to scan via a stand-alone capture module and index documents in conjunction with DICOM work lists. Documents are stored into a PACS system in a DICOM format.	Per workstation	$1,209.07
Signature Deficiencies for Epic	Hyland Software, Inc.	MCIPI1	Provides the ability to electronically sign deficiencies on documents stored in OnBase that are retrieved from within the Epic user interface.	Each	$16,120.91
Signature Deficiencies for EMRs	Hyland Software, Inc.	DEIPI1	Provides the ability to electronically sign deficiencies on documents stored in OnBase. OnBase will be initiated from the EMR displaying clinical documents requiring the Physician Signature.	Each	$16,120.91
Intgegration for GE Centricity	Hyland Software, Inc.	GEIPI1	Designed to integrate with GE's Centricity product. Key elements include: HL7 synchronization between OnBase and Centricity, document retrieval capability from the Centricity user interface, batch scanning from OnBase linking documents with Centricity, and storage of structured data (transcription, photos, XML documents) to complement the HIS system.	for Hospitals	$20,151.13
Integration for Cerner Millennium	Hyland Software, Inc.	CNIPI3	Designed to integrate with the Millennium product. Key elements include: HL7 synchronization between OnBase and Millennium, document retrieval capability from the Millennium user interface, batch scanning from OnBase linking documents with Millennium, and storage of structured data (transcription, photos, XML documents) to complement the HIS system.	Each	$40,302.27
Integration for Allscripts Sunrise Acute Care	Hyland Software, Inc.	EYIPI3	Designed to integrate with Sunrise Acute Care. Key elements include: HL7 synchronization between OnBase and Sunrise Acute Care, document retrieval capability from the Sunrise Acute Care user interface, batch scanning from OnBase linking documents with Sunrise Acute Care, and storage of structured data (transcription, photos, XML documents) to complement the HIS system.	Each	$40,302.27
EKG Integration for GE Muse	Hyland Software, Inc.	KGIPI1	Provides the ability to import EKGs directly from the GE Muse system into OnBase without the need to print and scan.	Each	$12,090.68
Integration for OPUS (CSC Common Web Desktop)	Hyland Software, Inc.	WDIPI1	Provides integration to OPUS (CSC Common Web Desktop) enabling patient information, from OnBase and other systems integrated through the Common Web Desktop, to be presented through a common portal interface.	Each	$4,030.23
Integration for Effica EMR	Hyland Software, Inc.	EFIPI1	Captures ECG content utilizing HL7 technology and displays results using API integration with Effica EMR solution.	Each	$8,060.45
Integration for Allscripts Homecare	Hyland Software, Inc.	ALIPI1	Enables visiting nurses to view images that support the visit and to archive new content captured during the visits.	Each	$4,030.23
Workstation Client for AllScripts Integration	Hyland Software, Inc.	ALIPW1	Enables visiting nurses to view images that support the visit and to archive new content captured during the visits.	Per Nurse	$161.21
DICOM Integration for GE	Hyland Software, Inc.	DGIPI1	Provides an integration that brings together the data centric capabilities of EMRs, the document- and transaction-centric features of OnBase, and the imaging- and DICOM-centric advantages of GE. Physicians and staff can access medical images and other digital clinical data without toggling between multiple logins, systems and viewers.	Each	$12,090.68
DICOM Integration for Teramedica	Hyland Software, Inc.	TMIPI1	Provides an integration that brings together the data centric capabilities of EMRs, the document- and transaction-centric features of OnBase, and the imaging- and DICOM-centric advantages of TeraMedica. Physicians and staff can access medical images and other digital clinical data without toggling between multiple logins, systems and viewers.	Each	$12,090.68
Multi-User Server for GE Centricity	Hyland Software, Inc.	GMIPI1	For users of the GE centricity system; Provides utilities, OnBase Configuration, Basic Text Search and Print Servers, three-tier OnBase Broker and a License to use the copyrighted OnBase Database in conjunction with a supported SQL Database Management System (DBMS) in a single institution, multi-user environment.	Clinical	$4,433.25

Clinical Concurrent Client for GE Centricity	Hyland Software, Inc.	GCIPC1	The client provides the ability to access documents from OnBase. Multiple concurrent clients may be included in a solution.Provides retrieval, viewing, printing, and management of documents. Provides retrieval, viewing, printing, and management of documentsConcurrent Clients have a minimum connection (lease) time of five (5) minutes. Both the OnBase Client or OnBase Web Client can use this license.	Each	$644.84
