

**Craig Colvin, President**

Colvin Development and Construction, Inc.  
1108 City Park Avenue  
Columbus, OH 43206  
614-258-0095

**Professional Experience**

1996 to Present: Colvin Development and Construction, Incorporated.

*President*

I currently own a Custom Home Building company. Colvin Inc. is a licensed Home Improvement Contractor with the City of Columbus, and has completed fourteen residential projects in German Village as a spec builder and another five as a custom builder/remodeler. These 19 projects include new builds, major renovations (ie, gut jobs), as well as minor cosmetic restoration. This range of projects has given me extensive experience with all of the unique challenges of building while respecting the historic guidelines of German Village.

1992 thru 1996: Roose-Mullet Company

*Project Manager and Project Estimator*

At Roose-Mullet I was responsible for cost estimates for various commercial projects. From awarding of a project I would oversee the writing of all contracts and management of the construction project through completion. Projects included restaurants, apartment renovations, retail construction, and office space build outs.

1988 thru 1992: Trio Construction Company, Columbus, Ohio.

*Project Estimator*

I developed estimates/quotes for the projects during the bidding process. Trio specialized in small to medium size commercial projects, including many restaurants.

1986 thru 1988: Bohm-NBBJ Architects, Columbus, Ohio.

*Cost Estimator*

I prepared cost estimates for large commercial and institutional projects.

The Honorable Mayor Michael B. Coleman  
City Hall  
Columbus, OH 43215

Dear Mayor Coleman;

I am excited about this opportunity to serve my community on the German Village Commission. My seventeen years of living and working in the village have given me a deep respect for the importance of maintaining the historic integrity of my community. In all of my work, both for my personal residence as well as clients in German Village, I have strived to meet or exceed the historic guidelines.

I could lend considerable expertise to the Commission in questions and concerns relating to the building process, especially issues relating to City Code considerations, standard building practices, and viable construction options and alternatives.

In addition, I have sat on the other side of the table from the German Village Commission due to the 19 projects I have completed over the past eight years. This would also help bring valuable insight to the process.

I appreciate your time and look forward to serving the German Village Commission.

Sincerely,

Craig Colvin  
President  
Colvin Development and Construction, Inc.
