**Work Experience:**

1975- 2010- Assistant Attorney General, Environmental Enforcement Section, Ohio Attorney General's Office. Retired, November 2010.

As an Assistant Attorney General I handled both general counsel and litigation work in a wide variety of environmental programs including air pollution, water pollution, solid waste, hazardous waste, safe drinking water, Superfund, oil and gas, utility siting, siting and regulation of large confined animal facilities, and pesticide regulation. This work was undertaken on behalf of clients including the Ohio Environmental Protection Agency, the Ohio Department of Natural Resources, the Ohio Department of Agriculture and the Ohio Power Siting Board.

From 1992 through 2010 my law practice largely focused on issues related to the requirements applicable to publically owned wastewater treatment plants and sewer systems, planning for wastewater treatment needs for a broad range of types of developments including typical subdivisions, concentrated animal facilities, and commercial and industrial development. My litigation and general counsel work addressed issues related to development and redevelopment of sites involving the protection of high quality streams through the implementation of the Ohio Water Quality Standards including the anti-degradation rule and the implementation of requirements related to filling streams and wetlands. In addition, I also supervised the administrative and civil litigation related to water pollution and drinking water matters brought by the Ohio Attorney General at the request of the Directors of Environmental Protection and Agriculture.

**Educational Background:**

Juris Doctor, Case Western Reserve University, Cleveland, Ohio 1975

Bachelor of Arts, Manhattanville College, Purchase, New York 1972  
(Political Science/ Urban Planning Major; Thesis: A Proposal For the Recalibration  
of the Green Space Formula for Westchester County, New York, 1972)
