RE: City of Columbus Police Department Access Control

To whom it may concern:

The City of Columbus Police Department currently utilizes the Frontier (formerly Matrix) access control system to secure many of its facilities. The Frontier access control system is only sold through certified integrators who have completed all necessary training and certifications. In the State of Ohio, Xentry Systems Integration is the sole source for the Frontier access control solution.

Our only authorized subcontractor for the City of Columbus Police Department is as follows:

KNS Services - 8450 Rausch Drive, Plain City, OH 43064

They are authorized to install the field equipment and run the required cable. All final hookups, testing, and programming must be done by a Xentry technician.

Should you have any questions, please do not hesitate to contact me. I look forward to the continued partnership with the City of Columbus Police Department.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeff A. Stout', with a long horizontal line extending to the right.

Jeff A. Stout
VP of Sales and Marketing
