RE: Envirosight Video Pipeline Inspection Systems

Dear Sir or Madam:

Thank you for your continued interest in our inspection products. Like Envirosight, most manufacturers offer a lateral launch add-on for their mainline inspection system. However, due to the unique designs and system operating platforms of the different manufacturers, none are interchangeable with each other when considering these add-ons. Therefore, adding lateral launch capability to your Rover X mainline inspection system will require that you use a Rover X SAT model lateral launch system.

In addition, Best Equipment is the sole source in the states of Indiana, Kentucky and Ohio for all families of Envirosight video pipeline inspection equipment and software. These systems include, but are not limited to, Rover, Rover X, Rover X SAT, Quickview, Jetscan and Verisight Pro.

Please feel free to contact me with any questions or concerns that may arise.

Regards,
