RE: Sole Source for PremierOne ARL Infrastructure Maintenance

Dear Mr. Grembowski:

Motorola Solutions, Inc. is a leader in Public Safety communications and interoperability systems. Motorola's PremierOne ARL infrastructure technology provides seamless, high-quality, location services.

The above referenced PremierOne ARL product contains proprietary software and infrastructure developed and owned by Motorola. To provide complete software and hardware maintenance and upgrade services for these products, another vendor would need access to Motorola's proprietary software source code. No other vendor has access to Motorola source code and Motorola has not authorized any dealer or other party to obtain such access.

Thank you for your continued support for Motorola. Let us know if we can provide any additional information.

Regards,
