Excellent problem solving skills

Document management

Strong collaborative skills

Project management, Asset management including systems planning

Pre-purchase assessment, Acquisition and Installation

Professional Experience

Zeiss Field Service Engineer

2021-Present

- Focus on preventive maintenance, repairs, and service calls on multiple surgical microscopes and ophthalmology equipment.

Clinical Engineering Specialist

2020-2021

- Planned and performed upgrades to the wide variety of patient care equipment and systems in accordance with manufacturer's specifications.
- Collaborated on patient care system projects that range from medium to large in scope, risk and impact.
- Acted as technology resource for special projects as assigned.
- Continue and expound on past Technician responsibilities

Biomedical Electronics Technician

2016 - 2020

- First response to all equipment concerns, especially concerning the operating rooms and while on-call.
- Immediate backup for multiple Clinical Engineering Specialists.
- Followed cost containment and turnaround guidelines as set by the manager.
- Provided functional and empirical analysis related to planning and implementation of patient care diagnostic and life support systems.

Biomedical Technical Support Specialist

2015-2016

- Assisting all Clinical Engineering by acting as dispatch and central contact personnel.
- Assist in repairs, ordering and stocking of supplies and equipment.

- Maintaining timekeeping and updating sharepoint. Along with other general tasks.

Lead Anesthesia Technician, Ross OR

2008-2015

- Directly assisting Anesthesiologists, CRNAs, and all staff associated with the Dept. of Anesthesia, as well as nurses and fellow technicians.
- Job duties in the Ross OR include: running all quality check specifications on equipment (ventilators, Olympus scope cleaner, etc.); ordering, stocking, and having full knowledge of useful supplies; assisting anesthesia during cases including making of IV and transducers, floating swans, etc.; and understanding the equipment anesthesiologists require.
- As technicians in the Ross, we are also directly working with nursing staff in the ORs and on patient recovery units. This mainly pertains to bronchoscopes, difficult intubations, and sharing equipment.

PCA, OSUMC 4 Ross

2003-2008

- Assisted in patient care and cardiac rehab of post-op patients, working closely with nurses and other staff.
