RE: ADS LLC SIM Card Sources

Dear Mr. Bukovac:

ADS LLC manufactures and sells flow monitoring equipment under its trademarked label, ADS Environmental Services. ADS LLC is the only authorized distributor of ADS Environmental Services equipment in the United States.

ADS wireless communication products use static IP address network services provided by AT&T (formerly Cingular Wireless). The static IP address provides the ADS equipment with the unique capability to push and pull data on demand. Any installation location designated for wireless communication must have access to AT&T 850 or 1900 MHz service. Each wireless device will be fitted with a SIM (Subscriber Identity Module) card that is provisioned by AT&T with specific account and network information for use with ADS software. SIM cards procured through ADS LLC are pre-programmed with this specific information in order to work properly with the ADS wireless modem and the ADS software. SIM cards procured from sources other than ADS LLC are not guaranteed to successfully operate in ADS equipment. ADS will not be responsible for the operation of equipment fitted with non-ADS supplied components.

Sincerely,
ADS LLC
