

Since my previous appointment I provide professional architectural services on a regular basis for Plaza Properties for residential and commercial projects in and around Columbus. Two of the structures are of historic significance. I have also provided services to other clients in and around Columbus. One project was in German Village. I am currently a registered architect in Indiana and Ohio. At one time I was registered and practiced in 18 states. Prior to appointment to BOCA I served on the German Village Commission for 36 years of which I was chairman for 22 years. Originally appointed as the architect. While on the commission I developed a user friendly application for, worked toward developing a qualified commission to hire and guide applicants, and believe I played a significant role in developing and amending the guidelines handbook. At this time I am requesting re-appointment.