Document Imaging for GE Centricity (Unlimited)	Hyland Software, Inc.	GUIPW1	Allows for the scan capture of documents through OnBase and places a link to the documents in the patient clinical record.	Clinical, Each	$2,659.95
Indexing Workstation for GE Centricity	Hyland Software, Inc.	GIIPW1	Allows for the indexing of documents from stand alone indexing stations outside of the OnBase client. Multiple stations maybe included in a solution.	Clinical, Each	$806.05
Disconnected Scanning for GE Centricity	Hyland Software, Inc.	GSIPW1	See description in the Document Imaging section of this document.	Clinical	$403.02
Healthcare Disconnected Scanning for Citrix	Hyland Software, Inc.	DSIPC1	Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.	For First	$4,836.27
Healthcare Disconnected Scanning for Citrix	Hyland Software, Inc.	DSIPC2	Provides users with a robust document capture solution that is used while disconnected from OnBase. Supports Kofax, ISIS, and TWAIN scanning.	For Second and Beyond	$1,934.51
Healthcare Express Scanning for Citrix	Hyland Software, Inc.	EPIPC1	Simplifies the task of document scanning for any department. All options, scanner settings, and default index values are pre-designated. Supports any TWAIN, ISIS or Kofax compatible scanner as well as sweep functionality. Documents are imported or sent to a scan queue for further processing.	Each	$967.25
Healthcare Front Office Scanning for Citrix	Hyland Software, Inc.	FOIPC1	Provides a simple and configurable scanning interface from within the OnBase Client or as a standalone scanning application. In a standalone installation, documents and index data are uploaded to OnBase via a connection to an OnBase Application Server or the OnBase Desktop.	Each	$967.25
Integration Scanning for Epic	Hyland Software, Inc.	EIIPW1	None.	Each	$806.05
General Ledger Journal Entry and Export	Hyland Software, Inc.	GLIPI1	Allows for the uploading of transaction details or summary data to the G/L system. Supports A/R to G/L and G/L to G/L transfers.	Each	$12,090.68
Hospital License - Community Connect	Hyland Software, Inc.	HOSIPI1	Community Connect Hospital' means 1) a hospital whose licensed bed count is determined by the most recently reported number on the HIMSS Analytics website (http://www.himssanalytics.org) for such hospital; and 2) a hospital to which Customer grants access to Customer's Epic system; and 3) a hospital for which Customer has paid to Hyland the requisite Software license fees and annual Maintenance fees as described in the section below. For each Community Connect Hospital which Customer wishes to grant access to the Software as a Community Connect User, Customer shall pay a one-time payment of Software license fees in an amount determined by multiplying the number of licensed beds for such Community Connect Hospital (as most recently reported on the HIMSS Analytics website http://www.himssanalytics.org) by $800/licensed bed for institutions with less than 250 licensed beds; and by $1,200/licensed bed for institutions with 250 licensed beds and greater. Therefore, from time to time, if the number of licensed beds of such Community Connect Hospital increases based upon the number most recently reported on the HIMSS Analytics website, such Customer shall be obligated to pay additional Software license fees to Hyland in an amount equal to the number of such additional licensed beds at the Community Connect Hospital, in accordance with the above. Customer may not transfer or reassign license rights between Community Connect Hospitals, and shall not be entitled to a refund or credit if the number of licensed beds decreases at any time.	Per Licensed Bed, for Under 250 Beds	$806.05

Hospital License - Community Connect	Hyland Software, Inc.	HOSIPI2	Community Connect Hospital' means 1) a hospital whose licensed bed count is determined by the most recently reported number on the HIMSS Analytics website (http://www.himssanalytics.org) for such hospital; and 2) a hospital to which Customer grants access to Customer's Epic system; and 3) a hospital for which Customer has paid to Hyland the requisite Software license fees and annual Maintenance fees as described in the section below. For each Community Connect Hospital which Customer wishes to grant access to the Software as a Community Connect User, Customer shall pay a one-time payment of Software license fees in an amount determined by multiplying the number of licensed beds for such Community Connect Hospital (as most recently reported on the HIMSS Analytics website http://www.himssanalytics.org) by $800/licensed bed for institutions with less than 250 licensed beds; and by $1,200/licensed bed for institutions with 250 licensed beds and greater. Therefore, from time to time, if the number of licensed beds of such Community Connect Hospital increases based upon the number most recently reported on the HIMSS Analytics website, such Customer shall be obligated to pay additional Software license fees to Hyland in an amount equal to the number of such additional licensed beds at the Community Connect Hospital, in accordance with the above. Customer may not transfer or reassign license rights between Community Connect Hospitals, and shall not be entitled to a refund or credit if the number of licensed beds decreases at any time.	Per Licensed Bed, For 250 Beds and Over	$1,209.07
