### **Sole Source Statement**

Please be advised, the National Fire Protection Association is the producer of numerous codes, standards, books, audio/visual and electronic materials dealing with various aspects of fire prevention and protection. All of the material so produced is copywrited by the NFPA.

All of the materials offered by the National Fire Protection Association are produced by ourselves or by our subcontractors. Our materials may be ordered by telephone, fax, mail or on-line at our website, [www.nfpa.org](http://www.nfpa.org). These materials are distributed through our Headquarters building in Quincy Massachusetts and/or our Fulfillment Center in Avon Massachusetts. On occasion, materials are drop shipped from our subcontractors and distributors.

Should you have any questions regarding the original source of a NFPA product, I will be happy to discuss this matter with you.

Very truly yours,

Brian Bishop  
Assistant Vice President, Fulfillment
