Challenges faced - Columbus City, like many states, needs to modernize IT, with limited resources and funds to do so. Columbus City must rely on experts to understand the unique challenges of delivering Columbus City agencies to the residents of Maryland. The involvement of experts enables Columbus City to focus on the critical functions of meeting its constituency's new and evolving demands and basic operational functions, instead of IT development. These IT tasks include - empowering implementation, delivering secure agility and open standards for DevSecOps, and seamless integration.

Empower - AlxTel Professional Services helps teams to quickly apply and mature the skills needed to adopt modern cloud-native technologies, along with adopting best practices of modern application development processes and techniques such as agile, DevSecOps, etc. AlxTel's Cloud Services for Application Under All public and private clouds, AlxTel's site reliability engineers (SREs) deliver expertise in hybrid cloud implementation, application modernization, data transformation, and enterprise automation. This enables Columbus City to gain development agility, reduce operational complexity, and deliver business value faster. AlxTel Solutions and Professional Services provides systems management and maintenance services. Columbus City gains the ability to scale confidently and with stability while keeping costs down.

AlxTel is interconnected with almost every major global infrastructure provider, application services, cloud-native application development, and automation solutions. Our enterprise-grade open-source commercial off-the-shelf (COTS) platforms maintain infrastructural interoperability. For 18 years, AlxTel has been one of the world's leading providers of modern, innovative enterprise software, built through an open-source development model, whereby COTS software is developed within an open-source community, and provides commercial quality and security assurance with subscription-based customer support. Our team works to ensure that information and computing resources at all organizational levels meet security compliance requirements; including software/application and data security support, as well as disaster recovery planning and risk assessment.

In partnering with Columbus City, AlxTel subject-matter experts (SMEs) and consultants adopt a mentor-based approach to provide technical expertise by educating, enabling, and empowering them to be able to adopt, operate, and maintain Red Hat technologies on their own, helping to provide security both inside and out.

Modernize - AlxTel Professional Services focuses on accelerating cloud adoption and acting as an enabling force for container platforms, DevOps, and other modernization initiatives. AlxTel's approach to modernization empowers Columbus City to extend the value of legacy systems, while incrementally transforming useful components. We accomplish this via agile development sprints and integration of modern open, API-enabled, interfaces. Our proposed solution enables new and existing systems to share data in real time and helps to drive automated and seamless business process flows. AlxTel solutions are all architected and built as loosely coupled technologies that compose an overall highly optimized architecture, enabling the many benefits of cloud environments and cloud provider services. At the same time, our platforms provide the same characteristics as on-premises data centers. Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to www.irs.gov/FormW9.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements.