Point of Service (POS) Cash Receipt	Hyland Software, Inc.	POSIPI1	The Point-of-Service collections module with Data Ingestion interfaces with other systems, (Registration, Billing, Document Imaging) to provide guarantor collections at patient presentation for service. This cash drawer concept can also integrate with OnBase's patient portal and kiosk solutions to help manage and reconcile guarantor collections throughout the healthcare organization.	Each	$16,120.91
POS Concurrent Client	Hyland Software, Inc.	POSIPC1	Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.	Each, Qty 1-50	$403.02
POS Concurrent Client	Hyland Software, Inc.	POSIPC2	Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.	Each, Qty 51-100	$362.72
POS Concurrent Client	Hyland Software, Inc.	POSIPC3	Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.	Each, Qty 101-250	$322.42
POS Concurrent Client	Hyland Software, Inc.	POSIPC4	Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.	Each, Qty 251-500	$302.27
POS Concurrent Client	Hyland Software, Inc.	POSIPC5	Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.	Each, Qty 501-1000	$282.12
POS Concurrent Client	Hyland Software, Inc.	POSIPC6	Enables each Client workstation to access the POS Cash Receipts elements of the system in conjunction with the Base POS Licenses above. Licensing is per each concurrent workstation (cash drawer) needed per shift.	Each, Qty 1001+	$261.96
Charge Processing Base License	Hyland Software, Inc.	CPIPI1	Charge Processing with data ingestion assists the operator in capturing paper-based charge record data including; patient identification, date of service, procedure codes, diagnosis codes, and quantities. Validation routines are provided that enable the solution to "scrub encounter data" prior to interfacing with the LOB application.	Each	$36,272.04

Claims Processing	Hyland Software, Inc.	CGIPI1	Provides end-to-end claims workflow and data validation for health insurance products, including UB04 (CMS-1450) and HCFA 1500's. Works in conjunction with OnBase Capture to ingest converted OCR data and provides data scrubbing, error correction and normalization of ANSI 837 output.	Each	$36,272.04
Payment Processing	Hyland Software, Inc.	PPRIPI1	Provides the server side license for Remittance Processing. Includes data capture of all paper-based payment data including; payments, adjustments, remark codes, comments and other data elements. Validation routines are provided that enable the solution to "scrub remittance data" prior to interfacing with the LOB application. AutoCOB is provided for printing of EOBs for secondary billing purposes.	Each	$36,272.04
Payment Processing Automated Plug-ins	Hyland Software, Inc.	PPAIPI1	Enables the entry of information into the LOB system, in conjunction with the HPI Plug-in Linker. These automated transactions can vary based upon business need and LOB system capabilities. This Plug-in allows for the transfer of funds between (or application of adjustments to) accounts in the LOB system.	Each	$4,030.23
AR Management	Hyland Software, Inc.	ARMIPI1	Analyzes and aggregates information captured from disparate billing systems through AR data feeds, identifying open accounts that require additional action for payment follow-up and collections. Accounts are categorized and work-listed by payor and classification to ensure priority handling of unpaid claims.	Each	$20,151.13
Denial Management	Hyland Software, Inc.	DENIPI1	Enables organizations to isolate medical claim denials and defects and prevent future recurrence. Works in conjunction with Payment Processing to capture paper and electronic denial and remark code data from remittances and can be used as a standalone solution with ingestion of denial data through 3rd party data feeds.	Each	$32,241.81
Additional Host Posting Interface	Hyland Software, Inc.	HPIIPI1	Takes all validated data that has been processed through either the Charge or Payment Processing workflow and automatically posts it to your Line of Business (LOB) application. May require additional ADE licenses depending on transaction volumes.	Each	$22,166.25
Payment Worklists	Hyland Software, Inc.	PWLIPI1	Includes Server-Side license for Payment Followup Qualification application, HPI Plug-in Linker to (1) Host Billing System, (1) ADE Station License, Standard Payment Processing follow-up defect types include; bypass, credit balance, pseudo/pass-thru, Payment Variance). Standardized follow-up actions (user notes, route to user/group, correspondence generation).	Each	$18,136.02
