Leeds Forensic Systems, Inc. (Leeds) is the sole manufacturer and distributor of the Leeds' LCF Firearms and Toolmarks Comparison Microscope (LCF Microscope). As the manufacturer and distributor, Leeds provides on-site installation and training, on-going technical support, and warranty service. The Leeds' Service Department is available after the sale for scheduled maintenance and recertification.

The Leeds' LCF Microscope has many unique features that are not duplicated by any other comparison microscope. Some of the features include:

- The largest magnification range in the industry, 6x to 102x (16:1), providing the most matched magnification positions (14).
- The LCF microscope is the only system up-gradable to Dual Viewing for Peer Review and Examiner Training. (Note: Images for both observers are upright and side correct.)
- Unique digital measurement scale mounted to the left stage. This scale allows accurate measurements during examinations (Scale comes with N.I.S.T. certification of accuracy).
- The longest warranty in the industry at 5 years mechanical, optical and labor. 1 year warranty on electrical components.
- The LCF microscope is offered with Florescent Illumination.
- The LCF microscope is the only system to use zoom magnification, not an objective turret design.

The Leeds' LCF Microscope is the most cost-effective Comparison Microscope on the market. Its many unique features and high level of support differentiate it in the market place.
