This legislation authorizes the Director of Finance and Management to establish a purchase order for the Division of Sewerage and Drainage, Sewer Maintenance Operations Center for a TV Step Van with related camera equipment from Best Equipment Company. This equipment is used to provide digital sidewall scanning of the various sanitary and stormwater lines to determine maintenance and repair needs and to inspect the lines. Research has revealed that a relatively new technology called digital sidewall scanning is showing great promise. The technology captures digital images generating a flat scan that can be reviewed five times faster than video. This technology eliminates the need for pipe inspectors to spend time with a camera crawler stationary while they pan, tilt and rotate a camera to create a videotape record. When digital scanning is complete, the flat scans are reviewed off-site, no longer requiring real-time on-site analysis. Our research indicates that this technology will greatly enhance the speed and detail at which pipeline inspection can be performed.
