| ✓ Construction Supervision | ✓ Community and Media Relations |

Career Progression

PrevaHealth Wellness Diagnostic Center (2001 – Current): Founder and President.

Founded upon the concept that effective preventive health must involve the patient, their physician and employer in a collaborative effort, PrevaHealth provides state-of-the-art screening and diagnostic services for an accurate assessment of the patient's true risk of preventable disease. This information serves as the basis for a unique consultation that provides precise, evidence-based guidelines to the referring physician and focused education to the patient. A clearly defined treatment plan provided to the referring physician, with the patient as an active participant creates a climate where positive outcomes are most likely to be achieved. For their part, employers are educated in the support necessary for the patient to meet these goals. Clearly defined metrics are available to employers to demonstrate a return on investment to justify their participation.

- ✓ Developed and articulated a unique business plan (patent pending)
- ✓ Raised over \$3.5 Million in equity and financing - over half from individual physicians (mostly Primary Care)
- ✓ Negotiated acquisition of innovative EBT 'E-Speed' CT device and designation of PrevaHealth as General Electric's 'National Training Center'
- ✓ Designed and supervised construction of facility
- ✓ Negotiated and drafted contracts with physician contractors and suppliers
- ✓ Designed physician-related materials for education, marketing and billing
- ✓ Developed patient materials, forms and educational monographs
- ✓ Negotiated with employers to provide screening and educational programs

Ohio Heart (1996 – 2001) Co-Founder and Director of Development and Operations.

A Cardiac Screening Facility in Columbus, Ohio. All aspects of Center financing, site selection, construction, staffing and development were direct responsibilities.
