Subject: FW: Purchase of Two (2) Three Wheel Sweepers From A&H

Hello,

The Division of Infrastructure Management is seeking approval to purchase two (2) Three Wheel Mechanical Street Sweepers. The sweepers will be utilized for cleaning city streets in order to maintain compliance with our M4 permit. These will be one for one turn-ins. The brass tags for the turn-ins will be identified upon delivery of the new sweepers. 3 Wheel Mechanical Sweepers utilize one motor to power the drivetrain and sweeping functions. Therefore, we are requesting diesel motors to ensure adequate power and reliability for both functions. They are requesting the sweepers be purchased on state contract.

According to their records, 24368 and 24650 will likely be the turn-ins for the two new sweepers. They are both diesel.

Their 3 wheel fleet currently consists of 100 percent diesel motors. The reasoning for that was an increased cost per unit of over \$100,000 per sweeper in order to convert them to CNG. In addition, the configuration of the 3 wheel sweepers made them top heavy and harder to maneuver with the added CNG tank.

Please let me know if you have any additional questions.

Thank you,

Jessica Yu

Jessica,

Thanks. Let's make sure we included these items when we submit the request to Fleet. I approve of the purchase.

Thanks!

Steve

Steve/Lela,

I touched base with Bob and he advised the following –

According to our records, 24368 and 24650 will be the turn-ins for the two new sweepers. They are both diesel.

Our 3 wheel fleet currently consists of 100 percent diesel motors. I believe the reasoning for that was an increased cost per unit of over \$100,000 per sweeper in order to convert them to CNG. In addition, the configuration of the 3 wheel sweepers made them top heavy and harder to maneuver with the added CNG tank.

Please let me know if you have any additional questions.

Thank you,

Jessica Yu

Bob,

What is the breakdown of diesel/CNG sweeper units of this type? Do you know which units will likely be turned in and are those CNG or diesel?

Thanks,
