5. **A full description of all work to be performed including a full description of work to be performed during any known phasing of the contract.**

This project will consist of evaluating upgrade options, develop drawings and specifications to procure the upgrade and installation of a Supervisory Control and Data Acquisition (SCADA) System. The consultant will provide radio path testing from existing radio system to the Operations Control Center. The upgrade only includes the operating system (servers) and software. RTU's and supporting workstations are not included.

6. **A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.**

The project design is scheduled for nine months after the notice to proceed. The scope requires the consultant to perform tasks during and after the construction phase.

7. **A narrative discussing the economic impact or economic advantages of the project; community outreach or input in the development of the project; and any environmental factors or advantages of the project.**

This project will determine the most economic approach to replacing the current SCADA hardware and the remodeling of the control center. The consultant will be evaluating light pollution reduction, ventilation, reusable materials, low-emitting materials, and enhanced commissioning.

8. **An estimate of the full cost of the Contract including a separate estimate of any and all phases or proposed future contract modifications.**

\$368,667.00

A future modification is planned during the construction phase of project for the consultant to provide O&M Ready services. The scope of this work is still to be developed; therefore estimated cost of future modification is not available at this time.
