STATEMENT OF HARDSHIP

Columbus City Code Section 3307.10 - Variances by City Council.

City council may grant the following zoning variances:

- A.** Permit a variation in the yard, height or parking requirements of any district only in conjunction with a change in zoning or a use variance and only where there are unusual and practical difficulties in the carrying out of the zoning district provisions due to an irregular shape of lot, topography, or other conditions, providing such variance will not seriously affect any adjoining property or the general welfare.
- B.** Permit a use of the property not permitted by the zoning district established on the property if such use will not adversely affect the surrounding property or surrounding neighborhood and if council is satisfied that the granting of such variance will alleviate some hardship or difficulty which warrants a variance from the comprehensive plan.

Before authorizing any variance from the Zoning Code in a specific case, city council shall first determine that such variance will not impair an adequate supply of light and air to the adjacent property, unreasonably increase the congestion of public streets, increase the danger of fires, endanger the public safety, unreasonably diminish or impair established property values within the surrounding area, or in any other respect impair the public health, safety, comfort, morals or welfare of the inhabitants of the city.

In granting a variance pursuant to this section, council may impose such requirements and conditions regarding the location, character, duration, and other features of the variance proposal as council deems necessary to carry out the intent and purpose of this Zoning Code and to otherwise safeguard the public safety and welfare.

List all sections of Code to be varied and explain your reasoning as to why this request should be granted.

PLEASE NOTE: It is the applicant's responsibility to identify all variances required for the project. If any necessary variances are not included, a new application (and applicable fees) will be required.

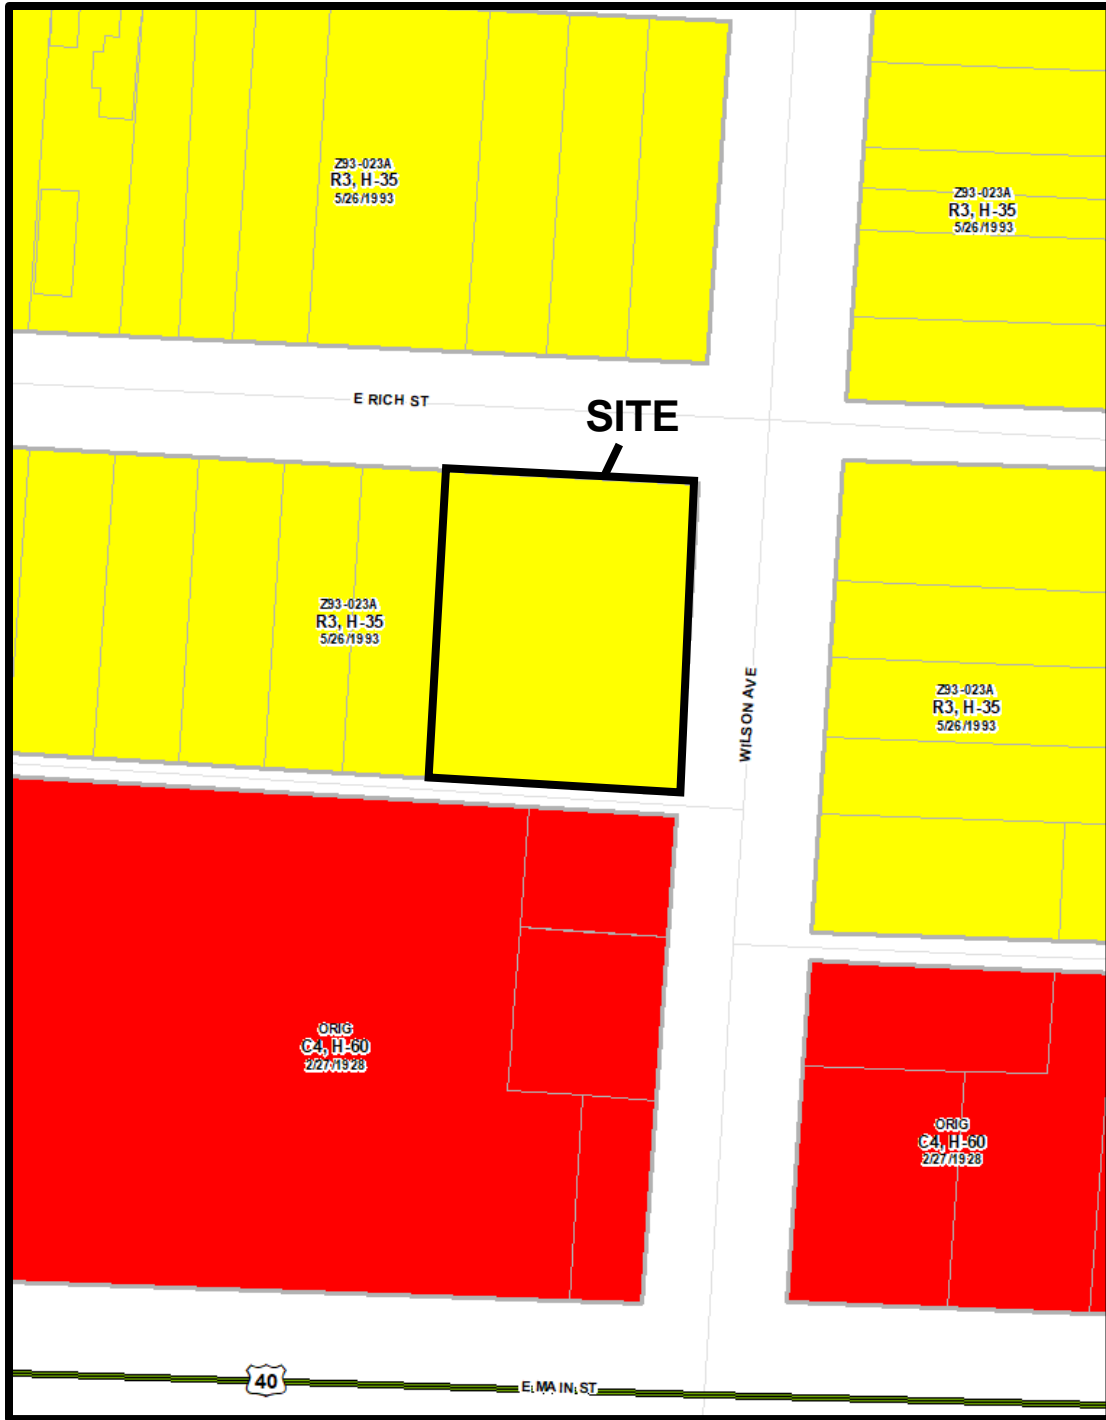

I have read the foregoing and believe my application for relief from the requirements of the Zoning Code contains the necessary hardship, will not adversely affect surrounding property owners, and will comply with the variance(s) requested as detailed below (use separate page if needed or desired):

Applicant is requesting a variance to the current R-3 Zoning per Columbus Municipal Zoning Code Section 3332.035 and Section 3332.27 allowing only one single-family dwelling to approve the construction of two townhome buildings fronting East Rich Street with five units; and Wilson Avenue with two units with a shared rear yard. The corner lot provides a great opportunity to provide more density on the lot with a townhome style development (individual entries) that will blend with the current mix of single and multi-family homes on both streets while adding a much needed density and housing units to the increased demand for housing in Columbus, the East Side, and Franklin County. The applicant has provided necessary off-street parking to avoid street congestion and will provide a much improved lot that is currently vacant and too large or with access limitations to justify the construction of a single-family home and limit opportunity to increase the tax-base population in the neighborhood and Columbus.
