

**Exhibit 1**  
**City of Columbus Community Reinvestment Areas**  
**Housing Conditions Survey**

In Spring and Winter of 2014, a surveillance survey was conducted in selected Community Reinvestment Areas (CRAs) within Columbus, Ohio. The survey included commercial and residential units. The purpose of the survey was to determine the location of housing units within these CRAs that appear to be in need of repair or upgrading, and the severity of dilapidated structures that appear to be beyond repair and are in need of removal.

## Linden CRA

The Linden CRA consists of 8,420 parcels covering approximately 2.9 square miles (1,890 acres). There are 7,427 residential parcels (including apartment and public housing properties), which account for 88% of the parcels and cover about 49% of the land area. There are 883 vacant structures and another 184 vacant lots in the district. Over the past several decades, major investment in the area has been limited to isolated commercial redevelopment at the intersection of Cleveland and 11th avenues, newer subsidized housing constructed by the Columbus Metropolitan Housing Authority and Community Properties of Ohio, and a few scattered site residential redevelopment efforts. Generally, the area has suffered from little commercial investment and a declining housing stock. The Linden CRA has a population of 17,222 (US Census Bureau, 2010 Decennial Census). The median age for a single family home in the area is 72 years old (constructed in 1942), which is 22 years older than the city median. The median value for a single family home is \$43,500, which is 60% lower than the city median value.

## Near East CRA

The proposed Near East CRA is a new district that combines three existing tax-abated districts: the North of Broad CRA, the South of Main CRA, and the Oak Street CRA , and includes an extension of the existing western boundary of the South of Main CRA to incorporate several parcels that may be targeted for future redevelopment. This new CRA consists of 9,218 parcels and covers an area of approximately 3.9 square miles (2,506 acres). There are 6,539 residential parcels (including apartments and public housing properties), accounting for 71% of the parcels and covering 36% of the land area. The Near East CRA contains the greatest number of vacant structures (1,033) and vacant lots (958) of the CRAs in this survey, amounting to 22% of all parcels. Additionally, Poindexter Village, a large public housing complex in the area, was recently closed and razed, substantially reducing the available rental housing until additional redevelopment occurs. As of the 2010 Decennial Census, this area has a population of 21,393. After decades of disinvestment, this area is seeing early signs of stabilization and revitalization, such as some residential redevelopment efforts led by Partners Achieving Community Transformation (PACT), but significant challenges remain, including a median single family home age of 95 years, and a median home value of \$48,100 (55% lower than the city median).

## Southside CRA

Several revisions are proposed to the current boundaries of the Southside CRA (see attached proposed boundary descriptions). The northern boundary is recommended to move south to the rear property lines of parcels on the south side of East Livingston Avenue to eliminate overlap with the Near East CRA. The southern and eastern boundaries are recommended to extend to the Marion Road and Lockbourne Road intersection. It is also recommended that the western boundary be moved west to South Ninth Street/Bruck Street and to include parts of Merion Village and Schumacher Place to incorporate several vacant properties that represent redevelopment opportunities. The revised Southside CRA is densely developed, comprising 10,423 parcels in 3.3 square miles (2,105 acres). It is a heavily residential area, with a total of 9,003 residential parcels (including apartment and public housing properties), which account for 86% of the parcels and 50% of the land area; and 23,152 residents (US Census Bureau, 2010 Decennial Census). There are 782 vacant structures and 323 vacant lots spread throughout the district, which make-up about 11% of all parcels. The fringes of the Southside CRA have experienced some residential and commercial development resulting from the expansion of Nationwide Children's Hospital and investment in adjacent neighborhoods, but the majority of the CRA is yet to see significant improvements to the housing stock. The median single family home was built in 1925 (39 years older than the city median) and is valued at \$54,000 (half of the city median value.)

### Hilltop CRA

The Hilltop CRA consists of 4,805 parcels, which cover 1.34 square miles (856 acres). It is the most heavily residential of the five CRAs under study, with residential properties (including apartments) accounting for 90% of the parcels and 58% of the land area. The area has relatively few vacant lots (123), but there are 688 vacant structures; combined, these make up 17% of the properties in the district. While there are pockets of stable housing in good condition, housing in the area has generally declined as evidenced by the median single family home age of 92 years (42 years older than the city median age for single family homes) and median home value of \$52,200 (52% lower than the City's median value for single family homes of \$108,000.) As of the 2010 Decennial Census, the Hilltop CRA had a population of 11,560.

### North Central CRA

This proposed CRA covers approximately the same area as the North Central Area Commission, encompassing 4.1 square miles (2,598 acres). There are 3,577 residential parcels in this area, accounting for 71% of all North Central parcels and 25% of its land area. This area is characterized by a mix of dispersed, dated housing stock (the median single family home was constructed in 1955), light industrial and manufacturing, commercial, and warehousing land uses. There is little in the way of newer residential development or redevelopment. 18% of all parcels in North Central are vacant. At 232 vacant structures, there are considerably fewer vacant homes compared to the other CRAs in this survey. However, North Central includes 677 vacant lots, composing the greatest percentage of vacant lots of the CRAs in this survey. At 13% of all parcels as vacant lots, this CRA presents potential opportunities for development. As of the 2010 Decennial Census, the North Central CRA has a population of 9,761. The median home value is \$51,300, which is 53% lower than the city median.