Additional ADE or Validation License	Hyland Software, Inc.	HPIIPW1	Enable the import, validation or the posting process to the LOB system. Additional licenses may be required to accommodate higher transaction volumes. Ability to support multi-session on a single workstation is dependent on the integration methodology and LOB capabilities.	Each	$1,209.07
ANSI X 12 EDI Toolkit	Hyland Software, Inc.	EDIIPI1	Provides the Server side license for processing of ANSI X12 Data. Allows separation, splitting, capture and translation for 270, 271, 276, 277, 810, 820, 835 and 837 formats. When paired with either Charge or Payment Processing Modules, transactions can be automatically applied to the host LOB system.	Each	$20,151.13
Additional EDI Processing Station	Hyland Software, Inc.	EDIIPW1	Provides an additional station license for processing of ANSI X12 Data. Allows separation, splitting, capture and translation for 270, 271, 276, 277, 810, 820, 835 and 837 formats.	Each	$8,060.45
Data Analytics Report Manager	Hyland Software, Inc.	DARIPI1	Enables users to dynamically create customized reports.	Each	$16,120.91
Treasury Workstation Reconciliation	Hyland Software, Inc.	TWRIPI1	Enables matching of bank, finance, Payment Processing and LOB host system for cash reconciliation.	Each	$20,151.13
Receivables Management Automated Plugins	Hyland Software, Inc.	RMAIPI1	Enables the entry of information into the LOB system, in conjunction with the HPI Plug-in Linker. These automated transactions can vary based upon business need and LOB system capabilities. This Plug-in allows for the transfer of funds between (or application of adjustments to) accounts in the LOB system.	Each	$6,045.34

Additional AutoLink to Host System	Hyland Software, Inc.	AAHIPI1	Interface created with a Line of Business System that can be activated to provide users with one-click access to patient and/or claim information on the respective host system (i.e. billing, medical records, and utilization review).	Each	$6,045.34
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC1	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 1-10	$2,015.11
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC2	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 11-25	$1,692.70
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC3	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 26-50	$1,450.88
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC4	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 51-100	$1,209.07
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC5	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 101-250	$1,047.86
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC6	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 251-500	$886.65
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC7	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 501-1000	$806.05
RCM Concurrent Client	Hyland Software, Inc.	RCMIPC8	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 1001+	$765.74
RCM Workstation Client	Hyland Software, Inc.	RCMIPW1	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 1-10	$1,007.56
RCM Workstation Client	Hyland Software, Inc.	RCMIPW2	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 11-25	$846.35
RCM Workstation Client	Hyland Software, Inc.	RCMIPW3	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 26-50	$725.44
RCM Workstation Client	Hyland Software, Inc.	RCMIPW4	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 51-100	$604.53
RCM Workstation Client	Hyland Software, Inc.	RCMIPW5	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 101-250	$523.93
RCM Workstation Client	Hyland Software, Inc.	RCMIPW6	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 251-500	$443.32
RCM Workstation Client	Hyland Software, Inc.	RCMIPW7	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 501-1000	$403.02
RCM Workstation Client	Hyland Software, Inc.	RCMIPW8	Provides base document imaging functions including: Scan, Rescan, Indexing and Routing, Inquiry, Output and Archive.	Each, Qty 1001+	$382.87
Additional HPI Plug-in Linker	Hyland Software, Inc.	HPLIPI1	Provides integration for performing automated activity within a line of business system.	Each	$10,075.57
Payer Rate Matrix	Hyland Software, Inc.	PRMIPI1	Allows entry and management of payer fee schedules at the Payer, CPT, and Effective Date levels to enable discount calculation during payment validation. Application offers Percentage of Billed Amount, Fixed Fee or Percentage of CMS Reimbursement options.	Each	$20,151.13
Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUIPI1	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	1-5 Hospitals	$24,181.36
Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUIPI2	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	6-10 Hospitals	$40,302.27
Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUIPI3	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	11-20 Hospitals	$60,453.40

Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUIPI4	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	20+ Hospitals, Per Hospital	$2,418.14
Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUISI1	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	Subscription Per Month. 1-5 Hospitals	$1,128.46
Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUISI2	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	Subscription Per Month. 6-10 Hospitals	$1,934.51
Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUISI3	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	Subscription Per Month. 11-20 Hospitals	$2,901.76
Audit Compliance Administration for Hospitals	Hyland Software, Inc.	HS-AUISI4	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.Includes associated clinics.	Subscription Per Month, Per Hospital. 20+ Hospitals	$241.81
Audit Compliance Administration for Critical Access Hospitals	Hyland Software, Inc.	CA-AUIPI1	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.	<50 Beds	$4,030.23
Audit Compliance Administration for Critical Access Hospitals	Hyland Software, Inc.	CA-AUISI1	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.	Subscription, Per Month < 50 Beds	$190.23
Audit Compliance Administration for Stand Alone Outpatient Facilities	Hyland Software, Inc.	SA-AUIPI1	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.	Each	$4,030.23
Audit Compliance Administration for Stand Alone Outpatient Facilities	Hyland Software, Inc.	SA-AUISI1	Enables management and compliance with the RAC audit requirements by providing business process management, records management and trending capabilities in a single application.	Subscription, Per Month	$190.23
Integration for ACORD	Hyland Software, Inc.	ACIPI1	Enables OnBase Workflow and BPM applications to support and share ACORD standards-based XML data with other systems without the need for complex custom coding.	Each	$12,090.68
EDI TS 130 Processor	Hyland Software, Inc.	T1IPW1	Processes EDI 130 (4010) Student Educational Records data streams into individual documents and provides ability to import.	Each	$8,060.45
Admissions Process Automation for PeopleSoft	Hyland Software, Inc.	ADMIPI1	Enables the real time exchange and guaranteed delivery of data between OnBase and Oracle's PeopleSoft Campus Solutions, in support of the automation of the Admissions process.	Each	$54,408.06
Financial Aid Process Automation for PeopleSoft	Hyland Software, Inc.	FINIPI1	Enables the real time exchange and guaranteed delivery of data between OnBase and Oracle's PeopleSoft Campus Solutions, in support of the automation of the Financial Aid process.	Each	$45,340.05
TC/TCE Process Automation for PeopleSoft	Hyland Software, Inc.	TCEIPI1	Enables the real time exchange and guaranteed delivery of data between OnBase and Oracle's PeopleSoft Campus Solutions, in support of the automation of the Transcript Capture & Transfer Course Evaluation process.	Each	$54,408.06
Enterprise Integration Server (EIS)	Hyland Software, Inc.	EISIPI1	Provides a standardized platform to exchange data real time between OnBase and a Line of Business application. EIS is an integration tool that, when coupled with Hyland and/or Solution Provider experience and a customer's IT department expertise and guidance, results in a solution with guaranteed delivery and exchange of real time business data.	Per Application	$40,302.27
BizTalk Server 2013 R2 (Runtime Restricted-Use)	Hyland Software, Inc.	BT2013R2-2CORE	Intended for users who require BizTalk Server 2013 R2 (Runtime Restricted) licensing that goes beyond the four core licenses included with the BPAs and Enterprise Integration Server. This license is intended for exclusive use within the products contained in the Business Process Automation Solutions section of the fee schedule and includes two cores.	For Two Cores	$4,030.23

Implementation Services	Hyland Software, Inc.	INSTL1	Implementation Services may include: creating the software database, licensing of all modules purchased, installation of the software, configuration of the OnBase solution, upgrading current OnBase version, and training of Customer's OnBase administrator on configuration and use of the software and purchased modules.	Per hour, plus T&E	$181.86
Business Process Consulting Services	Hyland Software, Inc.	WFCNS1	Business Process Consulting Services may include: business process analysis and corresponding documentation, requirements for business process re-engineering, general process consultation, and the implementation and configuration of designed business processes in OnBase through the use of OnBase Workflow and/or WorkView.	Per hour, plus T&E	$205.79
