

SITE PLAN
SCALE: 1"=10'

Final Site Plan Received 7/11/2024; Sheet 1 of 1; CV23-139

SITE LEGEND

- PAT BOUQUET LINE
- EXISTING ROAD RIGHT OF WAY LINE
- PROPOSED RIGHT OF WAY DEDICATION
- EXISTING ROAD CENTERLINE
- EXISTING OVERHEAD ELECTRIC
- EXISTING UNDERGROUND ELECTRIC
- EXISTING SWARTY SEWER
- EXISTING UNDERGROUND ELECTRIC
- EXISTING TELECOMMUNICATION LINE
- EXISTING SHMILT FUNDMENT
- EXISTING CONCRETE
- EXISTING ELECTRIC POLE
- EXISTING SWARTY SEWER MANHOLE
- EXISTING GAS LINE TAP

GRADING LEGEND

- PROPOSED FINISH LINE
- LIMITS OF RETAINMENT (6% AND)
- PROPOSED DRAINAGE CONTRIBUTE
- PROPOSED SITE EAVES, SEE FINAL SHEET 'C'
- PROPOSED CONCRETE
- PROPOSED ASPHALT & CURB PARAPETMENT
- PROPOSED ASPHALT DRIVEWAY IN RWD
- PROPOSED STEEL
- PROPOSED RELINING
- PROPOSED VENTILE GATE
- PROPOSED MAIN GATE
- SLOPE YARD
- PROPOSED BOLLARDS
- REAR FIVE FEET BY 4.46% OF TOTAL LOT AREA

PROJECT NARRATIVE

PROPOSED USE IS TO ALLOW FOR CONSTRUCTION AND OPERATION OF A NATURAL GAS COLLECTION AND DISTRIBUTION FACILITY. THE PROPOSED USE IS TO ALLOW FOR CONSTRUCTION AND OPERATION OF PROPOSED STRUCTURES WITH ARCHITECTURAL RESIMBLANCE OF A VINTAGE STATION FROM THE 1920S.

DEPARTMENT OF PUBLIC UTILITIES GENERAL NOTES:

- EXISTING CONING R-3
- NO PARKING REQUIRED.
- NO DUMPSTER REQUIRED.
- SEE STEEL STRUCTURES ARCHITECTURAL DRAWINGS FOR BUILDING ELEVATIONS.
- SEE WARRANCE REQUEST FOR OTHER WARRANCE REQUESTS.
- PARCEL NOS. 010-06603-00 AND 010-08523-00 HAVE BEEN COMBINED INTO 010-08522-00.

TOTAL SITE AREA: 0.29 AC
PRE-DEVELOPED INTERVIEWS: 0.08 AC
POST-DEVELOPED INTERVIEWS: 0.10 AC

Statement in support of the Variances

Campos EPC is performing the engineering and design of a pipeline and associated stations that Columbia Gas of Ohio will be constructing. The new pipeline is a replacement of the existing Columbia pipeline. With this new pipeline installation, Columbia will be adhering to all code requirements. One of these code requirements will be to create shutoff segments within the pipeline so that if the line ruptured, the pipeline segment could be closed to contain the rupture. These rupture mitigation valves are the driving requirement on why we need additional land along the new pipeline path, as these valves and associated equipment must be above grade. The sites we are requesting will house those rupture mitigation valves, and we will need to change the zoning of those sites to allow these facilities to be constructed. A security fence required for this site will require side and rear yard sizing variances, see the site plan attached to this statement of hardship for the fence details.

Detailed Explanation of Requested Variances

CC3332.28 Side or Rear Yard Obstruction:

Code Summary: The area required in a side or rear yard shall be open from the established grade or from the finished grade if higher than the established grade, to the sky unobstructed except for: a number of exceptions that do not apply to this site.

Site Difference: We are proposing a fence that is 8' tall in the side yards on the east and west sides that is an obstruction, thus we will require a variance for this site.

CC3332.41: Rooftop telecommunication installation

Code Summary: A rooftop telecommunication installation for receiving or transmitting wireless telecommunications may be erected on any existing legal structure 60 feet or more in height provided that it is in accordance with C.C. [3309.142\(C\)](#). All support equipment shall be housed in an existing legal structure.

Site Difference: There will be an antenna on a small box to hide the wire that is mounted on the side of the building. Otherwise, there will not be any communications equipment mounted to the roof of the buildings other than the power and communication line coming into the facility overtop of the fence. However this structure will be less than 60 feet in height and will thus require a variance. The west building will be 22'-4" high and the east building will be 22'-2" high, thus we will need to reduce the required height from 60' to 22'.

