MorphoTrak Reference No. MTOH-A121916-01

MorphoTrak's Automated Fingerprint Identification System (AFIS) is currently installed at Columbus Division of Police (COPD). MorphoTrak is the owner of the software and design, sole developer and sole provider for the AFIS.

The proposed MorphoTrak Latent Expert Workstation is specifically designed to work with the existing COPD AFIS located.

As the manufacturer of the existing COPD AFIS and software application, only MorphoTrak can provide the Latent Expert Workstation that use the same image processing and matching technology used by the COPD AFIS. These devices use a proprietary software application that incorporates specific encoding algorithms and search routines developed and patented by MorphoTrak for mapping, storing, and comparing fingerprint images.

Specifically:

MorphoTrak does not have other sales channels, partners or resellers. The proposed solution can only be procured and implemented directly from MorphoTrak.

As the manufacturer of the existing COPD AFIS subsystem, software applications, and workstations, only MorphoTrak can provide the Columbus Division of Police with the required hardware, software and support.

MorphoTrak looks forward to the opportunity to provide the Latent Expert Workstation to Columbus Division of Police. Should you require further assistance, please contact Paul Tselepis at (703) 797-2663 or paul.tselepis@morpho.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Andree Gilmore'. The signature is fluid and stylized, with a long horizontal stroke extending to the right.

Andree Gilmore
Senior Director, Systems Development & Integration