Advanced Capture Services	Hyland Software, Inc.	ADCAP1	Advanced Capture Services may include: discovery, configuration and installation services to Customer in the implementation of their Advanced Capture software solution. This may include automatic data extraction based on the classification and indexing of keywords from scanned documents, configuration of pre-defined forms and rules, creating XML document renditions, document validation based on value to zone comparison, and line item and table type data capture.	Per hour, plus T&E	$181.86
Database Services	Hyland Software, Inc.	DBSRV1	Database Services may include: general database consulting, scripting, business continuity planning, high availability requirements, database migration, and conversion of legacy ECM systems or legacy data to OnBase with verification and data authentication post migration.	Per hour, plus T&E	$205.79
Custom Solution Services	Hyland Software, Inc.	CUSOL1	Custom Solution Services may include: application requirements definition, application development, pre-processor development, providing real-time two way integrations between OnBase and other enterprise systems, API script development, API consultation, WorkView data import, and other custom solutions or integrations.	Per hour, plus T&E	$205.79
Enterprise Consulting Services	Hyland Software, Inc.	ESGSV1	Enterprise Consulting Services may include: enterprise-wide assessments of current state software solutions mapped to desired future state OnBase solutions, individual solution assessments, cost-benefit analyses, providing roadmaps for basis of OnBase enterprise strategy, change management, longer-term engagement management and other management consulting services.	Per hour, plus T&E	$205.79
Project Management Services	Hyland Software, Inc.	PMSSUP	Project Management Services direct, coordinate and support successful implementation of OnBase solutions. Project Management Services may include: project planning, coordination of resources, maintaining project documentation, status reports, reviews, retrospectives, overseeing training, end user acceptance testing support and go-live support. Project management services can be expanded as needed to address customer business and technical consulting needs.	Per hour, plus T&E	$191.44
Introduction to Installation	Hyland Software, Inc.	TRITEK-C	The Introduction to Installation course covers the installation process for an OnBase system. The class focuses on pre-installation requirements and takes students through the OnBase configuration process. Processing modules are discussed in-depth, with many opportunities for gaining hands-on experiences using sample business scenarios. Upon completion of the course, students should be able to install an OnBase system under the guidance of an OnBase certified installer.Duration: 5 days	Per person at Hyland	$2,539.04
Introduction to Installation	Hyland Software, Inc.	TRITEK-CO	The Introduction to Installation course covers the installation process for an OnBase system. The class focuses on pre-installation requirements and takes students through the OnBase configuration process. Processing modules are discussed in-depth, with many opportunities for gaining hands-on experiences using sample business scenarios. Upon completion of the course, students should be able to install an OnBase system under the guidance of an OnBase certified installer.Duration: 5 days	Per Person Online	$2,720.40

Introduction to Installation	Hyland Software, Inc.	TRITEK2-C	The Introduction to Installation course covers the installation process for an OnBase system. The class focuses on pre-installation requirements and takes students through the OnBase configuration process. Processing modules are discussed in-depth, with many opportunities for gaining hands-on experiences using sample business scenarios. Upon completion of the course, students should be able to install an OnBase system under the guidance of an OnBase certified installer.Duration: 5 days	Plus T&E. Up to 12 Employees at Customer Site	$18,136.02
Installer Certification	Hyland Software, Inc.	TRCRT1-C	The Installer Certification course refines a student's ability to install and troubleshoot an OnBase solution. Special emphasis is placed on: system design, storage facilities, and select modules (including authoring and full-text indexing). Students are responsible for installing a new OnBase system, including the appropriate setup and configuration of OnBase modules covered in this and prerequisite courses. Duration: 5 days	Per person at Hyland	$2,539.04
Installer Certification	Hyland Software, Inc.	TRCRT1-CO	The Installer Certification course refines a student's ability to install and troubleshoot an OnBase solution. Special emphasis is placed on: system design, storage facilities, and select modules (including authoring and full-text indexing). Students are responsible for installing a new OnBase system, including the appropriate setup and configuration of OnBase modules covered in this and prerequisite courses. Duration: 5 days	Per Person Online	$2,720.40
