

Information to be included in all Legislation authorizing entering into a Contract:

1. **The names, contract compliance no. & expiration date, location by City/State and status of all companies (NPO, MAJ, MBE, FBE, HL1, AS1, or MBR) submitting a competitive bid or submitting an RFP or RFSQ.**

<u>Name</u>	<u>C.C. No./Exp. Date</u>	<u>City/State</u>	<u>Status</u>
Brown & Caldwell Ohio, LLC	94-1446346 – 3/18/16	Columbus/Ohio	MAJ
Dynotec, Inc.	31-1319961 – 3/4/15	Columbus/Ohio	MBE

2. **What type of bidding process was used (ITB, RFP, RFSQ, Competitive Bid).**

Requests for Proposals (RFP's) were received July 12, 2013.

3. **List the ranking and order of all bidders.**

1. Brown & Caldwell Ohio, LLC
2. Dynotec, Inc.

4. **Complete address, contact name and phone number for the successful bidder only.**

Brown & Caldwell
4700 Lakehurst Court, Suite 100
Columbus, OH 43016
Kristen S. Knight, P.E., (614) 410-6144, kknight@BrwnCald.com

5. **A full description of all work to be performed including a full description of work to be performed during any known phasing of the contract.**

This project consists of three phases. The first phase consists of the condition assessment of a 12" water distribution main using an in-line inspection tool (approximately 2,100 feet).

The second phase, if authorized, consists of the condition assessment of a pilot section of the 12" lime slurry disposal line using two separate in-line inspection tools and comparing their results (approximately 8,900 feet). This phase also includes piloting a pipeline monitoring technology.

The third phase consists of the condition assessment using an in-line inspection tool of the remaining 16 miles of lime slurry disposal line from the end of Phase 2 to the McKinley Quarry.

Each phase is intended to build confidence in the capability of the in-line inspection technology before moving to the next phase. This legislation includes all work associated with Phase 1 and Phase 2. If the in-line inspection technology provides acceptable results, a future contract modification will authorize Phase 3.

6. **A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.**

Phase 1 is expected to be completed within 4 months of the date of the agreement. Phase 2, if authorized, would not start until completion of Phase 1 and will take another 4 months. Phase 3 will not start until after completion of Phase 2, and will take an additional 6 months to complete.

7. **A narrative discussing the economic impact or economic advantages of the project; community outreach or input in the development of the project; and any environmental factors or advantages of the project.**

The purpose of the project is to address the Ohio EPA's concerns over the condition of the lime slurry disposal line and the risks posed by the infrastructure.. A primary priority of this project is to identify and mitigate potential risks involved by assessing the condition of the lime slurry disposal line and providing the most detailed information available on the pipe condition.

8. **An estimate of the full cost of the Contract including a separate estimate of any and all phases or proposed future contract modifications.**

Phase 1	\$ 652,168.57
Phase 2	\$ 683,845.14 (If Authorized)
Subtotal	\$1,336,013.71 (Original Contract Amount)
Phase 3	\$1,244,623.67 (Future Contract Modification No. 1, if authorized)
Total	\$2,580,637.38
