Dev Server Implementation

City of Columbus, Ohio

February 20, 2012 – R1

INTRODUCTION

Requirements Overview

In reference to contract UTC FL004507

G3 will implement a CIC 3.0 Development Server for City of Columbus as described below.

G3 will provide (1) new HP DL 360xl Server complete with Microsoft Server 2003 SP2 OS and 3-Year HP Care Pack 24x7 on-site support.

It is assumed (1) existing Interaction Media Server which is currently not in service will be re-purposed and implemented for the dev environment.

Included in this proposal are the HMP Resource licenses to support a 4-party conference, 2 simultaneous fax sessions and 4 advanced speech recognition sessions. In addition we have included 4 ports of NuanceAdvanced Speech Recognition and 4 ports of Loquendo RealSpeak Text-to-Speech.

As this is a development environment and not production, all IC, HMP and Loquendo applications will be implemented on the new HP DL 360xl server.

G3 will install all IC, HMP and Nuance software.

G3 will setup and configure the dev environment with the current configuration and test for basic functionality.

Client is responsible for providing adequate rack space and power plus the physical install of the new HP server as well and existing Media Server. In addition Client is responsible for all network connections and the attachment of the servers to the network.

G3 will conduct a pre-implementation meeting with the Client to review roles and responsibilities.

TRAINING

No training is included in this quote.

MATERIAL LIST – BREAKDOWN

Part Name	UTC Reference Number	Retail Price	Qty	Retail Ext
HMP Voice – Software - TS-515-3.0-MRV1	70	\$ 12.00	11	\$ 132.00
HMP Conference – Software -TS-515-3.0- MRC1	71	\$ 48.00	4	\$ 192.00
HMP T.38 Fax – Software - TS-515-3.0- MRF1	72	\$ 90.00	2	\$ 180.00
HMP RTP Audio G.711 only – Software – TS- 515-3.0-MRA1	73	\$ 10.00	11	\$ 110.00
HMP CSP Resource – Software - TS-515-3.0- MRR1	75	\$ 24.00	4	\$ 96.00