Installer Certification	Hyland Software, Inc.	TRCRT2-C	The Installer Certification course refines a student's ability to install and troubleshoot an OnBase solution. Special emphasis is placed on: system design, storage facilities, and select modules (including authoring and full-text indexing). Students are responsible for installing a new OnBase system, including the appropriate setup and configuration of OnBase modules covered in this and prerequisite courses. Duration: 5 days	Plus T&E. Up to 12 Employees at Customer Site	$18,136.02
System Administration	Hyland Software, Inc.	TRSYS1	The System Administration course is designed to introduce new and existing system administrators to the use, maintenance, and administration of OnBase. The class provides in-depth, hands-on experience based on using actual business scenarios. The class also investigates technical support processes, effective maintenance strategies, online documentation and other resources available to OnBase system administrators. Duration: 5 days	Per person at Hyland	$2,539.04
System Administration	Hyland Software, Inc.	TRSYS1-CO	The System Administration course is designed to introduce new and existing system administrators to the use, maintenance, and administration of OnBase. The class provides in-depth, hands-on experience based on using actual business scenarios. The class also investigates technical support processes, effective maintenance strategies, online documentation and other resources available to OnBase system administrators. Duration: 5 days	Per Person Online	$2,720.40
System Administration	Hyland Software, Inc.	TRSYS2	The System Administration course is designed to introduce new and existing system administrators to the use, maintenance, and administration of OnBase. The class provides in-depth, hands-on experience based on using actual business scenarios. The class also investigates technical support processes, effective maintenance strategies, online documentation and other resources available to OnBase system administrators. Duration: 5 days	Plus T&E. Up to 12 Employees at Customer Site	$18,136.02
Advanced System Administration	Hyland Software, Inc.	TRSYS3	The Advanced System Administrator class provides students with a detailed understanding of the general system structure as well as the process for creating an effective disaster recovery plan. Special emphasis will be on identifying problematic components of a system as well as detailing a strategy for modifying and upgrading OnBase. Additionally, students learn about additional modules and how they can be leveraged in an existing installation. Duration: 5 days	Per person at Hyland	$2,539.04

Advanced System Administration	Hyland Software, Inc.	TRSYS3-CO	The Advanced System Administrator class provides students with a detailed understanding of the general system structure as well as the process for creating an effective disaster recovery plan. Special emphasis will be on identifying problematic components of a system as well as detailing a strategy for modifying and upgrading OnBase. Additionally, students learn about additional modules and how they can be leveraged in an existing installation. Duration: 5 days	Per Person Online	$2,720.40
Advanced System Administration	Hyland Software, Inc.	TRSYS4	The Advanced System Administrator class provides students with a detailed understanding of the general system structure as well as the process for creating an effective disaster recovery plan. Special emphasis will be on identifying problematic components of a system as well as detailing a strategy for modifying and upgrading OnBase. Additionally, students learn about additional modules and how they can be leveraged in an existing installation. Duration: 5 days	Plus T&E. Up to 12 Employees at Customer Site	$18,136.02
Introduction to Workflow	Hyland Software, Inc.	TRWKF1-C	The Introduction to Workflow course introduces OnBase partner technical staff to the processes and tools associated with creating, modifying, and troubleshooting OnBase workflow implementations. Training scenarios require students to employ multiple functions within their Workflow design. The course employs a hands-on approach to understanding Workflow interactions and design possibilities.	Per Person at Hyland	$2,539.04
Introduction to Workflow	Hyland Software, Inc.	TRWKF1-CO	The Introduction to Workflow course introduces OnBase partner technical staff to the processes and tools associated with creating, modifying, and troubleshooting OnBase workflow implementations. Training scenarios require students to employ multiple functions within their Workflow design. The course employs a hands-on approach to understanding Workflow interactions and design possibilities.	Per Person Online	$2,720.40