(NCHP 1)

CC3332.035: R-3 Permitted uses

Code Summary: This code spells out a list of permitted uses for R-3 zoned properties. A gas regulator station is not one of the permitted uses.

Site Difference: This site will be a gas regulator station will serve for the public good in the area, since it is not listed as one of the permitted uses we will need a variance for this site.

CC3332.21: Building lines

Code Summary: This code spells out the minimum distance of buildings from the street property line. For this site that will be 15 feet, which is the average setback of the building to the east and west.

Site Difference: This site will be 10' from the right of way after the additional right of way is dedicated, this we will be under the 15' requirement, there will also be an 8' fence on the ROW line which will also be less than 15' from ROW, thus we propose to reduce the requirement from 15' to 0' to accommodate the fence.

CC3321.05: Vision Clearance

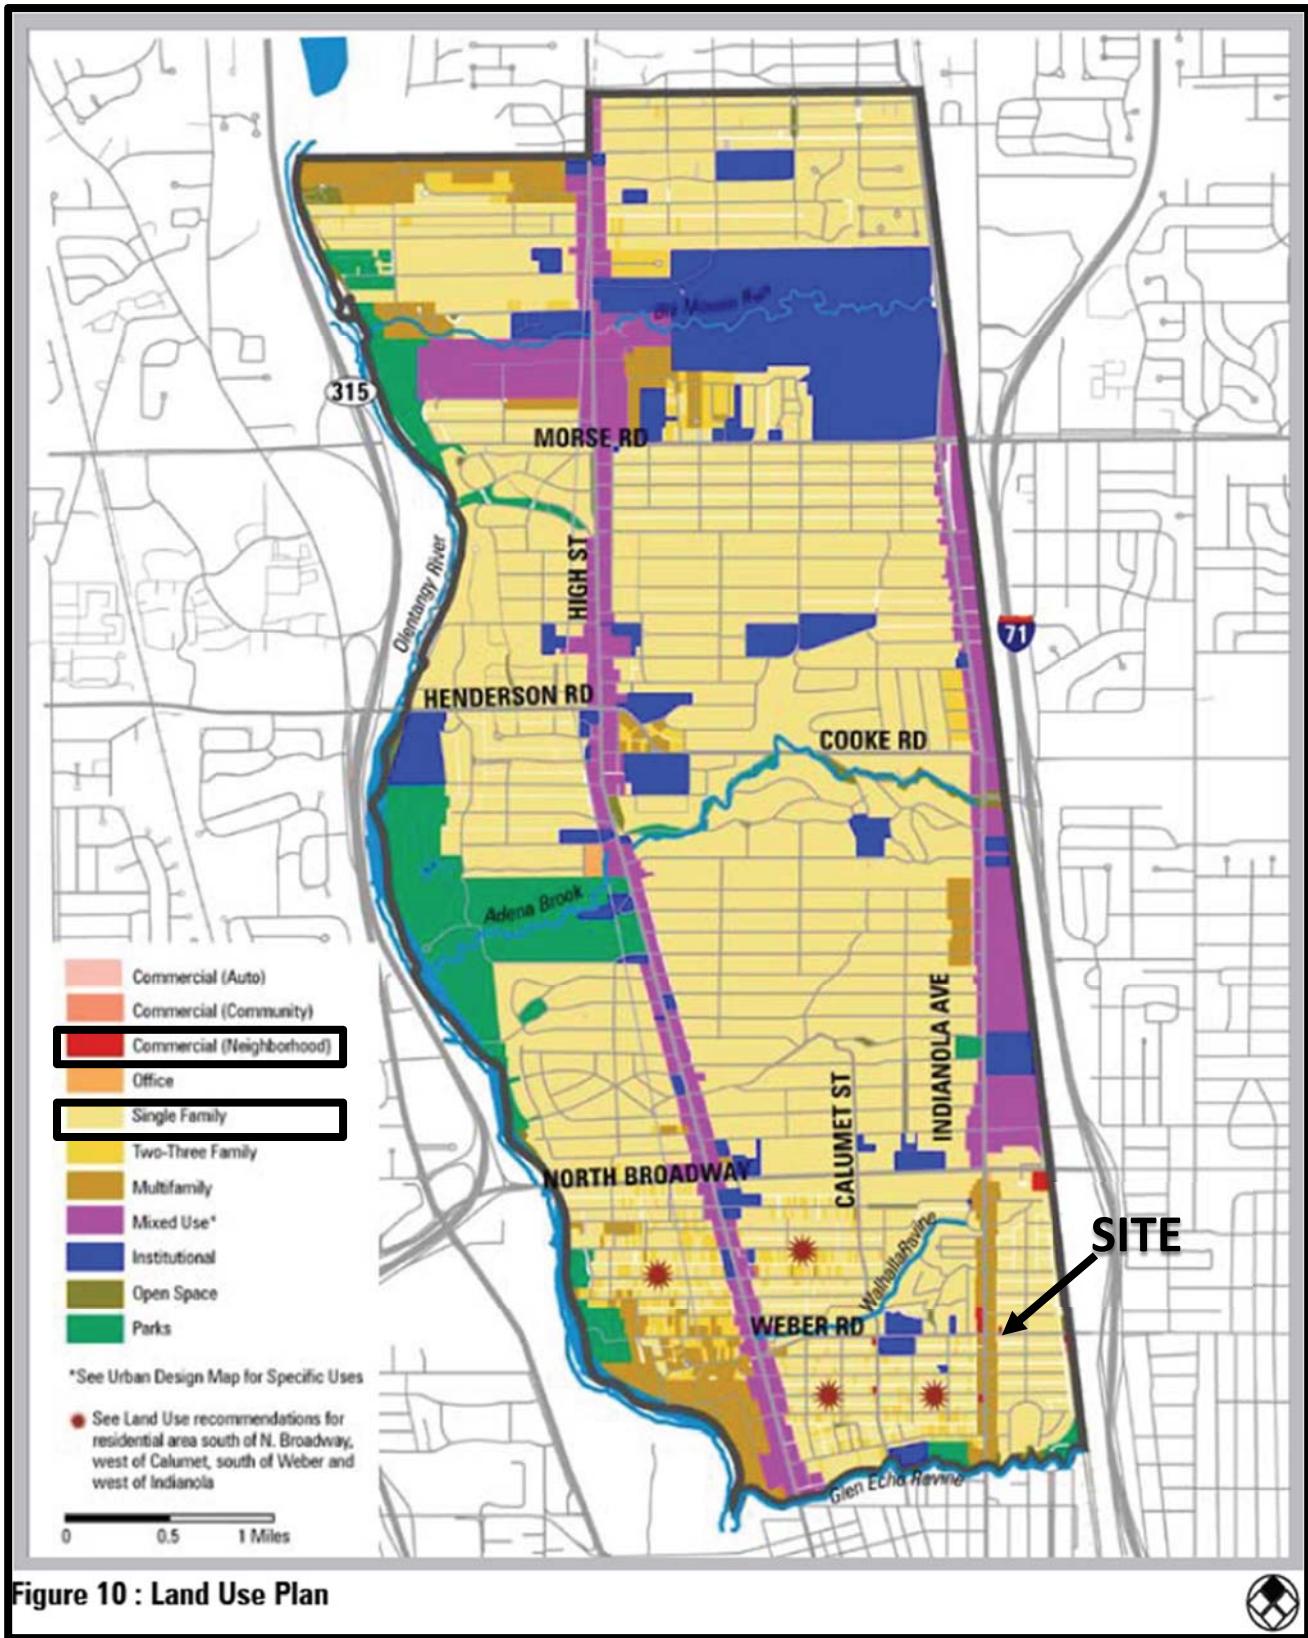

Code Summary: This code spells out the vision clearance requirements by denoting the Minimum acceptable vision clearance standards for motorist and pedestrian safety at intersections are hereby established by restricting the placement, opacity, height and configuration of any fence, wall, planting, structure, or other obstruction. Vision clearance at intersections of streets and alleys. Property owners shall maintain unobstructed vision clearance at the intersections of streets and alleys. An owner shall maintain unobstructed vision clearance between the elevations of two and one-half to ten feet above the alley grade within "clear vision triangles", which are two ten-foot, right-angle triangles formed by the intersection of an alley right-of-way line and street right-of-way line.

For this site there must be a vision triangle on the south west corner of the property that is unobstructed from 2.5 to 10 feet.

Site Difference: This site will have an 8' security fence that will be inside of the vision triangle which will not abide by the requirement for there to be unobstructed view from 2.5 to 10' above grade, thus we will require a variance.
