

David Landreman

716 Wilson Avenue
Columbus, Ohio

Entrepreneur, technology executive, and community builder with over two decades of experience leading innovation across industries. Recognized for solving complex challenges in engineering, business, and community development through the creative use of technology and collaboration.

Professional Experience

Empora Title — *Chief Technology Officer*

2024 – Present · Columbus, Ohio

- Leads technology, product, and AI strategy for an investor-focused title company redefining how real estate transactions are completed.
- Launched a next-generation financial system enabling real-time deal visibility for customers.
- Transitioned development teams to AI-enabled workflows, delivering features for documentation understanding and deal verification.

Olive — *Chief Technology Officer / Chief Product Officer / Software Engineer*

2013 – 2023 · Columbus, Ohio

- Directed engineering, product, IT, and cybersecurity through rapid growth from 200 → 2,000 employees, establishing Olive as a national leader in healthcare automation.
- Oversaw creation of Olive's robotic process automation platform, adopted by major health systems across the U.S.
- Guided corporate acquisitions and integrations; spearheaded early international expansion initiatives.

The Columbus Dispatch — *Senior Internet Development Engineer*

2007 – 2013 · Columbus, Ohio

- Led software development for Dispatch.com, 10TV.com, and partner radio stations.
- Helped drive the organization's transition from print to digital, expanding audience reach and modernizing content delivery.

Community Leadership

Besa — *Founding Board Member & Board Secretary*

2012 – 2018 · Columbus, Ohio

- Helped establish one of Columbus's leading nonprofit organizations connecting people to volunteer opportunities and social impact causes.
- Supported early platform development and governance, enabling significant volunteer and donor growth.
- Continues to serve as a sustaining donor and advocate for community engagement.

State Committee on Computer Science (Ohio) — *Committee Member*

2021 – 2022

- Served on a statewide committee established under House Bill 110 to advise the State of Ohio on modernizing computer science education.
- Collaborated with leaders from government, education, and industry to shape recommendations that positioned Ohio as a national leader in technology and workforce development.

Speaking Engagements

Ohio Tech Summit (2025) · OpenCms Days · Cloud Develop Conference

Community & Values

Rooted in the Columbus community for over two decades, David believes technology and collaboration can strengthen neighborhoods just as much as they can transform industries. He brings an innovator's mindset to local problem-solving—focused on transparency, inclusion, and empowering people through smart systems and shared purpose. Whether mentoring teams, supporting nonprofits like Besa, or helping small businesses embrace modern tools, he's driven by a simple idea: progress happens when we invest in one another and the places we call home.
