

**DETAILED BACKGROUND:** The Department of Public Utilities recommends reimbursement to Aqua Pure Bottled Water Corp. for over-payment of sanitary charges. The customer has a credit balance of \$52,995.74 due to an adjustment resulting from the customer being charged double for sanitary charges because of an incorrect association of a sewer service when the sewer register meter was activated on March 29, 2007. This caused a double billing of the sanitary charges. The sewer service was inactivated to correct this billing error. The adjustment of the Sanitary charges total \$72,265.46 from March 29, 2007 to May 15, 2008. Because this account has gone through another billing cycle since the adjustment the total refund the customer is entitled to is \$52,995.74.
